Table of contents

Fig. S1 Five arbitrary planes at the T-outlet
Fig. S2 MATLAB calculation of the distribution of $z$-component of magnetic field for five arbitrary planes a) at $z = 0.55$ mm away from the magnet; b) at $z = 0.65$ mm; c) at $z = 1$ mm; d) at $z = 1.35$ mm; e) at $z = 1.45$ mm; and f) $B_{z,max}$ with respect to distance from the magnet
Fig. S3 Changes of volume and diameter of 10% (v/v) ferrofluid for 25 µm depth a) volume b) diameter
Fig. S4 Changes of volume and diameter of 50% (v/v) ferrofluid for 25 µm depth a) volume b) diameter
Fig. S5 Changes of volume and diameter of 10% (v/v) ferrofluid for 30 µm depth a) volume b) diameter
Fig. S6 Changes of volume and diameter of 50% (v/v) ferrofluid for 30 µm depth a) volume b) diameter
Fig. S7 Changes of volume and diameter of 10% (v/v) ferrofluid for 40 µm depth a) volume b) diameter
Fig. S8 Changes of volume and diameter of 50% (v/v) ferrofluid for 40 µm depth a) volume b) diameter
Fig. S9 Droplet diameter after pinch off vs. capillary number ($Ca$) analysis. a) $Ca$ changes for three channel depths; b-d) droplet diameter vs. $Ca$ for channel depths of b) 25 µm; c) 30 µm; and d) $Ca$ of 40 µm depth for 50% (v/v) under an applied magnetic field
Fig. S1 Five arbitrary planes at the T-outlet
Fig. S2 MATLAB calculation of the distribution of z-component of magnetic field for five arbitrary planes a) at z = 0.55 mm away from the magnet; b) at z = 0.65 mm; c) at z = 1 mm; d) at z = 1.35 mm; e) at z = 1.45 mm; and f) Bz,max with respect to distance
Fig. S3 Changes of volume and diameter of 10% (v/v) ferrofluid for 25 µm depth a) volume b) diameter
Fig. S4 Changes of volume and diameter of 50% (v/v) ferrofluid for 25 µm depth a) volume b) diameter
Fig. S5 Changes of volume and diameter of 10% (v/v) ferrofluid for 30 µm depth a) volume b) diameter
Fig. S6 Changes of volume and diameter of 50% (v/v) ferrofluid for 30 µm depth a) volume b) diameter
Fig. S7 Changes of volume and diameter of 10% (v/v) ferrofluid for 40 µm depth a) volume b) diameter
Fig. S8 Changes of volume and diameter of 50% (v/v) ferrofluid for 40 µm depth a) volume b) diameter
Fig. S9 Droplet diameter after pinch off vs. capillary number (Ca) analysis. a) Ca changes for three channel depths; b-d) droplet diameter vs. Ca for channel depths of b) 25 µm; c) 30 µm; and d) Ca of 40 µm depth for 50% (v/v) under an applied magnetic field
