

## Supplementary material

The xyz geometries of all compounds optimized at RI-MP2 level with cc-pVQZ basis set are collected in the file **b707182e.txt**.

Table 1S. The interaction energies (in kcal/mol) obtained by methods mentioned in this article (RI-MP2 in bold , other methods in italics), relative differences between RI-MP2 energies and energies obtained by tested methods and RMSD deviations between RI-MP2 and DFT-based geometries (in Å).

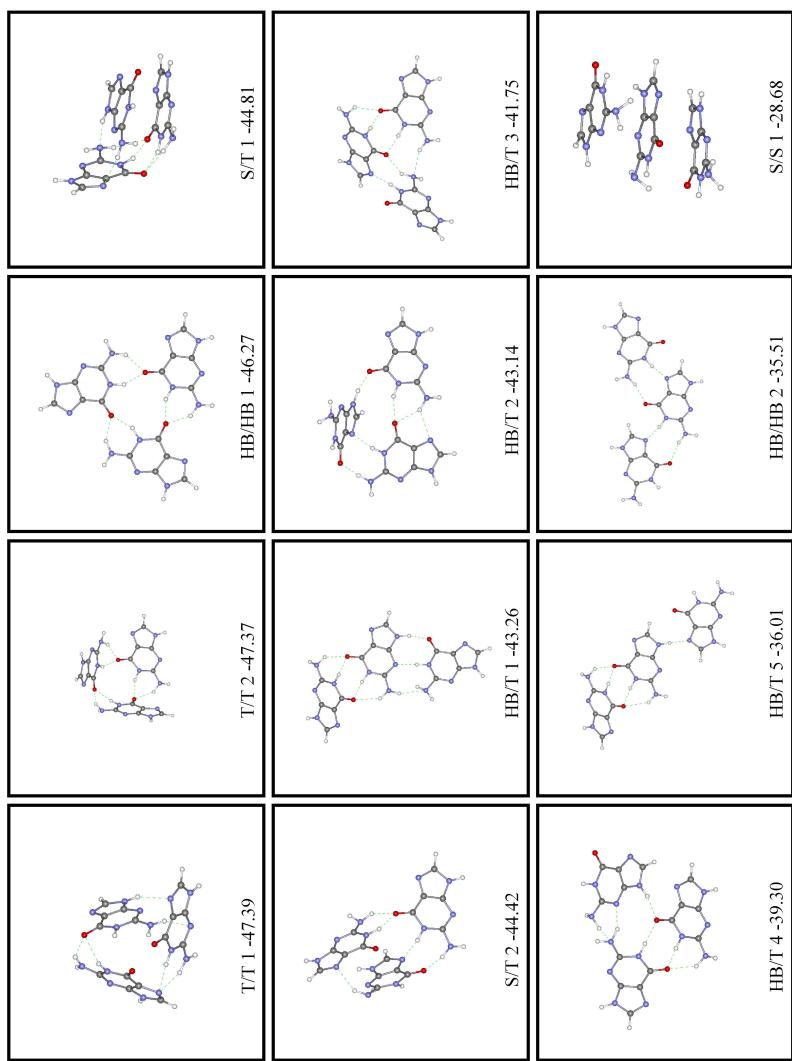

**Figure 1S.** Twelve optimized structures for each of eleven different trimers combinations which were used in this database. Below each structure the structural motif and RI-MP2 interaction energy (in kcal/mol) calculated employing the TZVPP basis set is depicted. If more than twelve structures for a given trimer were taken into account, their geometries can be found at the Supplementary material *all\_structures\_xyz.txt*.
