**Table S1.** Atomic coordinates and atomic occupancy of the obtained from Rietveld refinement X-ray powder diffraction patterns ( $\lambda_{\text{Cu}} = 1.5418 \text{ \AA}$ ) of the  $\text{Cu}(M;\text{Sn})_2\text{S}_4$  ( $M = \text{Co}, \text{Ti}$  and  $\text{Cr}$ ) sample after Spark Plasma Sintering at room temperature \*These values have been fixed due to too close Z values of metallic atoms and due to the resolution limit of the XRD Rietveld analysis.
