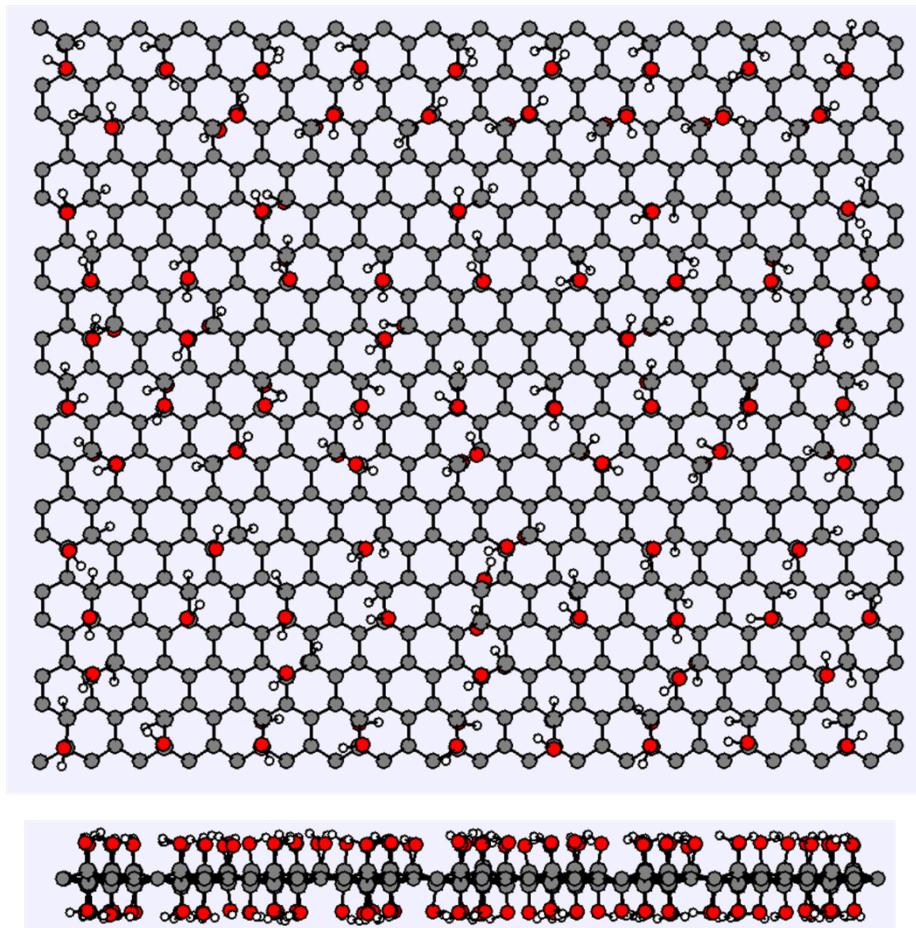

Fig. S1. The snapshots of the GO surface used in the simulations of this work.

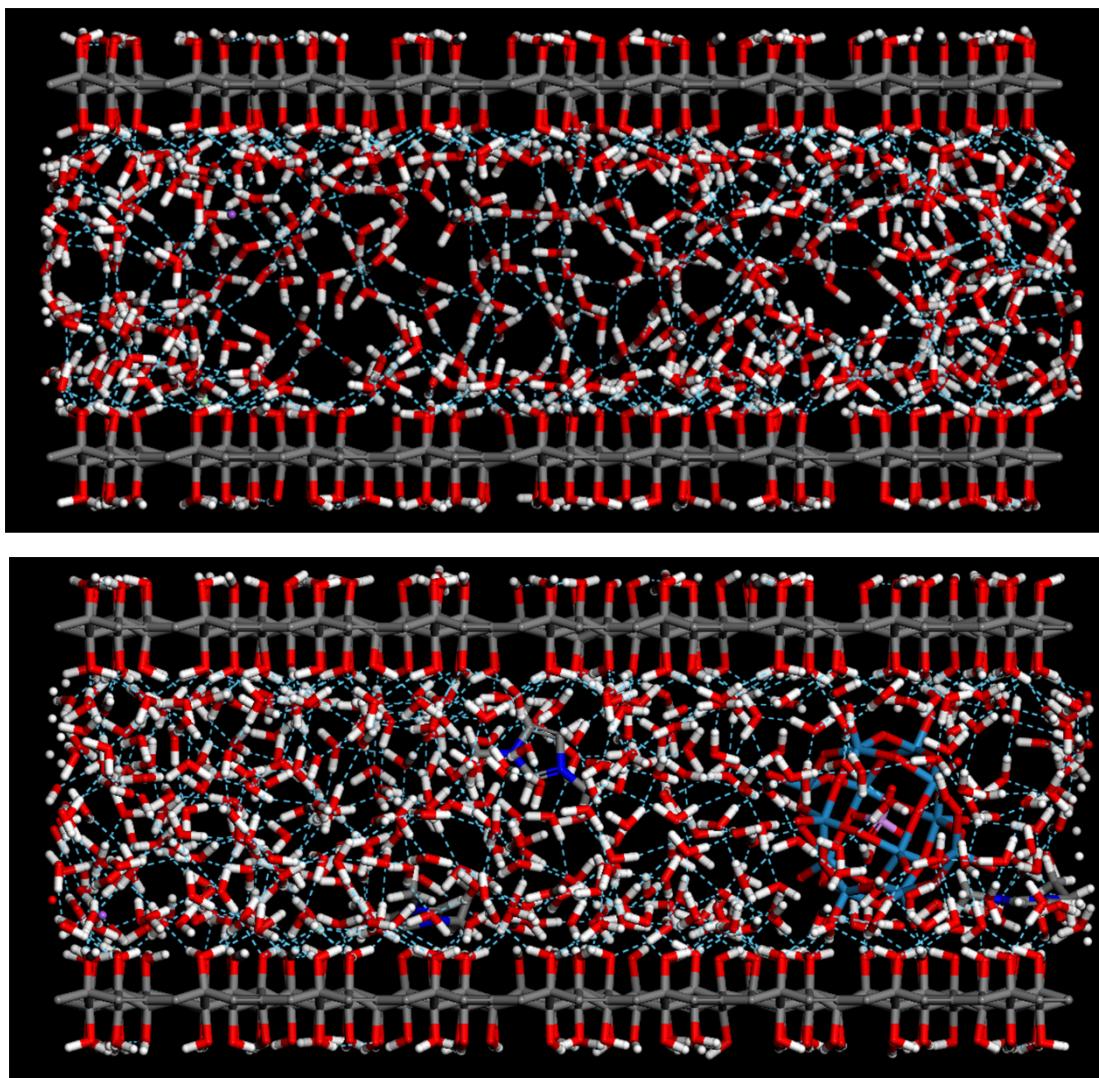

Fig. S2. The snapshots of the HBs (shown by dashed blue lines) for empty-GO and 1IL-GO systems. The HB cutoff distance (2.88 \AA) and the HB angle of 150° were used as the criteria in this figure. The O, H, P, W, N, and C atoms are in red, white, pink, light blue, dark blue, and gray, respectively.
