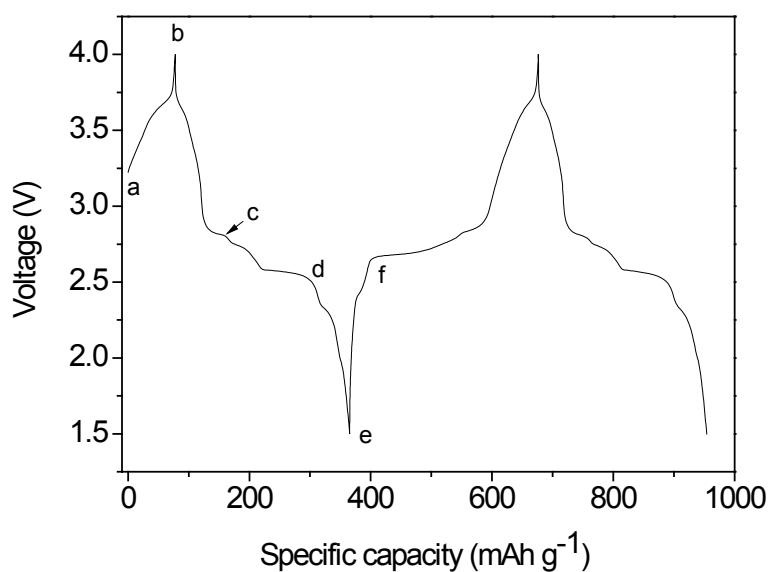

Fig. S2 The first two charge-discharge curves of LiV_3O_8 electrode between 1.8 and 4.0 V; The inset symbols of a-e depict different charge status: (a) no cycling; (b) charge to 4.0 V; (c) discharge to 2.8 V at the 1st cycle; (d) discharge to 2.5 V at the 1st cycle; (e) discharge to 1.5 V at the 1st cycle; (f) charge to 2.5 V at the 2nd cycle.
