

Electronic Supplementary Information (ESI)

Diketopyrrolopyrrole-based acceptor polymers for photovoltaic application

Marie-France Falzon, Arjan P. Zoombelt, Martijn M. Wienk, and René A. J. Janssen

(a, b, c) Dark current density characteristics of the electron-only device of PA, PB, PC. Thickness is ~ 150 nm. (d, e, f) Dark current density characteristics of the electron-only device of blends P3HT:PA, P3HT:PB, P3HT:PC. Thickness is ~ 250 nm.
