

Fabrication of UiO-66/MIL-101(Fe) binary MOF/Carboxylated-GO composite for adsorptive removal of methylene blue dye from aqueous solutions

Abdelazeem S. Eltaweil ^{a,*}, Eman M. Abd El-Monaem ^a, Gehan M. El-Subruti ^a, Mona M. Abd El-Latif^b, Ahmed M. Omer ^{c,*}

Supplementary data

Table S1: R_L values for the adsorption of MB dye onto UiO-66/MIL-101(Fe)-GOCOOH composite Based on the Langmuir model.

C_o (mg/L)	R_L
50	0.11
100	0.06
150	0.04
200	0.03
300	0.02
