

**Long-term effects of silver nanoparticles (NM-300K) and soil
amendments on soil respiration and mesofauna in a semi-field
experiment**

Table S1: Record of Plants Observed in the Soil Box during the Field Experiment

Species	Frequency	First appearance
<i>Artemisia vulgaris</i>	++	after 5 months
<i>Capsella bursa-pastoris</i>	+++	after 8 months
<i>Chenopodium album</i>	++	after 8 months
<i>Geranium molle</i>	+	after 17 months
<i>Holcus lanatus</i>	++++	after 5 months
<i>Matricaria maritima</i>	+	after 5 months
<i>Persicaria minus</i>	+++	after 5 months
<i>Senecio inaequidens</i>	+	after 8 months
<i>Senecio vulgaris</i>	++	after 5 months
<i>Sonchus asper</i>	++	after 5 months
<i>Stellaria media</i>	++	after 5 months
<i>Tanacetum vulgare</i>	+	after 17 months
<i>Trifolium repens</i>	++	after 8 months
