Fig. S19 EI-MS(+) molecular peak of **[Pt(^{tBu}L)]** and calculated isotopic pattern.
Fig. S20 IR spectra of **[Ni(L)]**, **[Pd(L)]**, and **[Pt(L)]**.
Fig. S21 IR spectra of **[Ni(^{tBu}L)]**, **[Pd(^{tBu}L)]**, and **[Pt(^{tBu}L)]**.
Fig. S22 Optimised structures and selected bond lengths of the complexes **[M(L)]** with M = Ni, Pd, and Pt.
Fig. S23 Optimised structures and selected bond lengths of the protoligands **H₂L** and **H₂^{tBu}L**.
Fig. S24 UV-vis absorption spectra of **H₂^{tBu}L** and the complexes **[M(^{tBu}L)]** (M = Pt, Pd, and Ni).
Fig. S25 TD-DFT calculated optical spectrum of **[Pd(L)]**; verticals: transitions.
Fig. S26 TD-DFT calculated optical spectrum of **[Pt(L)]**; verticals: transitions.
Fig. S27 TD-DFT calculated optical spectrum of **[Ni(^{tBu}L)]**; verticals: transitions.
Fig. S28 TD-DFT calculated optical spectrum of **[Pd(^{tBu}L)]**; verticals: transitions.
Fig. S29 TD-DFT calculated optical spectrum of **[Pt(^{tBu}L)]**; verticals: transitions.
Fig. S30 Cyclic voltammograms of **H₂L** and **[Ni(L)]** in 0.1 M *n*-Bu₄NPF₆ MeCN solution.
Fig. S31 Cyclic voltammograms of **[Pd(L)]** and **[Pt(L)]** in 0.1 M *n*-Bu₄NPF₆ MeCN solution.
Fig. S32 Cyclic voltammograms of **H₂^{tBu}L** and **[Ni(^{tBu}L)]** in 0.1 M *n*-Bu₄NPF₆ MeCN solution.
Fig. S33 Cyclic voltammograms of **[Pd(^{tBu}L)]** and **[Pt(^{tBu}L)]** in 0.1 M *n*-Bu₄NPF₆ MeCN solution.
Fig. S34 UV-vis absorption spectra recorded during electrolysis of **HL** in 0.1 M *n*-Bu₄NPF₆ MeCN solution.
Fig. S35 UV-vis absorption spectra recorded during electrolysis of **[Ni(L)]** in 0.1 M *n*-Bu₄NPF₆ MeCN.
Fig. S36 UV-vis absorption spectra recorded during electrolysis of **[Pd(L)]** in 0.1 M *n*-Bu₄NPF₆ MeCN.
Fig. S37 UV-vis absorption spectra recorded during electrolysis of **[Pt(L)]** in 0.1 M *n*-Bu₄NPF₆ MeCN.
Fig. S38 UV-vis absorption spectra recorded during electrolysis of **H₂^{tBu}L** in 0.1 M *n*-Bu₄NPF₆ MeCN.
Fig. S39 UV-vis absorption spectra recorded during electrolysis of **[Ni(^{tBu}L)]** in 0.1 M *n*-Bu₄NPF₆ MeCN.
Fig. S40 UV-vis absorption spectra recorded during electrolysis of **[Pd(^{tBu}L)]** in 0.1 M *n*-Bu₄NPF₆ MeCN.
Fig. S41 UV-vis absorption spectra recorded during electrolysis of **[Pt(^{tBu}L)]** in 0.1 M *n*-Bu₄NPF₆ MeCN.

Supporting Tables

Table S1 Selected DFT calculated structural parameters of the reference Ni(II) complexes **B** and **F**; data in parentheses from single-crystal X-ray crystallography.

Table S2 Computed metrics of the complexes $[M^{(tBu)L}]$ ($M = Ni, Pd, Pt$) and the reference complex **F**.

Table S3 Selected DFT calculated structural parameters of $[M(L)]$ and $[M^{(tBu)L}]$ ($M = Ni, Pd$ or Pt).

Table S4 Absorption maxima of the protoligands H_2L and $H_2^{tBu}L$ and the complexes $[M(L)]$ and $[M^{(tBu)L}]$ ($M = Ni, Pd, Pt$)

Table S5 (six tables) TD-DFT calculated absorptions of $[M(L)]$ and $[M^{(tBu)L}]$ $M = Ni, Pd, Pt$.

Table S6 Selected electrochemical data of the protoligands H_2L and $H_2^{tBu}L$ and the complexes $[M(L)]$ and $[M^{(tBu)L}]$ ($M = Ni, Pd, Pt$).

Supporting Figures:

Fig. S1 400 MHz 1H NMR spectra of **HL** and starting materials in $CDCl_3$. The imine proton is marked in orange, the amine proton is marked in green and the proton at the chiral carbon atom is marked in blue.

Fig. S2 EI-MS(+) of H_2L .

Fig. S3 HR-ESI-MS(+) of $H_2^{tBu}L$.

Fig. S4 400 MHz ^1H NMR spectra of $[\text{Ni}(\text{L})]$ (red), $[\text{Pd}(\text{L})]$ (green) and $[\text{Pt}(\text{L})]$ (blue) in $\text{DMSO-}d_6$.

Fig. S5 400 MHz ^1H NMR spectra of $[\text{Ni}(\text{L})]$ (blue), $[\text{Pd}(\text{L})]$ (green), and $[\text{Pt}(\text{L})]$ (red) in CDCl_3 .

Fig. S6 300 MHz ¹H NMR spectra of [Ni(tBuL)], [Pd(tBuL)], and [Pt(tBuL)] in CDCl₃.

Fig. S7 HR-ESI-MS(+) of [Ni(L)].

Fig. S8 Part of HR-ESI-MS(+) of [Ni(L)] showing [M+H]⁺ (433 m/z) and [M+Na]⁺ (455 m/z).

Fig. S9 EI-MS(+) of [Pd(L)].

Fig. S10 Part of EI-MS(+) of **[Pd(L)]**.

Fig. S11 EI-MS(+) molecular peak of **[Pd(L)]** (top) representing $[M]^+$ (480 m/z) and $[M-CH_3]^+$ (465 m/z) and calculated isotopic pattern for $[M]^+$ (bottom).

Fig. S12 EI-MS(+) of [Pt(L)].

Fig. S13 EI-MS(+) molecular peaks of **[Pt(L)]** (top) representing $[M]^+$ at 569 m/z and calculated isotopic pattern (bottom).

Fig. S14 EI-MS(+) of $[\text{Ni}(\text{tBuL})]$.

Fig. S15 EI-MS(+) molecular peaks of $[\text{Ni}(\text{tBuL})]$ (top), representing $[\text{M}]^+$ (544 m/z) and $[\text{M}-\text{CH}_3]^+$ (529 m/z) and calculated isotopic pattern of $[\text{M}]^+$ (bottom).

Fig. S16 EI-MS(+) of [Pd(tBuL)].

Fig. S17 EI-MS(+) molecular peaks of **[Pd^(tBuL)]** (top) representing $[M]^+$ (592 m/z) and $[M-CH_3]^+$ (577 m/z) and calculated isotopic pattern of $[M-CH_3]^+$.

Fig. S18 EI-MS(+) of [Pt(^tBuL)].

Fig. S19 EI-MS(+) molecular peak of $[\text{Pt}(\text{tBuL})]$ representing $[\text{M}]^+$ (544 m/z) and $[\text{M}-\text{CH}_3]^+$ (529 m/z) and calculated isotopic pattern for $[\text{M}-\text{CH}_3]^+$ (bottom).

Fig. S20 IR spectra of [Ni(L)] (red), [Pd(L)] (blue), and [Pt(L)] (black).

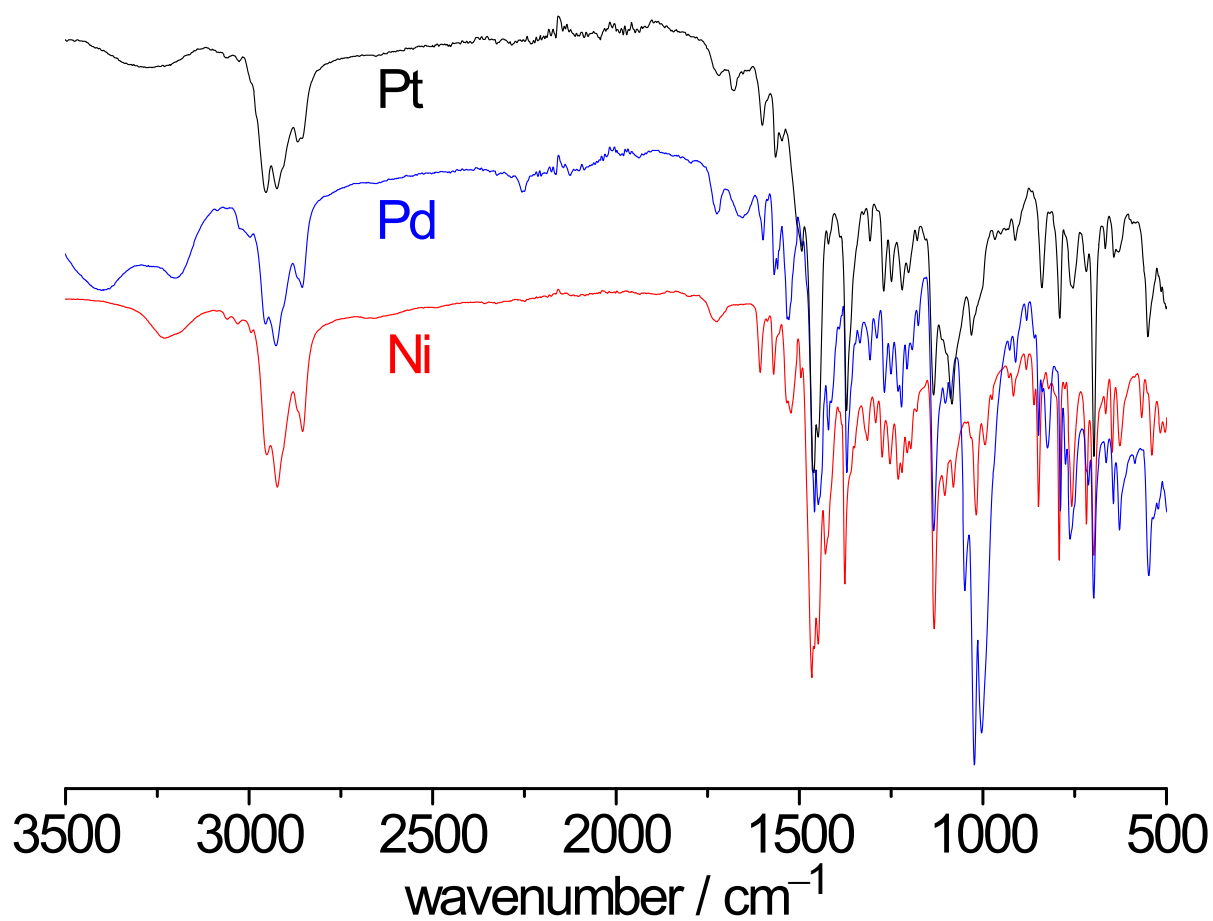

Fig. S21 IR spectra of [Ni(^tBuL)] (red), [Pd(^tBuL)] (blue), and [Pt(^tBuL)] (black).

Fig. S22 Optimised structures and selected bond lengths of the complexes [M(L)] with M = Ni (a), Pd (b) and Pt (c).

Fig. S23 Optimised structures and selected bond lengths of the protoligands H_2L (a) and $H_2^{tBu}L$ (b).

Fig. S24 UV-vis absorption spectra of $H_2^{tBu}L$ and the complexes $[M(^{tBu}L)]$ ($M = Pt$ (red trace), Pd (orange) and Ni (brown)).

Fig. S25 TD-DFT calculated optical spectrum of [Pd(L)]; verticals: transitions. Inset: Difference densities of selected transitions.

Fig. S26 TD-DFT calculated optical spectrum of [Pt(L)]; verticals: transitions. Inset: Difference densities of selected transitions.

Fig. S27 TD-DFT calculated optical spectrum of $[\text{Ni}(\text{tBuL})]$; verticals: transitions. Inset: Difference densities of selected transitions.

Fig. S28 TD-DFT calculated optical spectrum of $[\text{Pd}(\text{tBuL})]$; verticals: transitions. Inset: Difference densities of selected transitions.

Fig. S29 TD-DFT calculated optical spectrum of $[\text{Pt}(\text{tBuL})]$; verticals: transitions. Inset: Difference densities of selected transitions.

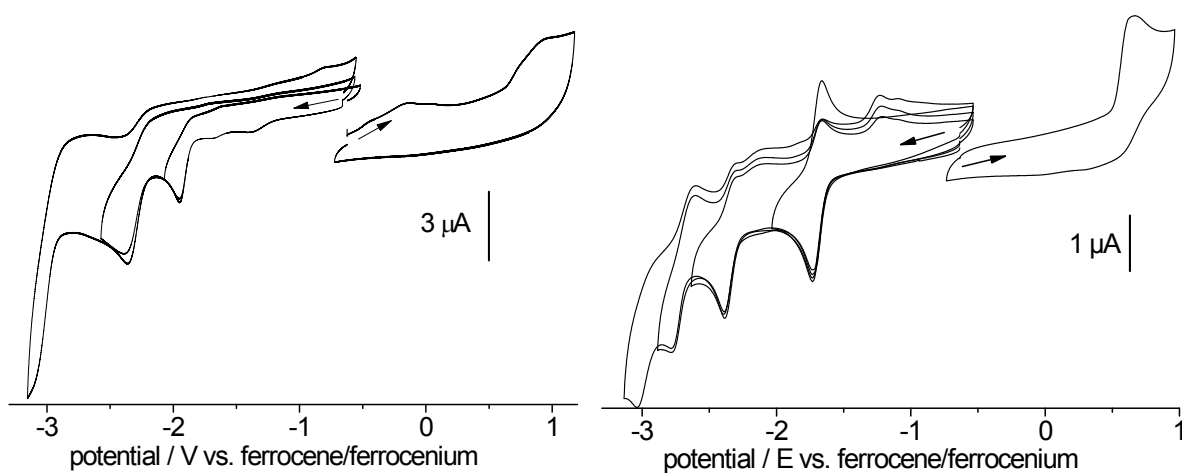

Fig S30 Cyclic voltammograms of H_2L (left) and $[\text{Ni}(\text{L})]$ (right) in 0.1 M $n\text{Bu}_4\text{NPF}_6$ MeCN solution.

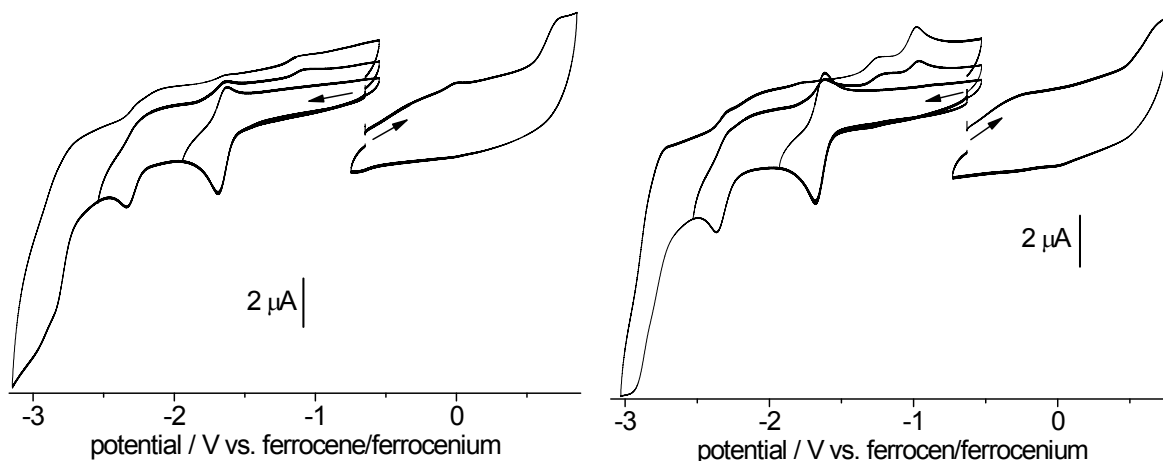

Fig. S31 Cyclic voltammograms of $[\text{Pd}(\text{L})]$ (left) and $[\text{Pt}(\text{L})]$ (right) in 0.1 M $n\text{-Bu}_4\text{NPF}_6$ MeCN solution.

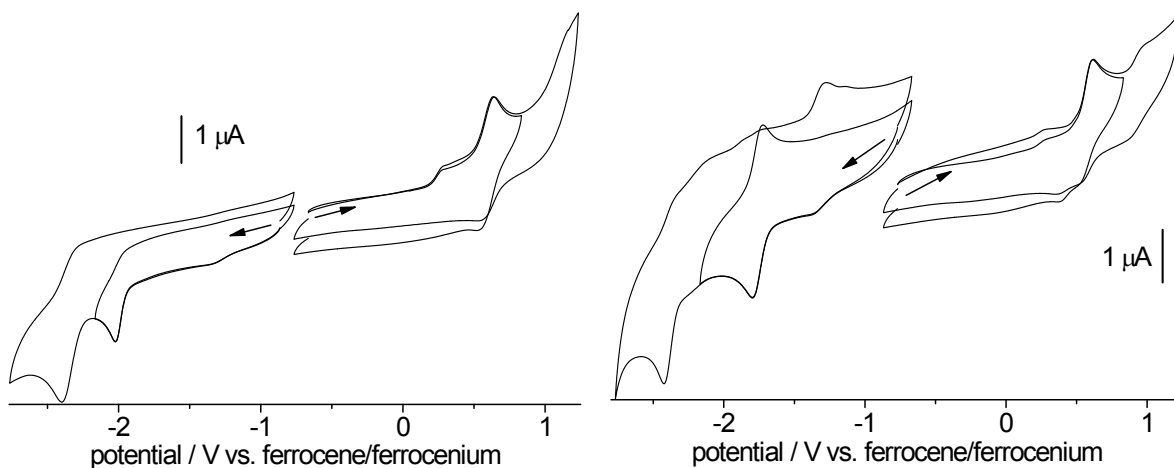

Fig. S32 Cyclic voltammograms of H_2^{tBuL} (left) and $[\text{Ni}^{\text{tBuL}}]$ (right) in 0.1 M $n\text{-Bu}_4\text{NPF}_6$ MeCN solution.

Fig. S33 Cyclic voltammograms of $[\text{Pd}^{\text{tBuL}}]$ (left) and $[\text{Pt}^{\text{tBuL}}]$ (right) in 0.1 M $n\text{-Bu}_4\text{NPF}_6$ MeCN solution.

Fig. S34 UV-vis absorption spectra recorded during electrolysis of **HL** in 0.1 M $n\text{-Bu}_4\text{NPF}_6$ MeCN solution; left: oxidation; right: reductions.

Fig. S35 UV-vis absorption spectra recorded during electrolysis of **[Ni(L)]** in 0.1 M *n*-Bu₄NPF₆ MeCN solution; left: oxidation; right: reductions.

Fig. S36 UV-vis absorption spectra recorded during electrolysis of **[Pd(L)]** in 0.1 M *n*-Bu₄NPF₆ MeCN solution; left: oxidation; right: reductions.

Fig. S37 UV-vis absorption spectra recorded during electrolysis of **[Pt(L)]** in 0.1 M *n*-Bu₄NPF₆ MeCN solution; left: oxidation; right: reductions.

Fig. S38 UV-vis absorption spectra recorded during electrolysis of H_2^{tBuL} in $0.1 \text{ M } n\text{-Bu}_4\text{NPF}_6$ MeCN solution; left: oxidation; right: reductions.

Fig. S39 UV-vis absorption spectra recorded during electrolysis of $[\text{Ni}(\text{tBuL})]$ in $0.1 \text{ M } n\text{-Bu}_4\text{NPF}_6$ MeCN solution; left: oxidation; right: reductions.

Fig. S40 UV-vis absorption spectra recorded during electrolysis of $[\text{Pd}(\text{tBuL})]$ in $0.1 \text{ M } n\text{-Bu}_4\text{NPF}_6$ MeCN solution; left: oxidation; right: reductions.

Fig. S41 UV-vis absorption spectra recorded during electrolysis of $[\text{Pt}(\text{tBuL})]$ in 0.1 M $n\text{-Bu}_4\text{NPF}_6$ MeCN solution; left: oxidation; right: reductions.
