Table S3: Seasonal yearly trends for same parameters as in table S1 calculated by RLM method with 90% confidence interval (first and second numbers show the 5th and 95th percentiles of the yearly trend slopes obtained from 10 000 bootstrapping iterations, respectively). The first, second and third set of columns for each parameter represent daily, daytime and nighttime values, respectively. All data represent the mean values from the height levels 4.2, 8.4, 16.8, 33.6, 50.4 and 67.2 m. Detailed statistical methods are explained in Section 2.3.

30

31 Figure S1: NO₂ measurements from 2003-2018 at the SMEAR II

33 Figure S2: Data and trend of selected measured parameters from SMEAR II for the years 2007-2018

34 (CS = condensation sink; Radiation = short wave irradiance).

38 Figure S3: Time series of modelled (red star) and measured (blue circle) monoterpene concentrations
39 from 2007 to 2018. The linear fits of the logarithmic data are plotted as solid lines in the same colour

- $40 \ \ for modelled \ and \ measured \ data. The \ modelled \ data \ points \ are \ plotted \ only \ when \ measured \ data \ are$
- 41 available.

43 Figure S4: One-year running mean of modelled (red) and measured (blue) monoterpene

44 concentrations from 2007 to 2018.

- 47 Figure S5: Diurnal cycle of measured and modelled OH concentrations for two campaigns in 2007
- 48 and 2010, respectively (A and B); scatter plot for all data points during the two campaigns (C).

50 Figure S6: Seasonal medians of daytime OH(A) and CO(B) concentrations in logarithm scale for

55 Figure S7: Mean monthly reactivity in 2007–2018 (and +/- 1 standard deviation for most significant

58 Figure S8: Seasonal medians of the four major daytime OH-reactivity terms for winter (blue), spring

- 59 (orange), summer (green) and autumn (red) from 2007 to 2018: CO (A), monoterpenes (B), higher
- 60 order reactions (C) and NO_2 (D).

63 Figure S9: Diurnal cycle of measured and modelled H₂SO₄ concentrations for years 2016-2018 (A);
64 scatter plot for all data points during the 3 years (B).
