This PDF file includes: Supplementary Note Fig. S1 to S3

## **Supplementary Note**

Because the data points are scattered, fittings are carried out for the data set in which some scattered data points are omitted. The results of fitting are indicated by solid curves. The parameters used are summarized in Table 1.

## **Supplementary Figures**

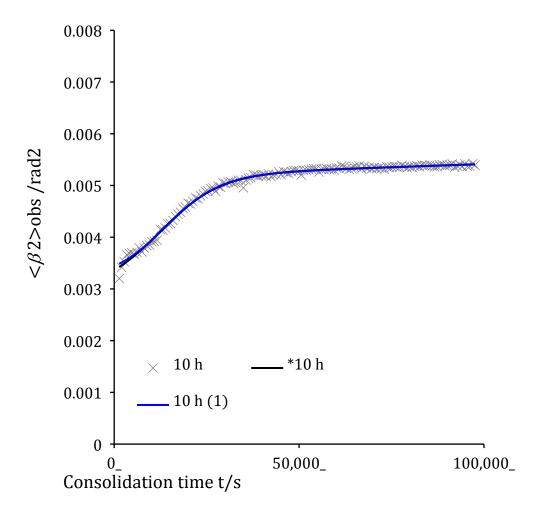

Fig. S1 Fitting results for a 10 h sample where all data points are used (\*10 h) and some scattered data points are omitted (10 h (1)). Omitted points are not shown.

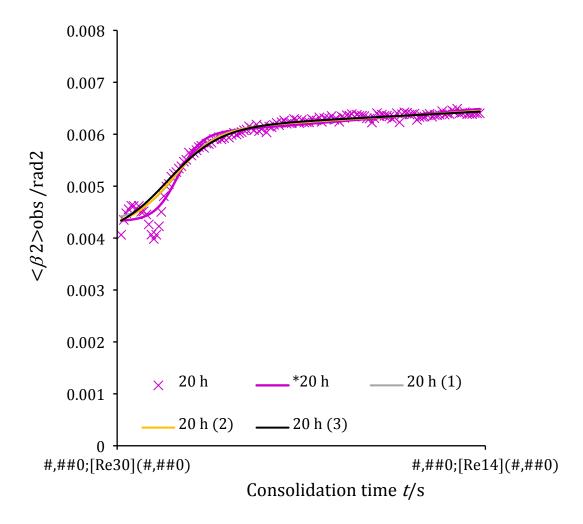

Fig. S2 Fitting results for a 20 h sample where all data points are used (\*20 h) and some scattered data points are omitted (20 h (1), 20 h (2), 20 h (3)). Omitted points are not shown.

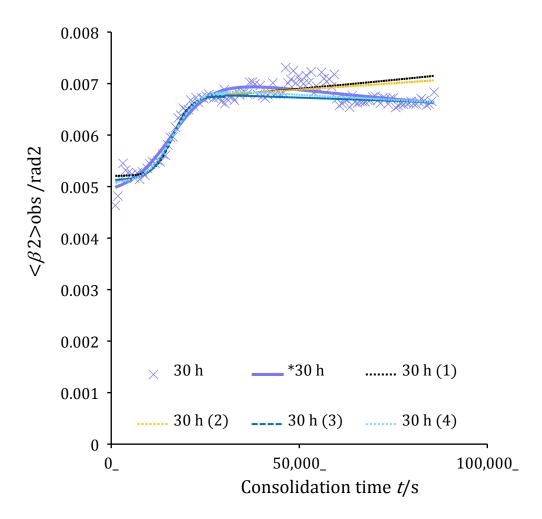

Fig. S3 Fitting results for a 30 h sample where all data points are used (\*30 h) and some scattered data points are omitted (30 h (1), 30 h (2)). Omitted points are not shown.
