

Supplementary data for

The Reluctant Polymorph: Investigation into the effect of self-association on the solvent mediated phase transformation and nucleation of theophylline

Raitis Bobrovs, Linda Seton and Nicola Dempster

Table S1. Solubilities of theophylline Form II and Form IV in chosen solvents

Solvent	c, mol/L	
	II	IV
Methanol	0.058	0.049
Water	0.040	
Acetonitrile	0.011	
Acetone	0.018	
Chloroform	0.021	
Formic acid	1.780
