

Supporting information

Topography induced stiffness alteration of stem cells influences osteogenic differentiation

Liangliang Yang^{ab†}, Qi Gao^{c†}, Lu Ge^{ab}, Qihui Zhou^d, Eliza M. Warszawik^{ab}, Reinier Bron^{ab}, King Wai Chiu Lai^{c*}, and Patrick van Rijn^{ab*}

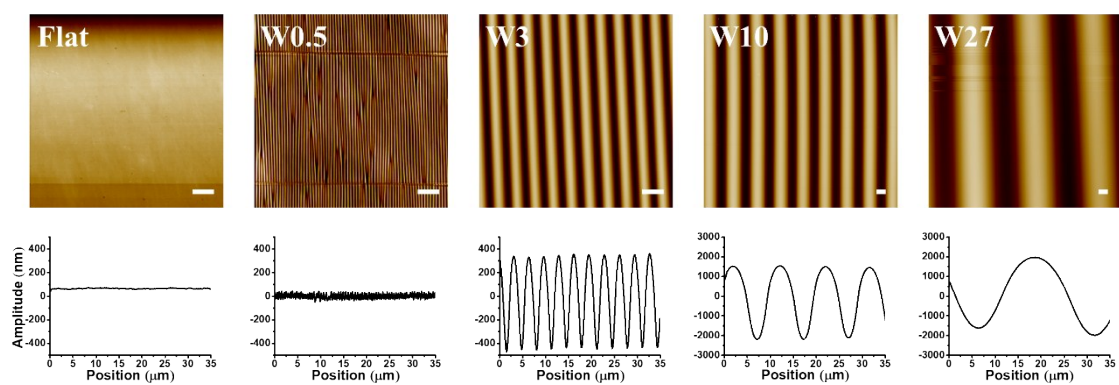

Fig. S1 AFM images taken from side part of substrate and height profiles of the structured PDMS surfaces obtained after imprinting. Scale bar is 4 μm and applies to all images.

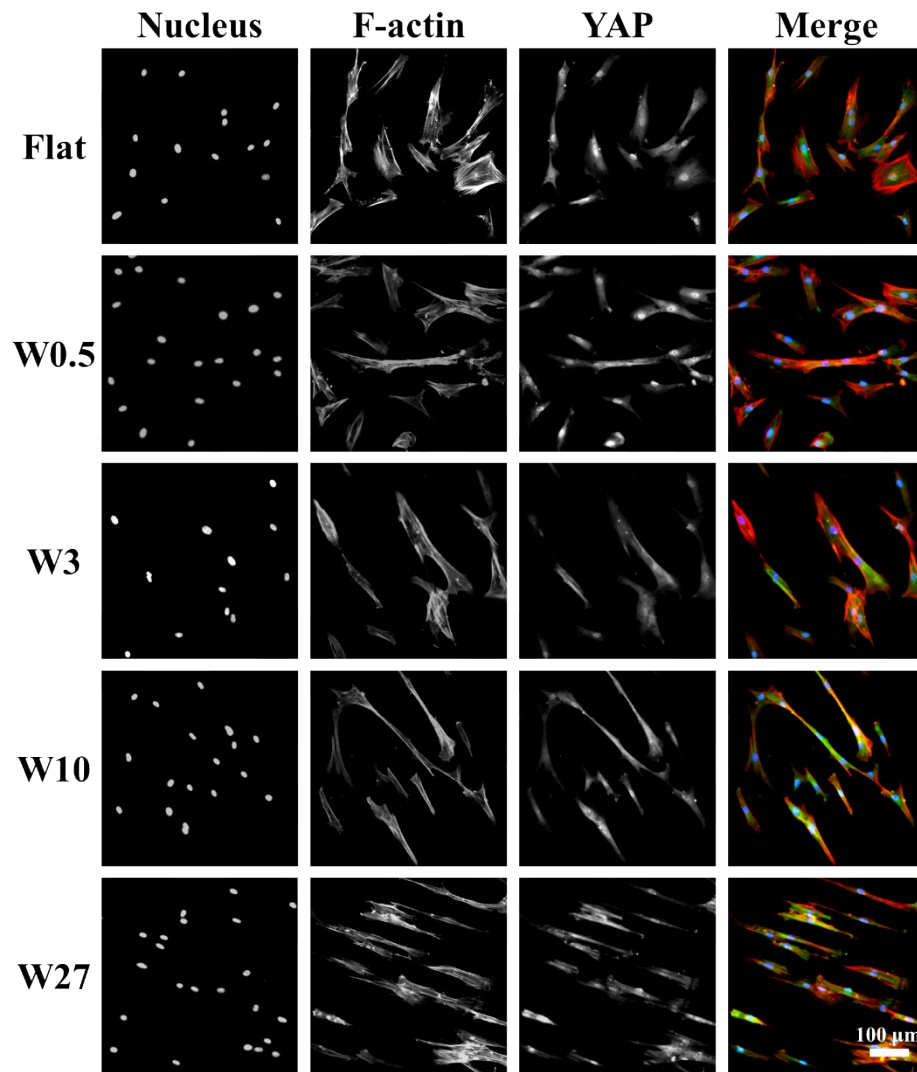

Fig. S2 (A) Representative images of YAP localization in hBM-MSCs seeded onto different surfaces for 24 hours.
