

## D. Software Categories

In Question 10 of the survey, the participants were asked what other software they used. We took these results and split them up into individual pieces of software, and removed all duplicates. From this we had a list of 209 pieces of software. We categorised these using the categories from our previous software research and identified new categories from the remaining items. Table D. 1 shows a full alphabetised list of the categories and the pieces of software within these categories.

Table D. 1: Full categorised list of software from PSDI Survey Question 10

Category	Software
CAD Software	Autodesk inventor
CAD Software	onshape.com
Chemical Database & Informatics Software	Chemistry Open Database
Chemical Database & Informatics Software	CSD (Cambridge Structural Database)
Chemical Database & Informatics Software	dragon
Chemical Database & Informatics Software	icsd
Chemical Database & Informatics Software	mordred
Chemical Database & Informatics Software	NIST
Chemical Database & Informatics Software	nomad
Chemical Database & Informatics Software	openbabel
Chemistry Bibliographic Databases	JabRef
Chemistry Bibliographic Databases	Mendeley
