Supporting Information

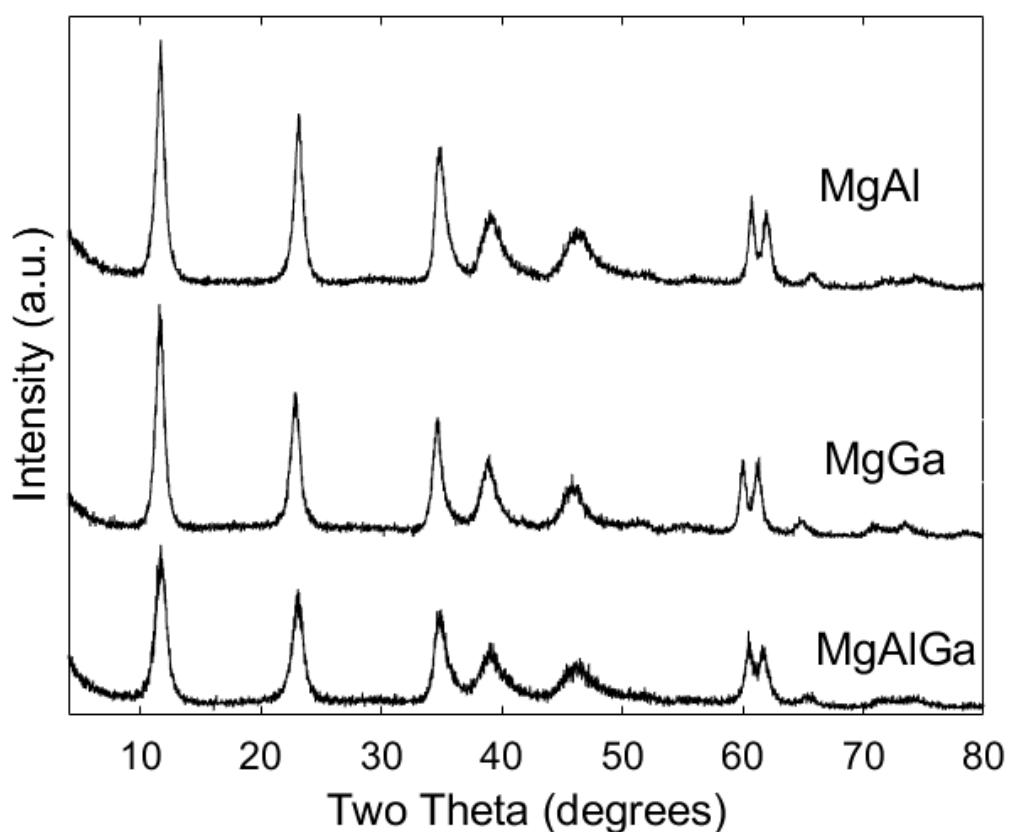

Figure 1S. X-ray diffraction patterns of as-synthesized LDHs

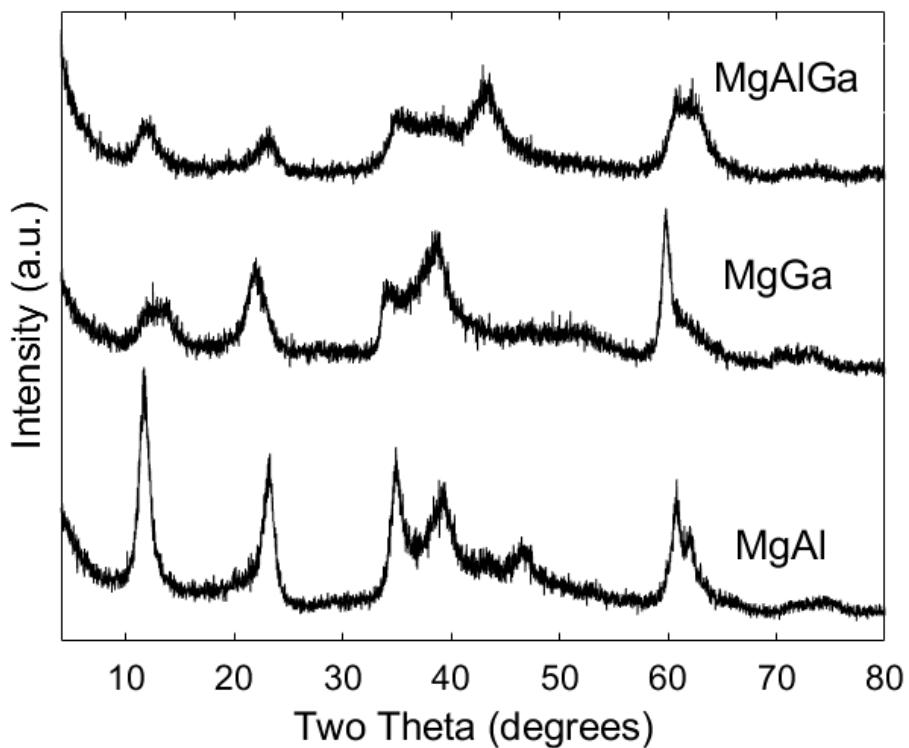

Figure 2S. X-ray diffraction patterns of rehydrated LDH catalysts

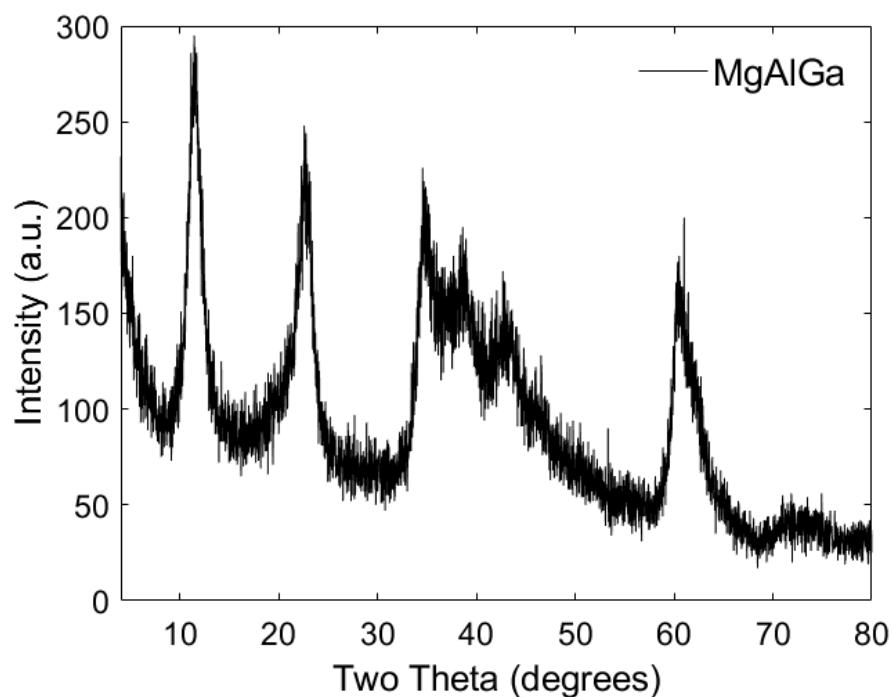

Figure 3S. X-ray diffraction patterns of MgAlGa after the reaction

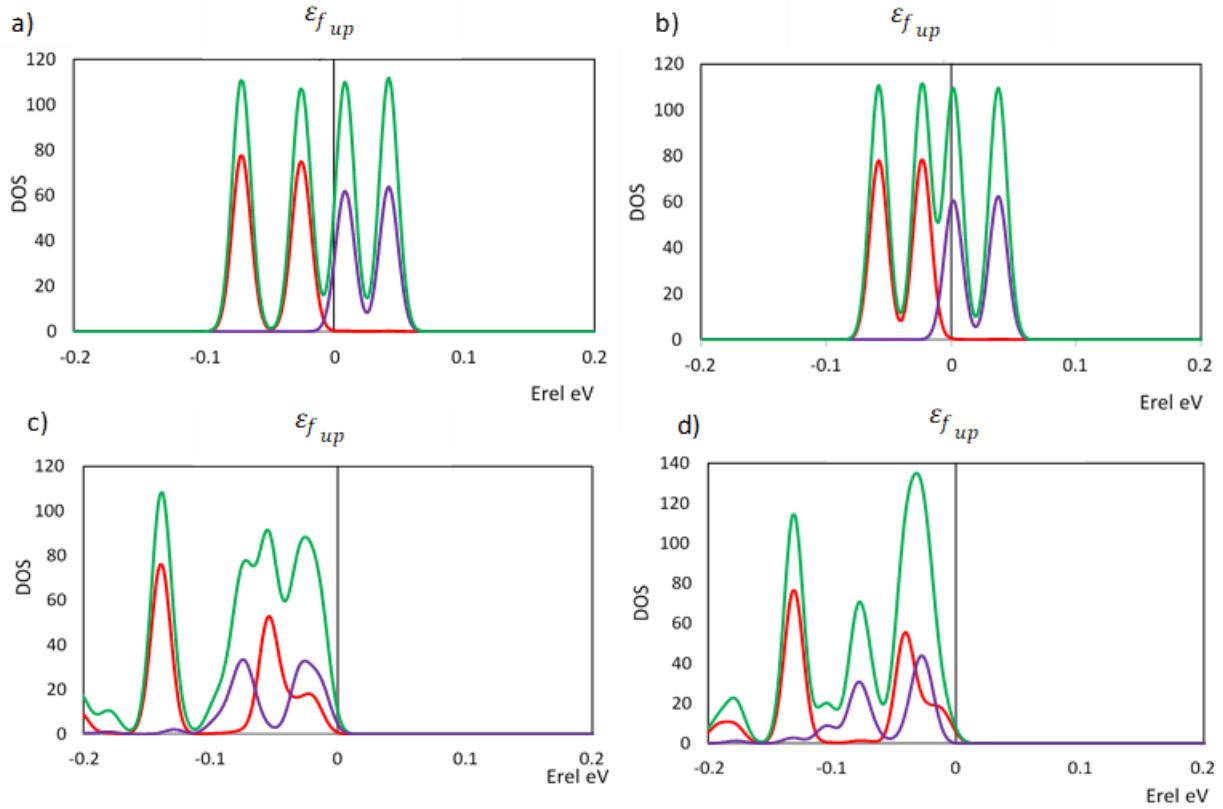

Figure 4S. Plots of DOS for a) MgAl- $\text{OH}_{\text{surf}}/\text{OH}^-$, b) MgGa- $\text{OH}_{\text{surf}}/\text{OH}^-$, c) ZnAl- $\text{OH}_{\text{surf}}/\text{OH}^-$, d) ZnGa- $\text{OH}_{\text{surf}}/\text{OH}^-$. Total DOS is shown in the green line, DOS_{up} for up-surface in red, and pDOS for OH_{inf}^- in purple.
