

Electronic Supplement to “The interaction of water with Ni(111) and H/Ni(111) studied by TPD and HREELS.

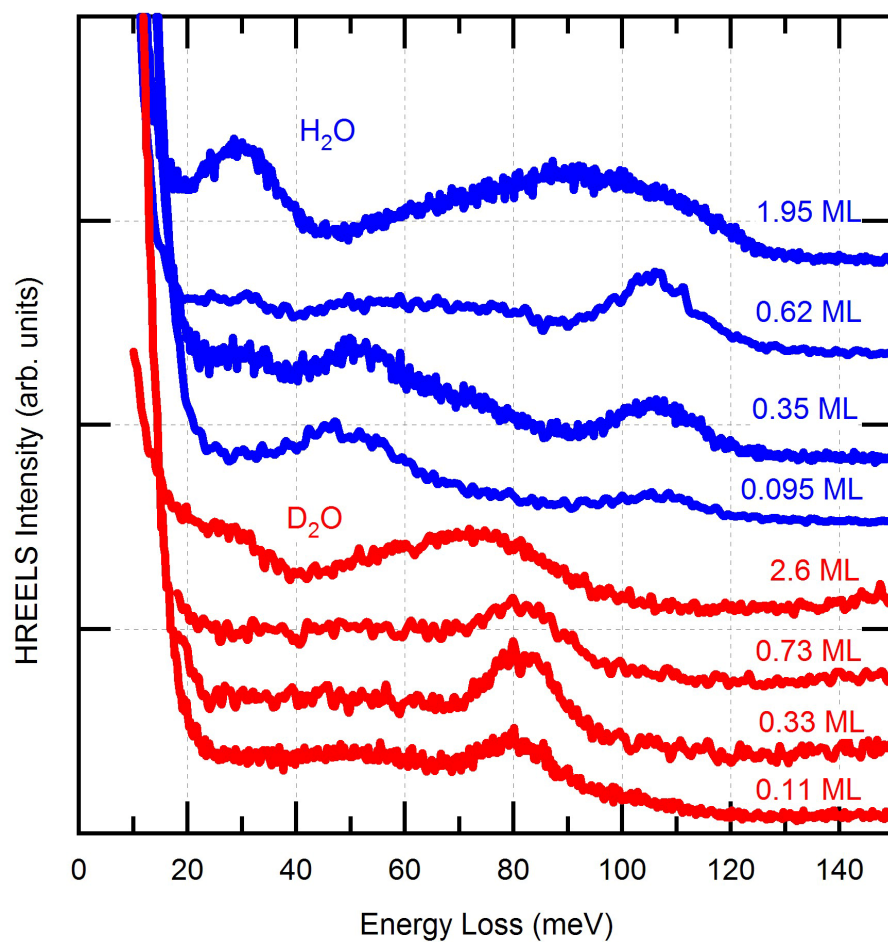

Figure 6 provides a more detailed view of the features observed in the lower energy loss regime for small doses of H₂O and D₂O (see also figure 5). A detailed discussion of the individual features and the interpretation are given in the text.

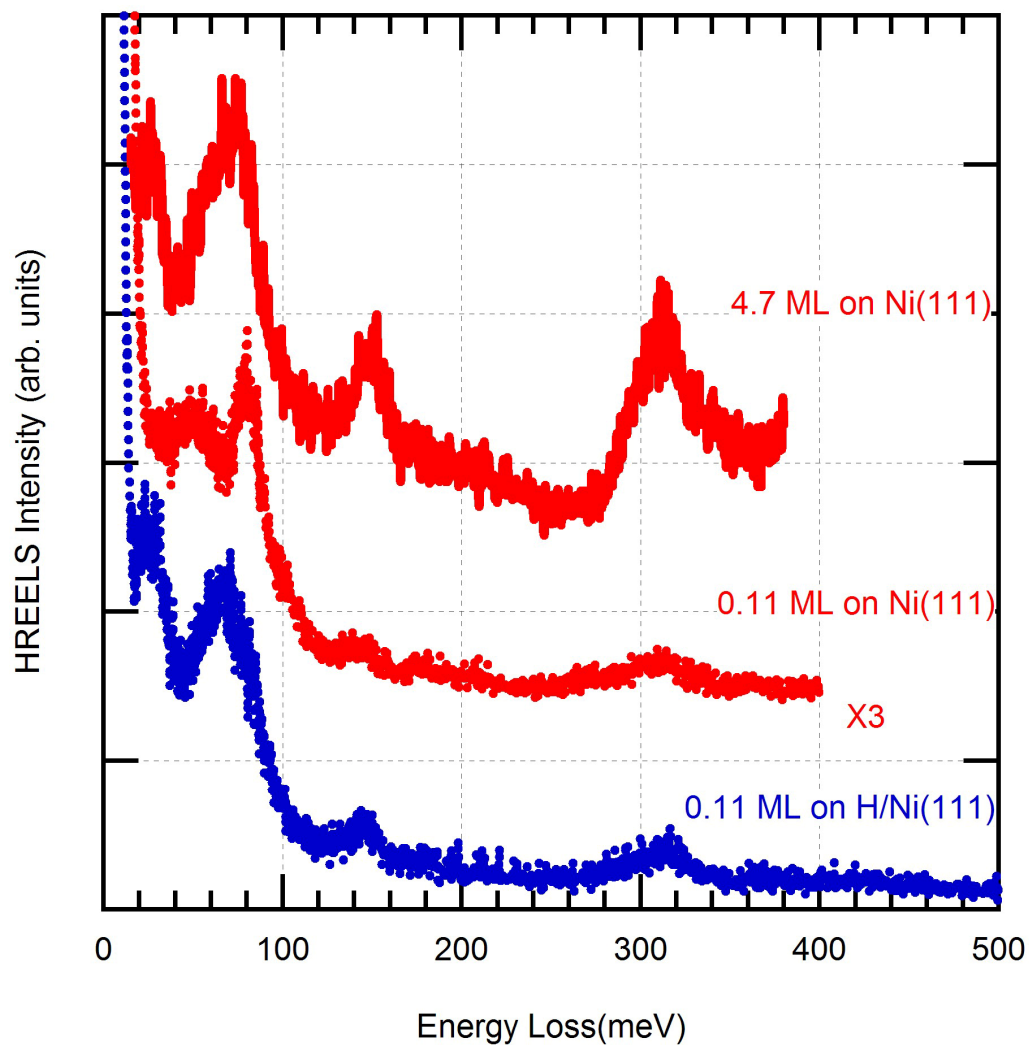

Figure 7 provides full range HREEL spectra of the traces shown in figure 5 in the text.
