SUPPLEMENTARY MATERIAL
Figure S1: Representative chromatograms of A) fresh flaxseed, B) fresh flaxseed at the end of the intestinal phase of the simulated in vitro digestion, C) fresh flaxseed after 2h of in-vitro simulated colonic fermentation, and D) fresh flaxseed after 24h of in-vitro simulated colonic fermentation. In all the panels peak 1 represents secoisolariciresinol and peak 2 represents enterolactone.
