**Figure S1.** (a) Low magnification TEM image of Cu nanowires. (b) TEM image of a single Cu nanowire. (c) Cross-section TEM image of a Cu nanowire. Twin boundaries can be clearly observed. Five twins are marked by T1-T5. (d) The corresponding selected area electron diffraction (SAED).

**Figure S2.** (a) High-resolution atomic image of a Cu nanowire with the  $[0\ 1\ -1]$  zone axis. (b) The corresponding SAED of (a). (c) High-resolution atomic image of a Cu nanowire with the  $[-1\ 1\ 0]$  zone axis. (d) The corresponding SAED of (c). The orientation between electron beam and twin structures is shown in Figure b and d, respectively.

**Figure S3.** (a) Low magnification STEM-HAADF image of Au nanoparticles on a Cu nanowire. (b) High magnification STEM-HAADF image of Au nanoparticles on a Cu nanowire. (c) Lattice fringes of Au nanoparticles and Cu nanowire characterized by STEM-HAADF. (d) Atomic-scale STEM-HAADF image of Au nanoparticle on Cu nanowire.

**Figure S4.** (a) Low magnification TEM image of partially hollowed Cu nanowire with Au nanoparticles. Three locations are marked by red rectangle. (b)-(d) The corresponding SAED to the three locations in (a).

**Figure S5.** (a) Low magnification STEM-HAADF image of hollowed Cu-Au nanotube.

(b)-(d) Atomic-scale STEM-HAADF images of Au nanoparticle on the nanotube.

**Figure S6.** X-ray diffraction of TiO<sub>2</sub> nanoparticles with anatase structure.

**Table S1.** Comparison of photocatalytic hydrogen production based on Au-Cu cocatalysts coupled with TiO<sub>2</sub> photocatalysts. Other kinds of noble-metal cocatalysts are also shown for comparison.

| Co-catalyst                      | Photo-catalyst               | Sacrificial Agent                                                  | Light source      | Reaction temperature (°C) | Production (μmol/g/h) | Reference |
|----------------------------------|------------------------------|--------------------------------------------------------------------|-------------------|---------------------------|-----------------------|-----------|
