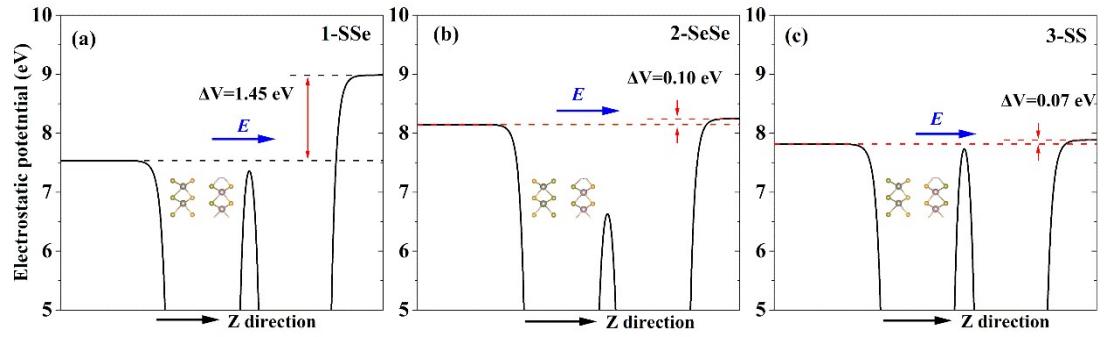

Fig. S1 The macroscopic average electrostatic potential of (a) 1-SSe, (b) 2-SeSe and (a) 3-SS.

2. The band structures of 1-SSe with G_0W_0 results at 0 GPa, 2 GPa and 4 GPa, respectively. The direct band gap and the indirect band gap are indicated as the pressure increases. The dashed line is the energy valley marked for convenience.
