Values presented as mean (95% CI). Different alphabet superscript indicates a significant difference across the comparisons within the same row. Superscript a indicates the highest group across the row. Superscript 1 indicates statistical test done by linear mixed effect model, paired with post-hoc Tukey HSD test. Superscript 2 indicates statistical test done by non-parametric Friedman test and Wilcoxon signed rank test with Bonferroni *p* adjustment. AOK – autoclaved okara flour substituted biscuits; AUC – area under curve; C – control biscuits; HDL-C – high-density lipoprotein cholesterol; iAUC – incremental area under curve; LDL-C – low-density lipoprotein cholesterol; RO – biovalorized okara flour-substituted biscuits; SCFA – short-chain fatty acids; TC – total cholesterol; TG – triglyceride.
