

Supplementary Information

Two-dimensional self-assembly of single-crystal, poly-crystal and co-crystal at the liquid/solid interface

Pei Liu, Xinrui Miao*, Zhuomin Li, Bao Zha, Wenli Deng*

College of Materials Science and Engineering, South China University of Technology,
Guangzhou 510640, China

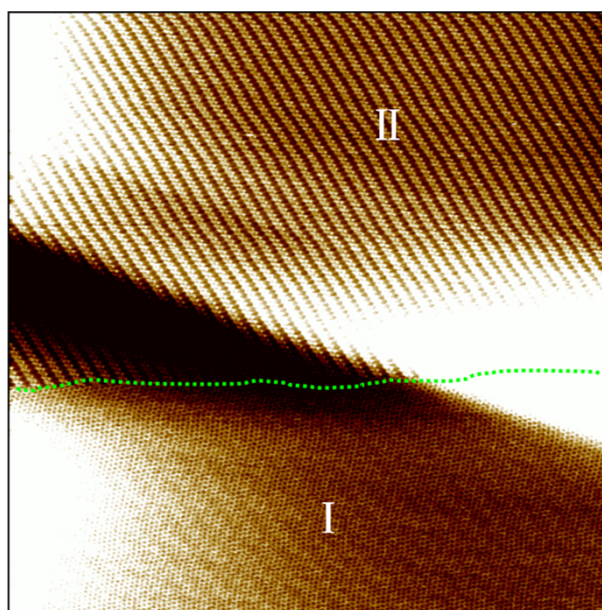

Fig. S1 Large-scale STM image of C2 self-assembly at 1-phenyloctane/ HOPG interface showing the coexistence of two types of structures (Type I and Type II). Scan area: 200 nm × 200 nm; Tunneling conditions: $V_{\text{bias}} = 764$ mV, $I_t = 482$ pA.
