2

3 1.1 *Appendix A*

Table S1: General information about each sampled wastewater treatment plant

| | Type | Biological capacity | | Hydraulic capacity (m ³ /hour) | |
|-------------------|----------------------------|---|--|---|--|
| | | Population equivalents (P.E.) à g TOD/day | | | |
| Amsterdam | Aeration tank | 1.014.000 à 136 | | 30 000 | |
| Amstelveen | Aeration tank | 125.000 à 136 | | 4 500 | |
| Utrecht | Aeration tank | 530.000 à 136 | | 15 000 | |
| Bennekom | Oxidation ditch/ carrousel | 22.000 à 136 | | 1000 | |
| Eindhoven | Activated sludge | 750.000 à 136 | | 35 000 | |

Table S2: Reported measured concentration of CBZ and MET in influent and effluent of the WWTP sampled in this project. Data were collected from emissieregistratie.nl

| WWTP | year | Concentration (µg/l) | | | | | | Load (mg/year/P.E) | | | | | | |
|------|------|----------------------|-------|-------|----------|-------|-------|--------------------|-------|-------|----------|-------|-------|-------|
| | | Influent | | | Effluent | | | Influent | | | Effluent | | | |
| | | Min | Mean | Max | Min | Mean | Max | Min | Mean | Max | Min | Mean | Max | |
| CBZ | BNK | 2009 | 0.6 | 0.615 | 0.63 | 0.71 | 0.755 | 0.8 | 29.33 | 30.94 | 32.54 | 36.68 | 37.89 | 39.11 |
| | | 2007 | | | 0.5 | 0.5 | 0.5 | | | | | 64.9 | 64.9 | 64.9 |
| | UTR | 2010 | 0.49 | 0.56 | 0.63 | 0.38 | 0.57 | 0.76 | 33.66 | 35.61 | 37.57 | 26.11 | 35.71 | 45.32 |
| | EIN | 2007 | | | | 0.54 | 0.54 | 0.54 | | | | 28.17 | 28.17 | 28.17 |
| | | 2009 | 0.52 | 0.545 | 0.57 | 0.46 | 0.545 | 0.63 | 28.79 | 30.32 | 31.84 | 23.23 | 30.91 | 38.58 |
| | | 2014 | | | | 0.44 | 0.44 | 0.44 | | | | 37.98 | 37.98 | 37.98 |
| | AMV | 2010 | | | | 1.549 | 1.549 | 1.549 | | | | 158.6 | 158.6 | 158.6 |
| | AMS | | | | | | | | | | | | | |
| MET | BNK | 2009 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| | | 2010 | 302.2 | 326.4 | 350.6 | 4.8 | 4.85 | 4.9 | 20760 | 20830 | 20910 | 292.2 | 311 | 329.8 |
| | EIN | 2009 | 77.8 | 81.4 | 85 | 1.1 | 1.3 | 1.5 | 4293 | 4529 | 4764 | 67.36 | 71.56 | 75.76 |
| | | 2014 | | | | 1.8 | 4.2 | 6.6 | | | | 155.4 | 362.5 | 569.7 |
| | AMS | | | | | | | | | | | | | |
| | AMV | | | | | | | | | | | | | |

5 **1.2 Appendix B**

6

Table S3: MiSeq sequencing primers with pad-linker as selected based on (34)

| | |
|---------------|------------------------------------|
| V4P7_index | ATTAGAWACCCBDGTAGTCCGGCTGACTGACT |
| V4F_seqprim R | AGTCAGTCAG-CC-GGACTACHVGGGTWTCTAAT |
| V3F_seqprim F | TATGGTAATT-GG-CCTACGGGNGGCWGCAG |

7

8 **1.3 Appendix C**

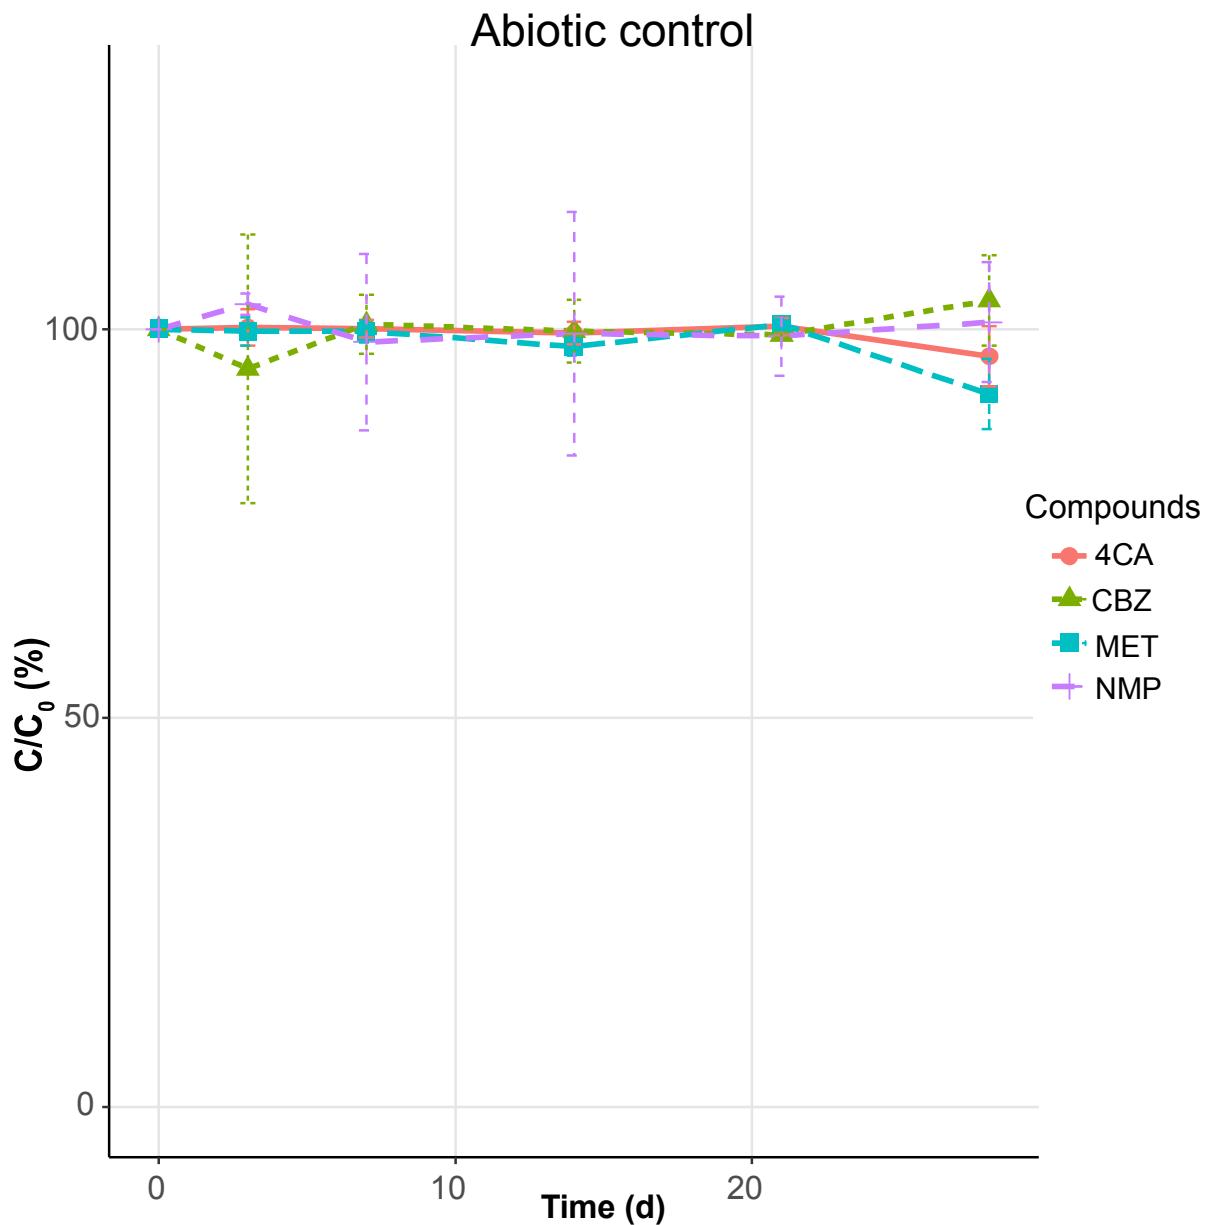

Fig. S1: C/C_0 (%) of 4-chloroaniline (4CA), carbamazepine (CBZ), metformin (MET) and N-methylpiperazine (NMP) in the abiotic controls.

10 **1.4 Appendix D**

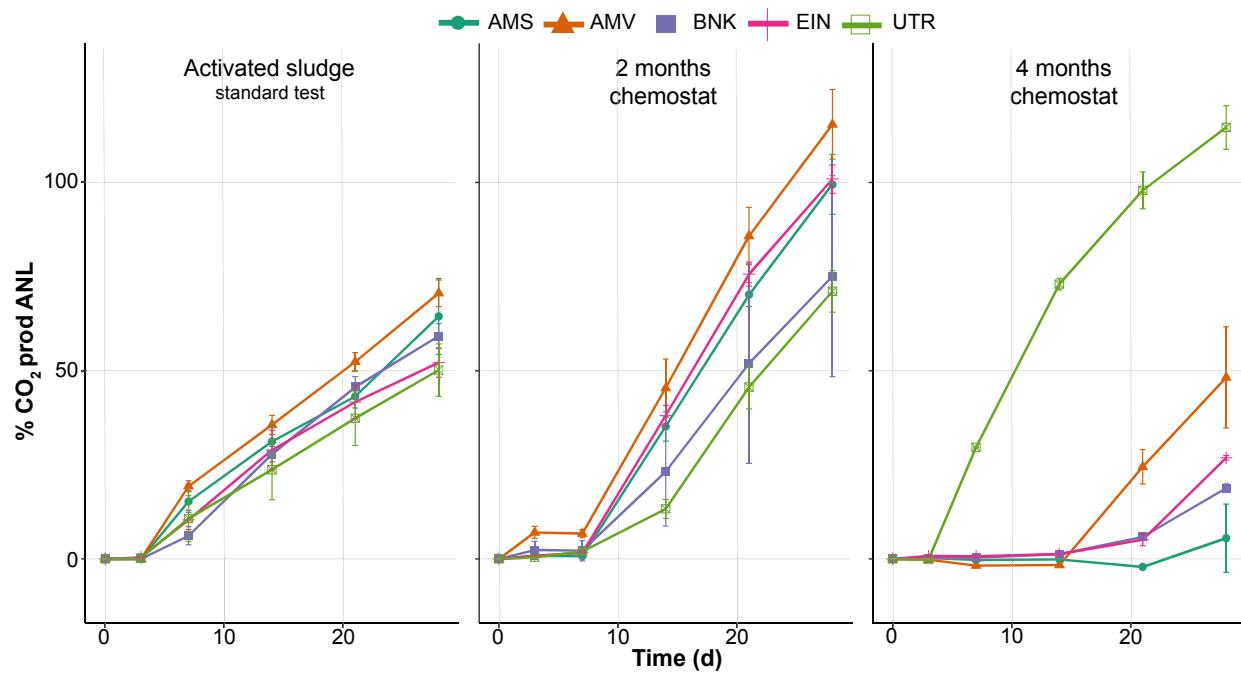

Fig. S2: % of CO_2 production from ANL by activated sludge (autumn) (A) and chemostat-exposed communities in biodegradability tests.

11

12

13 1.5 Appendix E

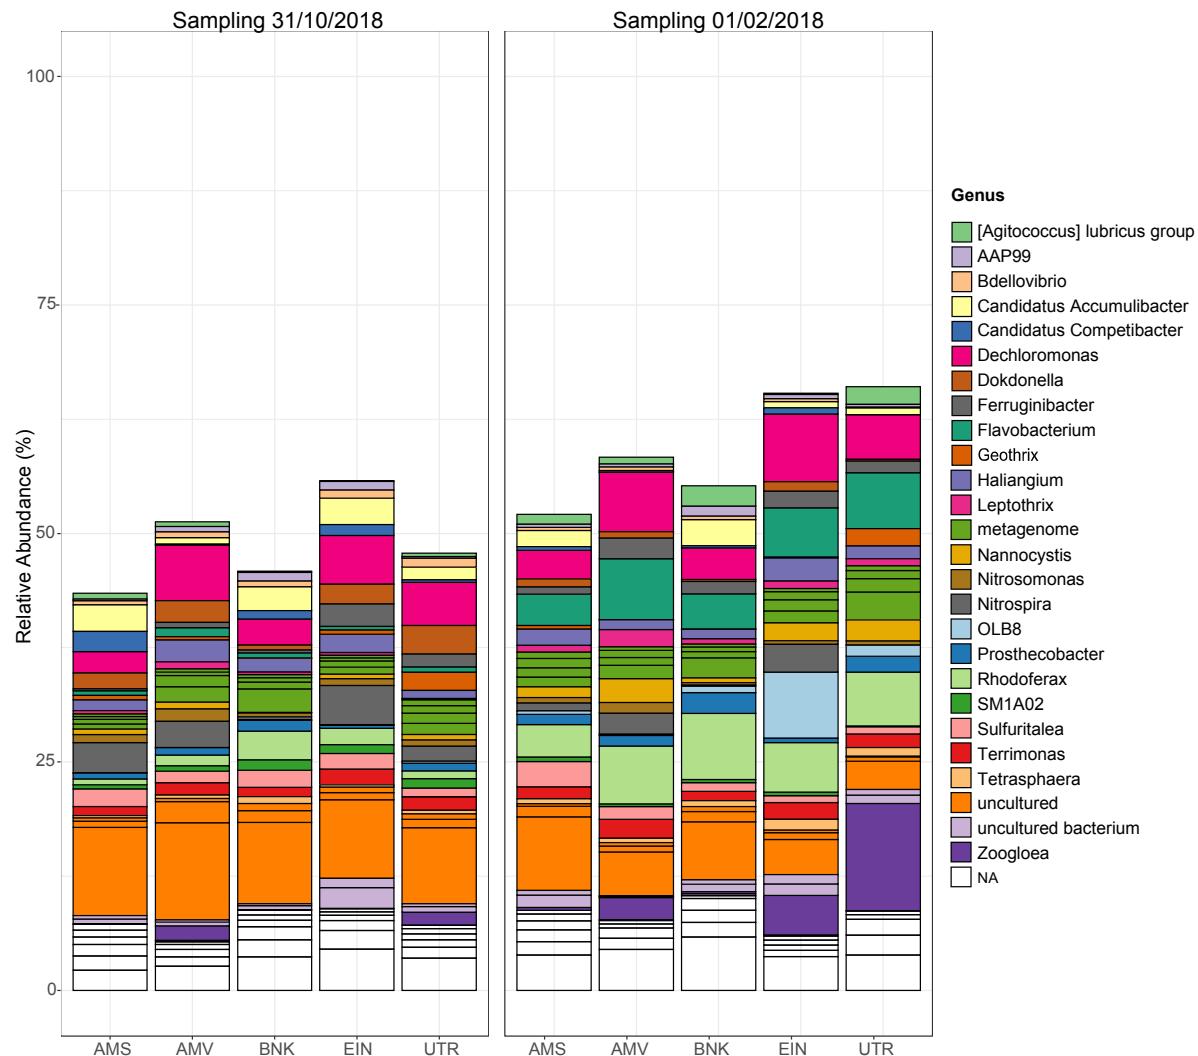

Fig. S3: Genus and relative abundance (%) of the dominant taxa (>0.5%) in the different activated sludges sampled in autumn (31/10/2018) and winter (01/02/2018). Amsterdam (AMS), Amstelveen (AMV), Bennekom (BNK), Eindhoven (EIN), Utrecht (UTR). NA means that no genus could be assigned.

14

15

16 **1.6 Appendix F**

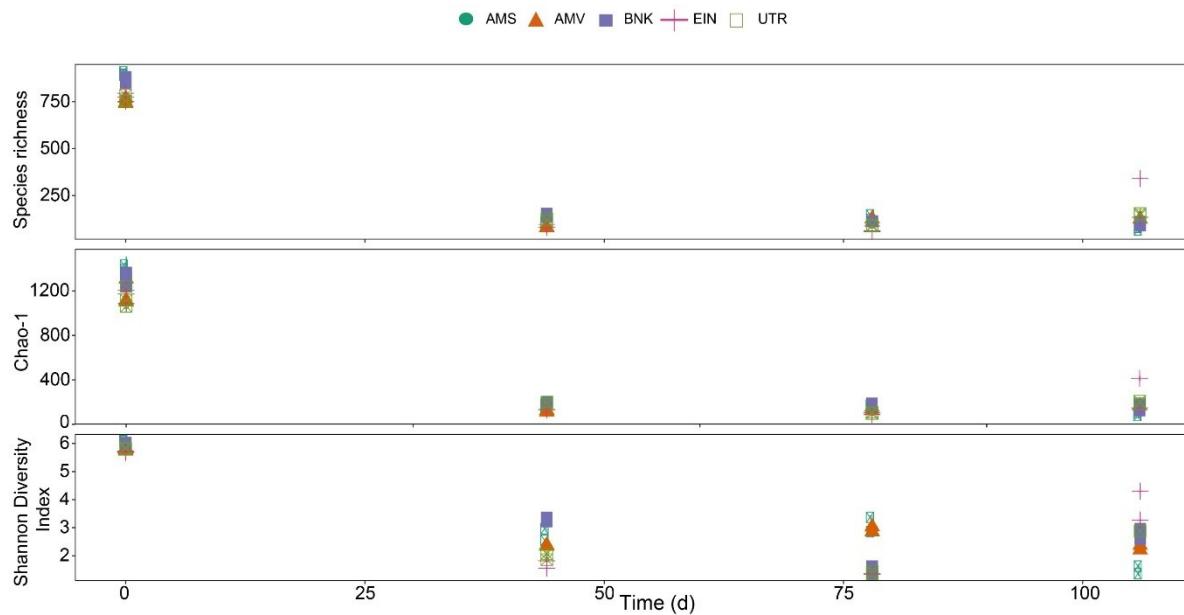

Fig. S4: Alpha diversity analysis of each chemostat sample over time (d). Species richness (number of OTUs/sample). Each colour represents a chemostat inoculated with activated sludge from each location: Amsterdam (AMS), Amstelveen (AMV), Bennekom (BNK), Eindhoven (EIN), Utrecht (UTR).
