

Hydrothermal synthesis of VO₂ (B) nanorings with V₂O₅ sol

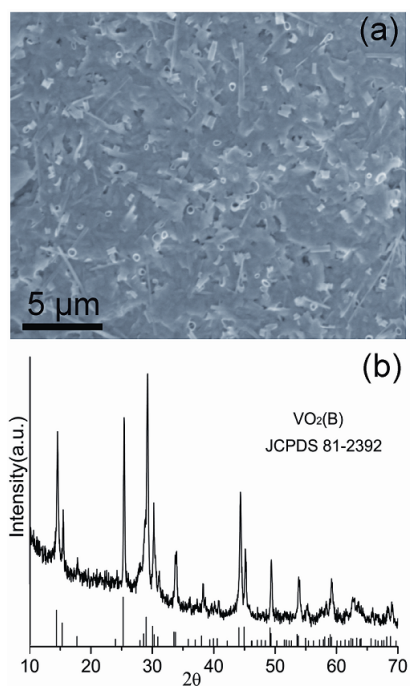

Fig. S1. (a) A low-magnification SEM image of VO₂ (B) nanorings and (b) the corresponding powder XRD pattern.

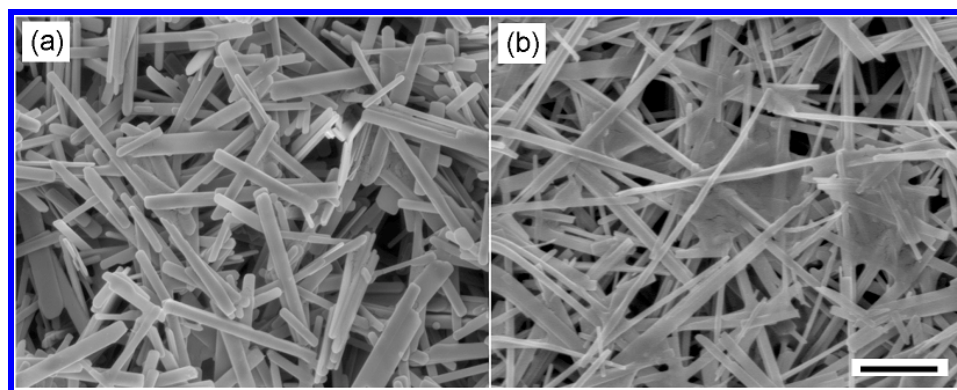

Fig. S2. SEM images of VO₂ (B) nanostructures obtained at volume ratio between polyethylene glycol and V₂O₅ sol of (a) 2:3 and (b) 7:3. The scale bar is 2 μm.
