Table of Contents:

1. $^1$H NMR spectrum of compound 3a .................................................................4
2. $^1$H NMR spectrum of compound 3b .................................................................5
3. $^1$H NMR spectrum of compound 3c .................................................................6
4. $^1$H NMR spectrum of compound 3d .................................................................7
5. $^1$H NMR spectrum of compound 4a .................................................................8
6. $^1$H NMR spectrum of compound 4b .................................................................9
7. $^1$H NMR spectrum of compound 4c .................................................................10
8. $^1$H NMR spectrum of compound 4d .................................................................11
9. $^{13}$C NMR spectrum of compound 3a ...............................................................12
10. $^{13}$C NMR spectrum of compound 3b ..............................................................13
11. $^{13}$C NMR spectrum of compound 3c ..............................................................14
12. $^{13}$C NMR spectrum of compound 3d ..............................................................15
13. $^{13}$C NMR spectrum of compound 4a ..............................................................16
14. $^{13}$C NMR spectrum of compound 4b ..............................................................17
15. $^{13}$C NMR spectrum of compound 4c ..............................................................18
16. $^{13}$C NMR spectrum of compound 4d ..............................................................19
17. Mass NMR spectrum of compound 3a ............................................................20
18. Mass NMR spectrum of compound 3b ............................................................20
19. Mass NMR spectrum of compound 3c ............................................................21
20. Mass NMR spectrum of compound 3d ............................................................21
21. Mass NMR spectrum of compound 4a ............................................................22
22. Mass NMR spectrum of compound 4b ............................................................22
23. Mass NMR spectrum of compound 4c ............................................................23
24. Mass NMR spectrum of compound 4d .................................................................23
25. UV-Visible spectra of 4(a-d) in methanol ..............................................................24
26. Visual recognition of 4(b-d) in daylight in the presence of Sn^{2+} ions ....................24
27. Job’s plots for the complexation of 4(a-d) with Sn^{2+} ions ......................................25
28. B-H plots for 4(a-d) with Sn^{2+} ions from UV ......................................................26
29. LOD plots of 4(a-d) for Sn^{2+} ions from UV ..........................................................27
30. Fluorescence emission of 4(b-d) in the presence of Sn^{2+} ions ..............................28
31. B-H plots for 4(a-d) with Sn^{2+} ions from fluorescence ........................................28
32. LOD plots of 4(a-d) for Sn^{2+} ions from fluorescence ..........................................29
33. pH effect on fluorescence intensity of compounds (4a-4d) .....................................30
34. ¹H NMR spectrum of compound 4a-Sn^{2+} ...........................................................31
35. Plot of ΔF as function of concentration of Sn^{2+} ....................................................32
36. UV-visible absorption spectra of 4(a-d) in presence of Sn^{4+} ions in methanol ...........33
