

Supplementary Information

The pivotal role of carbonate in the formation of a bis-phenolate supported Co₁₅ cluster

Ross McLellan, Julien Rezé, Stephanie M. Taylor, Ruairaidh D. McIntosh, Euan K. Brechin and Scott J. Dalgarno

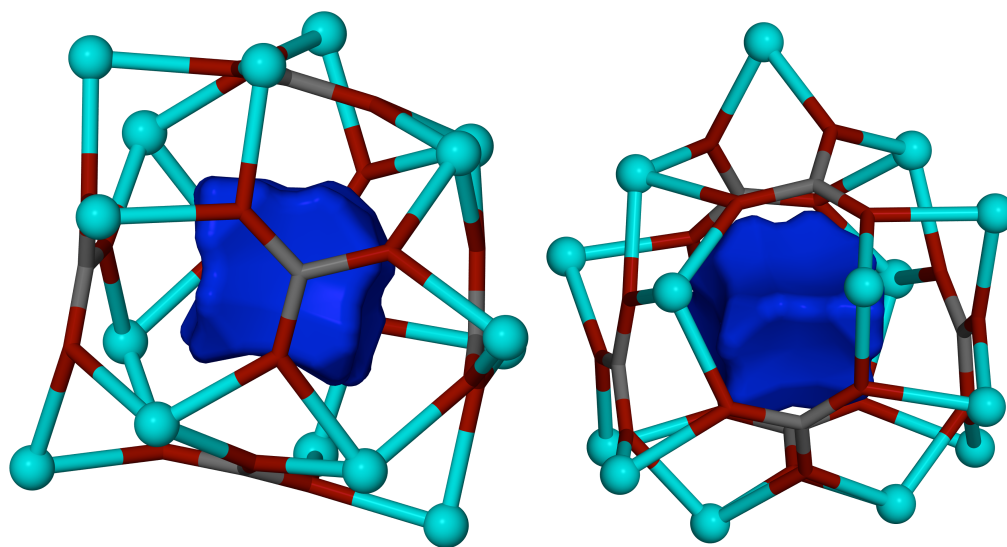

Figure S1. Views of the small void found within the polymetallic skeleton in **1**.

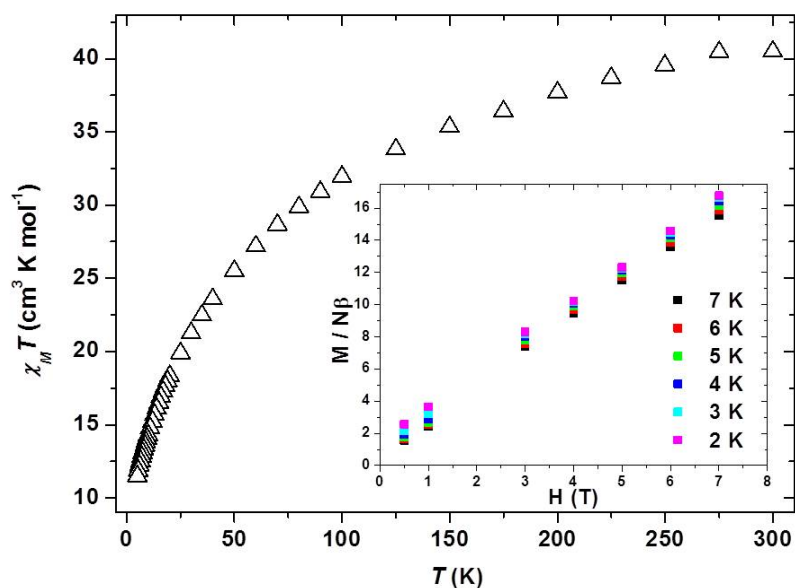

Figure S2. Plot of the $\chi_M T$ product versus T for **1** in an applied field of 0.1 T. The inset shows magnetisation versus field data in the $T = 2-7$ K and $H = 0.5 - 7.0$ T temperature and field ranges.
