

Electrochemical stability of self-assembled monolayers on nanoporous Au

Masataka Hakamada, Masaki Takahashi, Toshiyuki Furukawa, Kazuki Tajima,
Kazuki Yoshimura, Yasumasa Chino and Mamoru Mabuchi

Cyclic voltammetry curve for 'bare' nanoporous Au

Figure S1 shows cyclic voltammetry curve of as-dealloyed nanoporous Au without SAM, showing no peaks for transition, desorption and readsorption peaks of SAM. Hence, the peaks observed in Fig. 2 are valid.

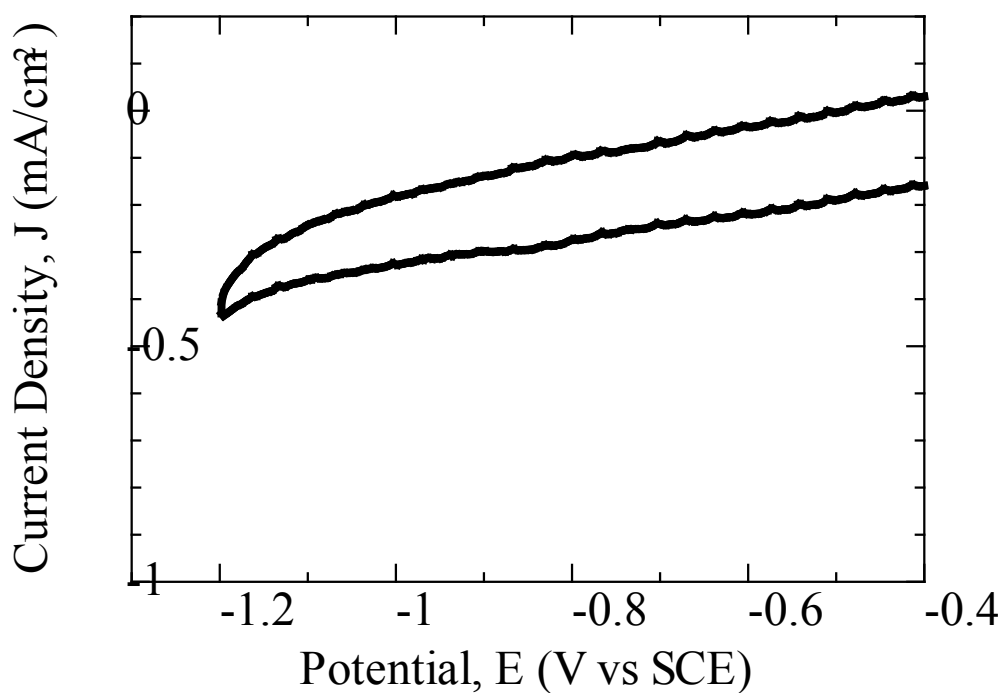

Figure S1. Cyclic voltammetric curves of as-dealloyed nanoporous Au samples without SAM. The electrolyte used was 0.1 M NaOH and the scan rate was 5 mV/s.
