

Supplementary Information

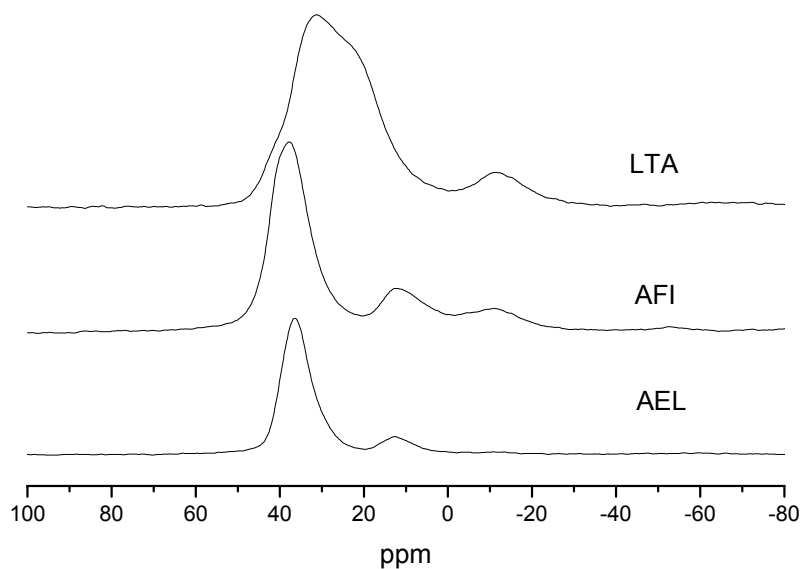

Figure S1 ^{27}Al MAS NMR spectra of the pure phased AEL, AFI and LTA structures

^{27}Al MAS NMR spectra unambiguously indicate that the Al species in the solid products are tetrahedral, penta-coordinated and octahedral Al, and most of them are framework Al species.¹⁻³

Figure S2 ^{31}P MAS NMR spectra of the pure phased AEL, AFI and LTA structures.

The signals at -22 and -29 ppm in the ^{31}P MAS NMR spectra can be ascribed to the fully condensed *P i.e.* framework P species in the solid products.¹⁻³
