²*Center for Forensic Hair Analytics, Zurich Institute of Forensic Medicine, University of Zurich, Zurich, Switzerland*

Table S1 Listed are compounds with an identification level 3 (according to the Metabolomics Standard Initiative guidelines ¹) found as significantly altered between untreated and bleached hair samples (arranged in compound classes).

| Feature name | Analytics | Adduct | Measured | RT | FDR | Fold | Conc. | Formula | Tentative Identification | Compound Class | |
|-------------------------|-----------|--------|----------|-----|---------------------|------|-------|---|--------------------------|-------------------------------------|--|
| | | | | | | | | | | | |
