Electronic Supplementary Information for

Broad-band lead halide perovskite quantum dot single-mode lasers

Chun Zhou\textsuperscript{a,b}\textsuperscript{*}, Jie Yu\textsuperscript{a,b}\textsuperscript{*}, Hongxing Dong\textsuperscript{a}\textsuperscript{*}, Fanglong Yuan\textsuperscript{c}, Xiaopeng Zheng\textsuperscript{a}, Mingming Jiang\textsuperscript{e}, Long Zhang\textsuperscript{a}\textsuperscript{*}

\textsuperscript{a}Key Laboratory of Materials for High-Power Laser, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, 201800, China. \textsuperscript{b}Center of Materials Science and Optoelectronics Engineering, University of Chinese Academy of Sciences, Beijing 100049, China. \textsuperscript{c}Department of Electrical and Computer Engineering, University of Toronto, 35 St George Street, Toronto, Ontario M5S 1A4, Canada. \textsuperscript{d}Division of Physical Sciences and Engineering, King Abdullah University of Science and Technology (KAUST), Thuwal 23955-6900, Kingdom of Saudi Arabia. \textsuperscript{e}College of Science, Nanjing University of Aeronautics and Astronautics, Nanjing, 210016, China. C. Zhou and J. Yu contributed equally to this work.

\textsuperscript{*}Correspondence and requests for materials should be addressed to H. D. (email: hongxingd@siom.ac.cn) or to L. Z. (email: lzhang@siom.ac.cn).
Fig. S1. Structure characterization of CsPb(Br_{0.5}I_{0.5})_3 CQDs/ZnO composite microcavity. a,b SEM images of pure ZnO microrods and CsPb(Br_{0.5}I_{0.5})_3 CQDs/ZnO composite microcavity. c-h, EDS element mapping for CsPb(Br_{0.5}I_{0.5})_3 CQDs/ZnO composite microcavity, showing that CQDs are on the microcavity.
Fig. S2. PL spectra of pure ZnO, pure CsPb(Br$_{0.5}$I$_{0.5}$)$_3$ CQDs and their composite. The PL peak of CsPb(Br$_{0.5}$I$_{0.5}$)$_3$ CQDs is slightly blue shifted.
Fig. S3. SEM image of ZnO particles. These particles have regular shape which guarantee the application of microcavity. Inset: magnified image of an individual ZnO particles.
Fig. S4. Lasing in a CsPb(\(\text{Br}_{0.5}\text{I}_{0.5}\))\(_3\) CQDs/ZnO particle composite microcavity. a, PL spectra of pure ZnO particle, pure CsPb(\(\text{Br}_{0.5}\text{I}_{0.5}\))\(_3\) CQDs and their composite. b, Power dependent lasing from a single CsPb(\(\text{Br}_{0.5}\text{I}_{0.5}\))\(_3\) CQDs/ZnO particle composite microcavity. c, Integrated emission Intensity as a function of pump density showing lasing threshold at 0.1 µJ.cm\(^{-2}\). d, Lorentz fitting of a lasing oscillation mode. The corresponding FWHM is \(~0.17\) nm, and the \(Q\) factor is \(~3700\).
Fig. S5. Excitation power-dependent lasing from a single CsPb(Br_{0.5}I_{0.5})_3 CQDs/ZnO composite microcavity with CQDs of 5mg/ml (a) and 15mg/ml concentration (b).
Fig. S6. The resonant optical modes of ZnO microrods/CsPb(Br$_{0.5}$I$_{0.5}$)$_3$ CQDs with different ZnO sizes.
