

Fig. S1. Five fractions, I, II, III, IV, and V, of wheat germ hydrolytes were extracted via Sephadex G25 (A). The DPPH radical scavenging activity and oxygen radical absorption activity of five fractions *in vitro* (B).

Table S1. Amino acid sequences of potent peptides in fraction V identified by LC-MS/MS arranged via PeptideRanker results.

Number	Sequence	MW (Da)	PeptideRanker Results
1	NDWKQPGW	1029.461	0.85
2	ADWGGPLPH	948.4392	0.85
3	ANPWVPSM	900.4078	0.84
