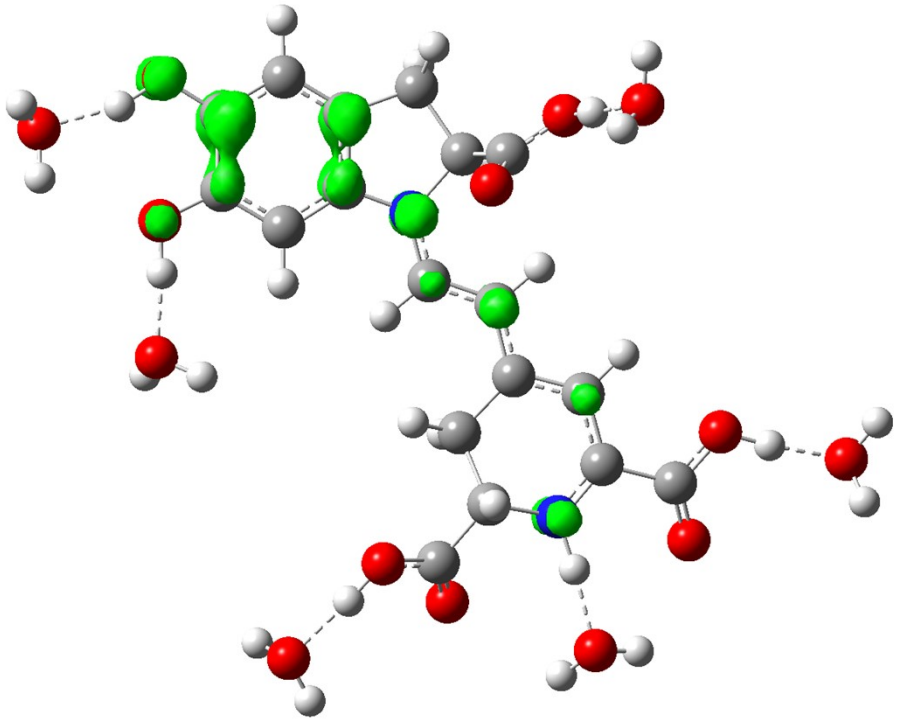

Figure S1. Spin density of 12+. (Isovalue=0.02, density=0.04).

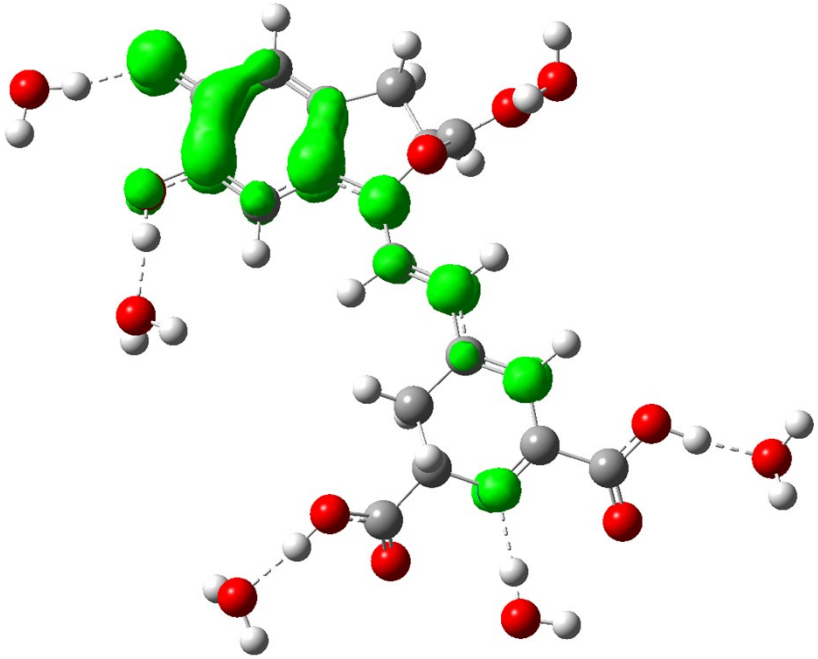

Figure S2. Spin density of **2**. Isovalue=0.02, density=0.04.

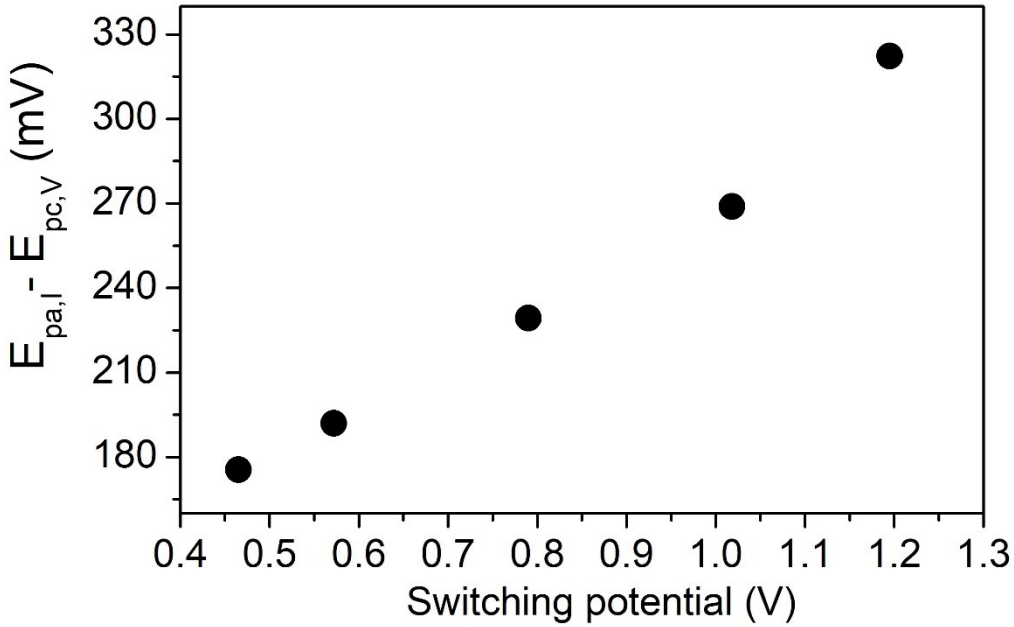

Figure S3. Influence of switching potential on the difference of peak potentials $E_{pa,I}$ and $E_{pc,V}$. Experimental points were extracted from[12] with WebPlotDigitalizer[30].
