

Figure S1. Diversity analysis of CPO-treated gut microbiota. Observed otus (a), Chao-1 index (b) and Shannon index (c) of fecal samples from mice fed with CHOW (n=6), HFD (n=6), HFD+CPO (n =6). Data are expressed as means \pm SD. Significance was determined by Student's t- test. * $P < 0.05$, for CHOW vs HFD.

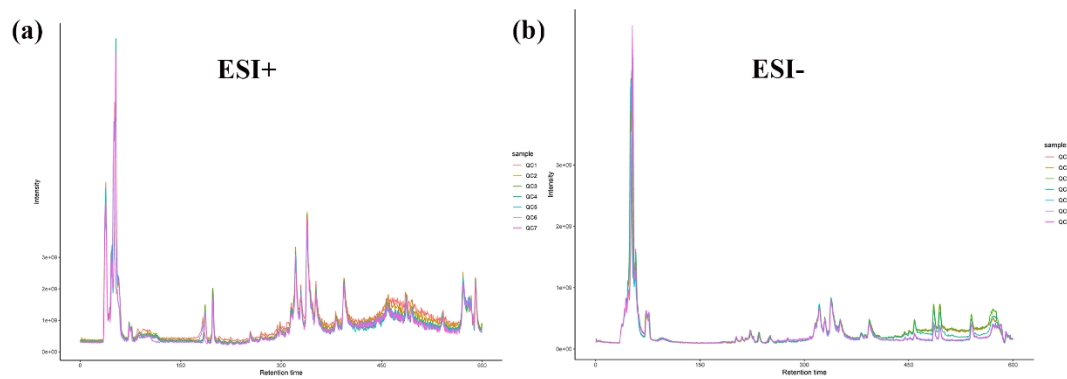

Figure S2. TIC of QC sample. (a) Positive modes; (b) Negative modes.
