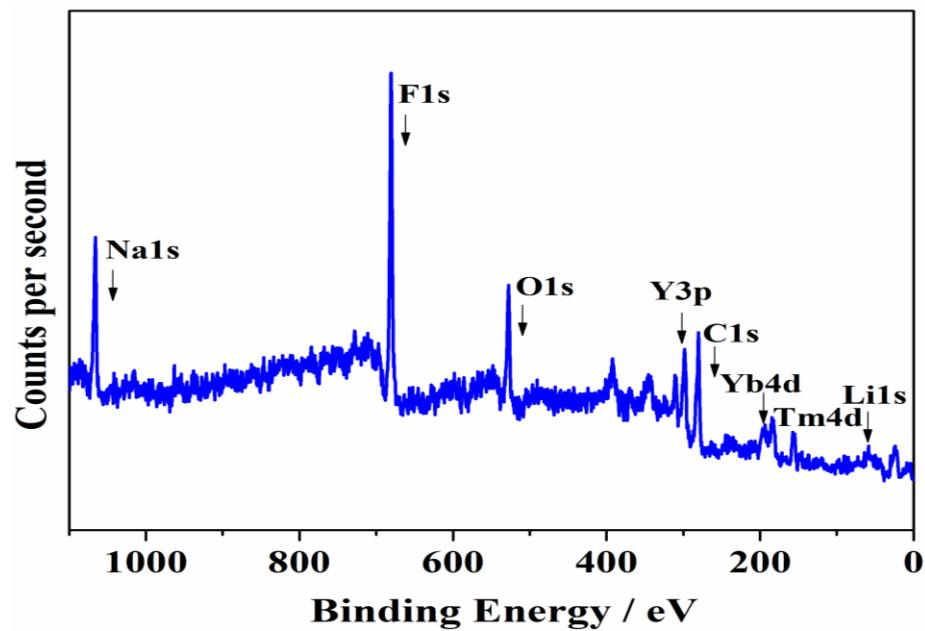

**Figure S6:** The average particle size distribution of different samples from TL series.

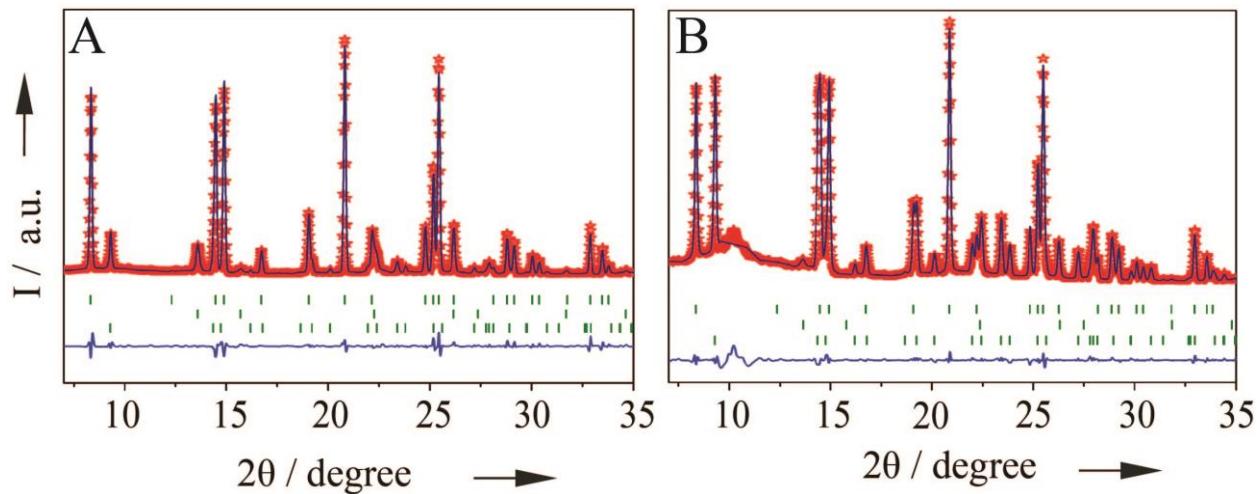

**Figure S7:** HRTEM and SAED pattern of selected samples from EL and TL series.

**Figure S8:** XPS spectra of oleic acid capped EL-5 and the cumulative peak fit of the constituent elements.

**Figure S9:** XPS spectra of TL-9.

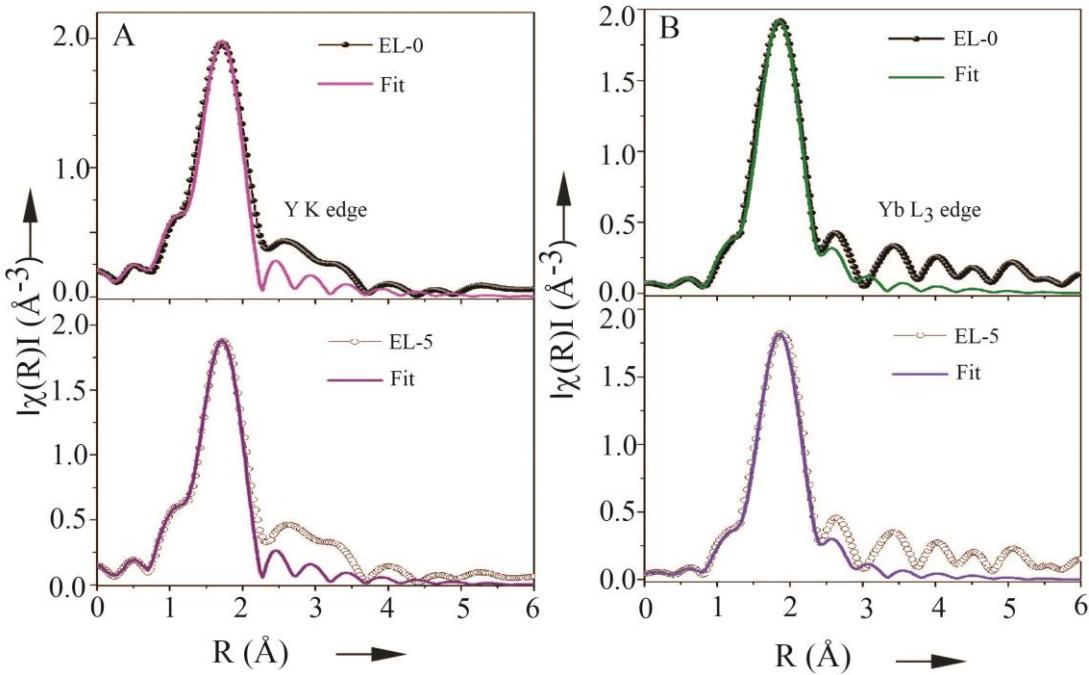

**Figure S10:** Rietveld refinement plots of (A) EL-1 and (B) EL-7.

**Table S2:** Atomic coordinates of  $P\bar{6}$  space group and Interstitial void position used for Rietveld refinement.

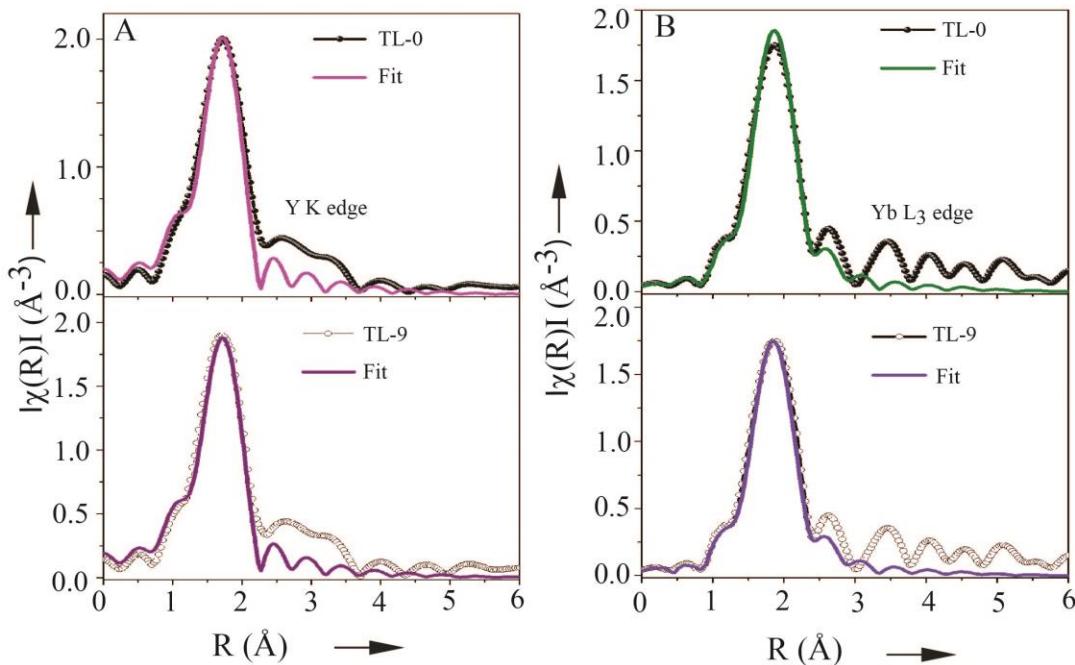

| Elements | x       | y       | z       | Site |
|----------|---------|---------|---------|------|
| Y1       | 0.00000 | 0.00000 | 0.00000 | 1a   |
| Y2       | 0.66667 | 0.33333 | 0.50000 | 1f   |
| Na1      | 0.66667 | 0.33333 | 0.50000 | 1f   |
| Na2      | 0.33333 | 0.66667 | 0.62925 | 2h   |
| F1       | 0.61300 | 0.07600 | 0.00000 | 3j   |
| F2       | 0.68700 | 0.73863 | 0.50000 | 3k   |

Interstitial Void Position (Tetrahedral and Octahedral)

| HCP Voids   | x       | y       | z       |
|-------------|---------|---------|---------|
|             | 0.00000 | 0.00000 | 0.37500 |
| Tetrahedral | 0.00000 | 0.00000 | 0.62500 |
|             | 0.66666 | 0.33333 | 0.12500 |
|             | 0.66666 | 0.33333 | 0.87500 |
| Octahedral  | 0.33333 | 0.66666 | 0.25000 |
|             | 0.33333 | 0.66666 | 0.75000 |

**Figure S11:** The Fourier Transform (FT) of  $k^2$ -weighted  $\chi(k)$  spectra of EL-0 and EL-5 samples (A) at Y K and, (B) Yb L<sub>3</sub> edges, respectively.

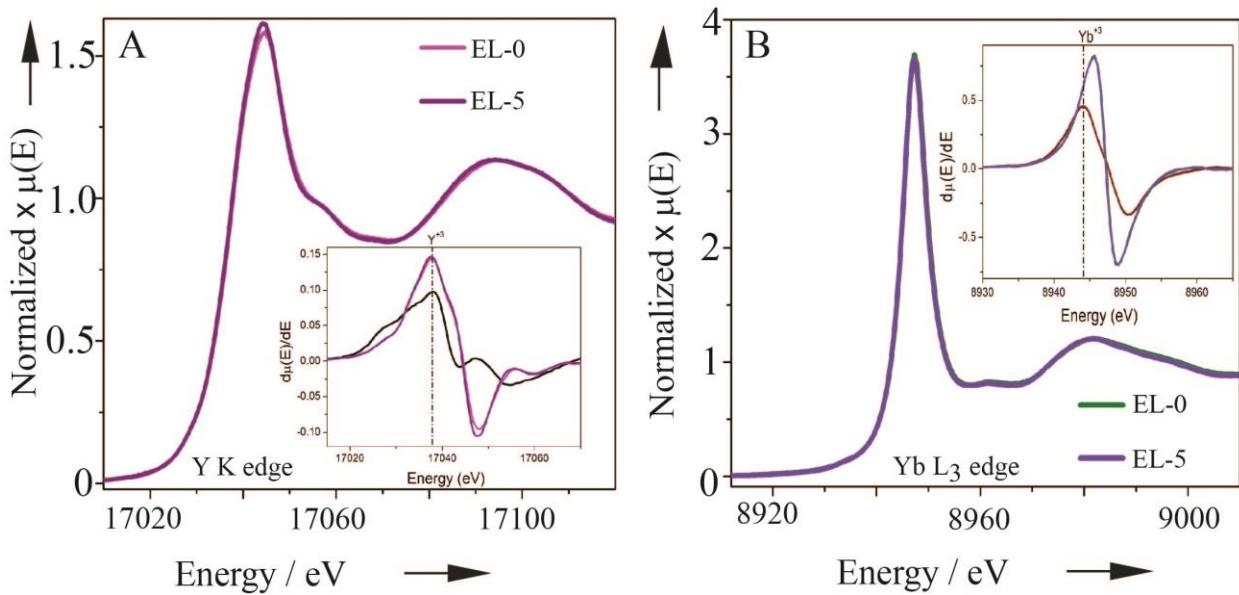

**Figure S12:** The Fourier Transform (FT) of  $k^2$ -weighted  $\chi(k)$  spectra of TL-0 and TL-9 samples (A) at Y K and, (B) Yb L<sub>3</sub> edges, respectively.

**Table S3:** From the Er L<sub>3</sub>, Y K and Yb L<sub>3</sub>-edges EXAFS data fitting, we have obtained variation of CN (co-ordination number),  $R$  (bond distance) and  $\sigma^2$  (Debye-Waller factor). The numbers in parentheses indicate the uncertainty in the last digit.

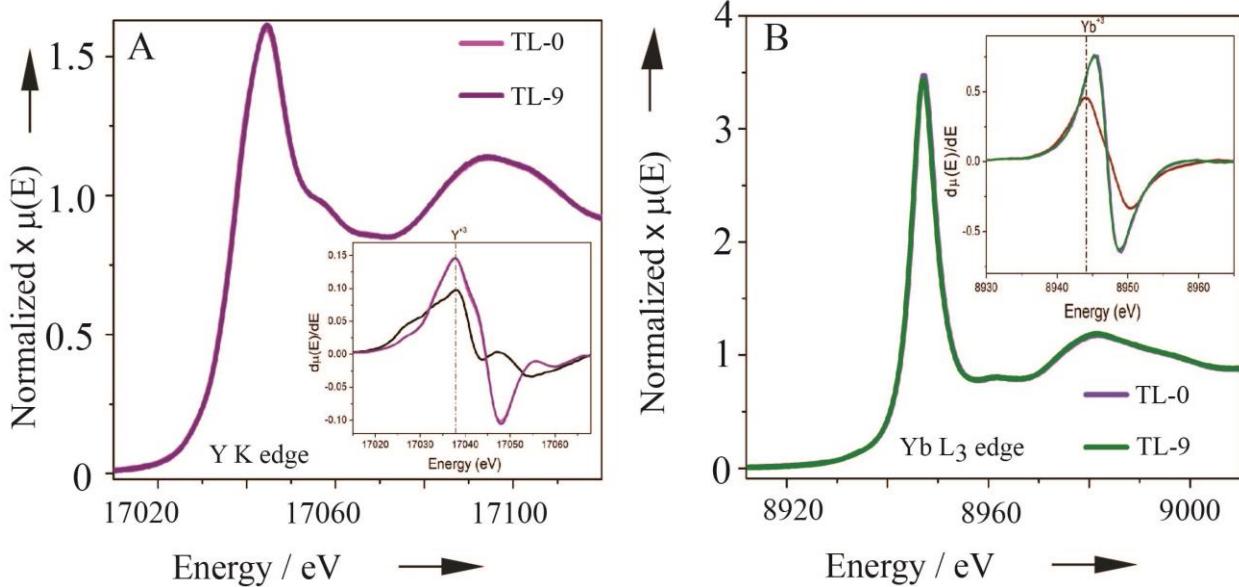

|        | Er L <sub>3</sub> -edge |                               |  | Y K-edge          |                              |                                       | Yb L <sub>3</sub> -edge |                               |  |
|--------|-------------------------|-------------------------------|--|-------------------|------------------------------|---------------------------------------|-------------------------|-------------------------------|--|
| Sample | CN <sub>Er-F</sub>      | $R_{\text{Er-F}}(\text{\AA})$ | $\sigma^2_{\text{Er-F}}(\text{\AA}^2)$ | CN <sub>Y-F</sub> | $R_{\text{Y-F}}(\text{\AA})$ | $\sigma^2_{\text{Y-F}}(\text{\AA}^2)$ | CN <sub>Yb-F</sub>      | $R_{\text{Yb-F}}(\text{\AA})$ | $\sigma^2_{\text{Yb-F}}(\text{\AA}^2)$ |
| EL-0   | 9.0(2)                  | 2.289 (3)                     | 0.0026 (3)                             | 8.9(2)            | 2.295(2)                     | 0.0038(3)                             | 9.0(2)                  | 2.275(3)                      | 0.0057(3)                              |

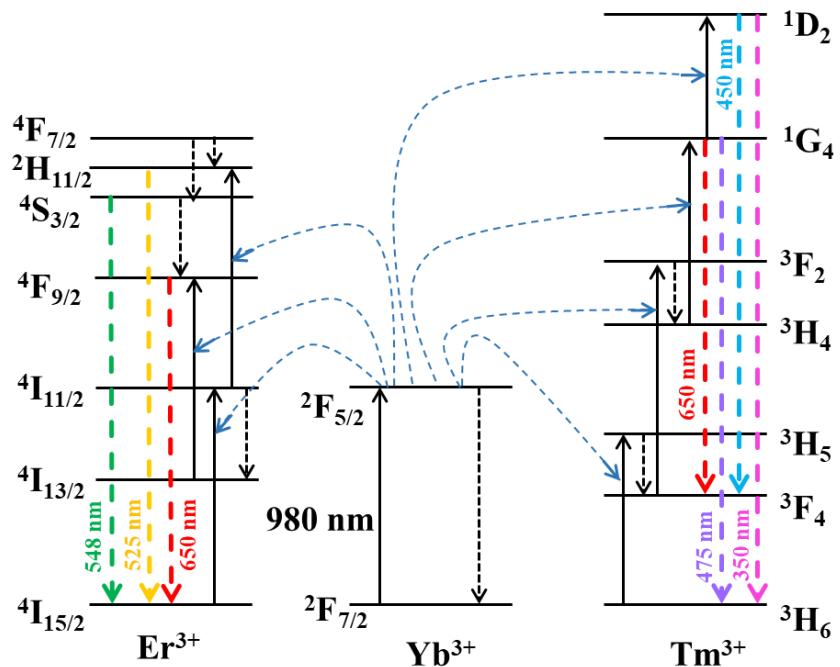

**Figure S13:** The normalized XANES spectra of EL-0 and EL-5 samples (A) at Y K and (B) Yb L<sub>3</sub> edges, respectively. The inset shows 1st derivative of EL-0 and EL-5 samples along with the reference's oxide (+3 state).

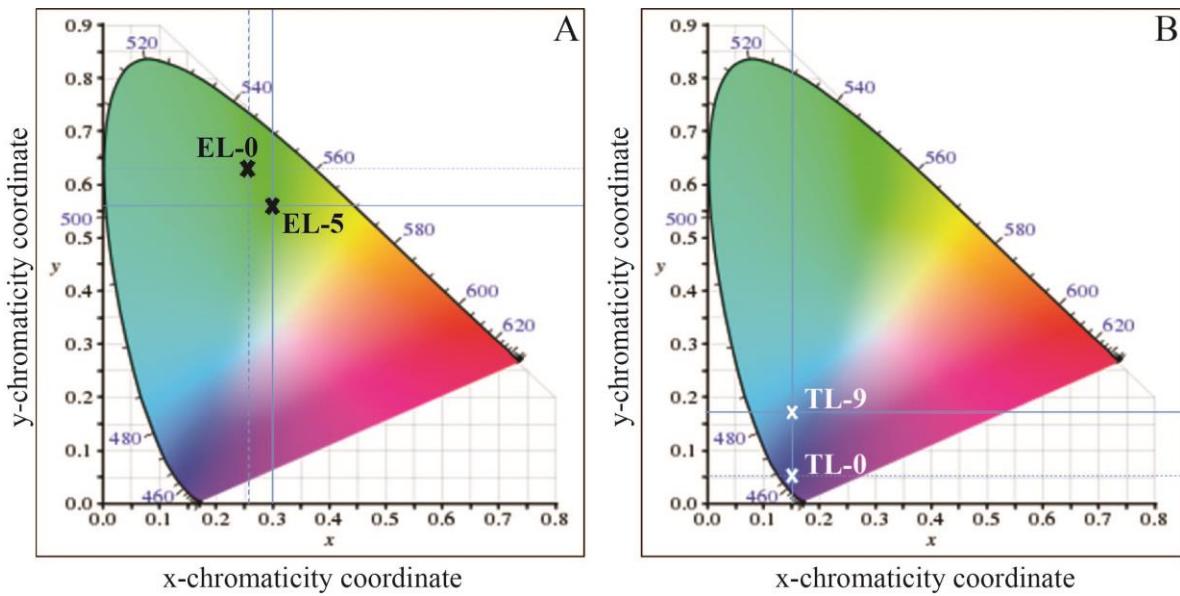

**Figure S14:** The normalized XANES spectra of TL-0 and TL-9 samples (A) at Y K and (B) Yb L<sub>3</sub> edges, respectively. The inset shows 1st derivative of TL-0 and TL-9 samples along with the reference's oxide (+3 state).

**Figure S15:** FTIR and Raman spectra of selected samples from EL series.

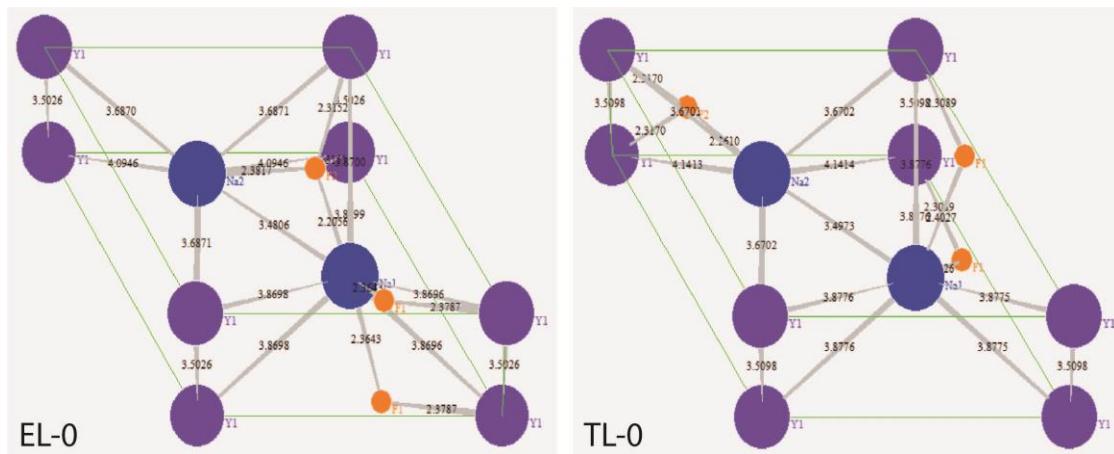

**Figure S16:** Proposed energy transfer mechanism for  $\text{Er}^{3+}$ ,  $\text{Tm}^{3+}$  and  $\text{Yb}^{3+}$  doped crystals under 980 nm laser excitation. The plane black, blue-dashed, dashed, and coloured dashed arrows represents photon excitation, energy transfer, multiphonon relaxation, and emission processes, respectively.

**Figure S17:** CIE plots of  $\text{Li}^+$ -free and  $\text{Li}^+$ -incorporated samples from (A) EL and (B) TL series.

**Table S5:** Strain values for different samples of EL and TL series obtained from Williamson-Hall analysis.

| Sample | Strain ( $\times 10^{-4}$ ) | Sample | Strain ( $\times 10^{-4}$ ) |
|--------|-----------------------------|--------|-----------------------------|
| EL-1   | 8.257                       | TL-3   | 29.6                        |
| EL-5   | 3.701                       | TL-9   | 4.359                       |
| EL-7   | 39.90                       | TL-13  | 20.0                        |

**Figure S18:** Crystal structures of EL-0 and TL-0 along with bond distances obtained using Powder Cell software.

**Table S6:** Bond distances and bond angles between different atoms in the crystal structure of samples from EL series.

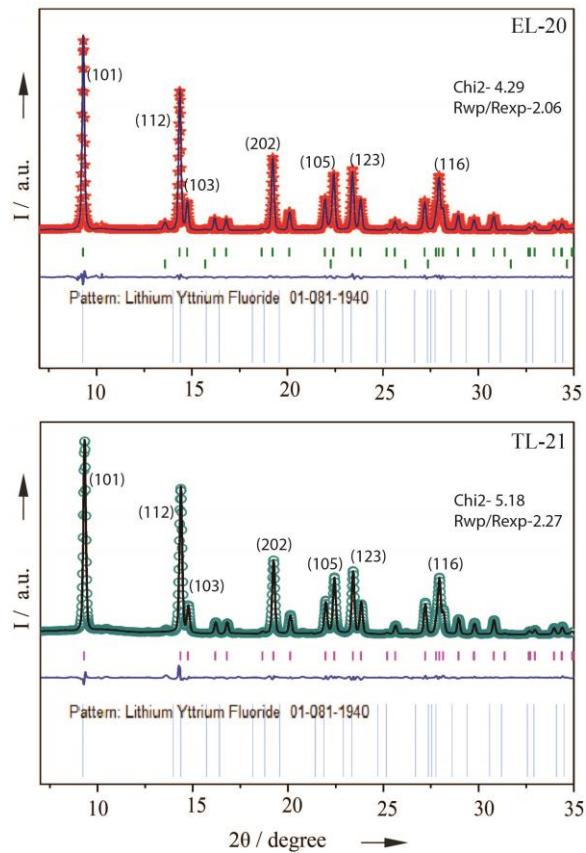

| Sample | *Y1-Na1 (Å) | Y1-F1 (Å) | Na2-Y1-F2 (°) | Na2-Y1-Na1 (°) |
|--------|-------------|-----------|---------------|----------------|
| EL-0   | 3.8698      | 2.3787    | 29.7937       | 54.7852        |
| EL-1   | 3.8815      | 2.328     | 25.8903       | 51.5834        |
| EL-5   | 3.8745      | 2.3614    | 25.5095       | 51.6996        |
| EL-7   | 3.8729      | 2.2765    | 34.7643       | 51.6558        |
| EL-13  | 3.8734      | 2.4143    | 37.5627       | 51.634         |

\*Yb<sup>3+</sup>/RE<sup>3+</sup> occupies the same position as Y1

**Table S7:** Bond distances and bond angles between different atoms in the crystal structure of samples from TL series.

| Sample | *Y1-Na1 (Å) | Y1-F1 (Å) | Na2-Y1-F2 (°) | Na2-Y1-Na1 (°) |
|--------|-------------|-----------|---------------|----------------|
| TL-0   | 3.8776      | 2.3089    | 36.191        | 51.5858        |
| TL-0.3 | 3.8702      | 2.258     | 32.8517       | 51.8006        |
| TL-3   | 3.8815      | 2.4688    | 25.7563       | 51.4274        |
| TL-9   | 3.8753      | 2.371     | 35.687        | 51.7424        |
| EL-13  | 3.8763      | 2.3412    | 35.0301       | 51.9103        |

\*Yb<sup>3+</sup>/RE<sup>3+</sup> occupies the same position as Y1
