Cascade Reaction of Isatins with Nitro-substituted Enamines: Highly Selectively Synthesis of Functionalized (Z)-3-(1-(Arylamino)-2-oxoarylidene)indolin-2-ones

Cong-Hai Zhang, Rong Huang, Xia Qing, Jun Lin,* and Sheng-Jiao Yan*

A novel protocol for the construction of functionalized AOIDO from isatins **1** with nitro-substituted enamines **2** via an unprecedented cascade reaction catalyzed by sulfamic acid is developed.
