

**Electronic Supplementary Material
Induction of toxicity in human colon cells and organoids by size- and
composition-dependent road dust**

Table of contents

Tables

Table S1 Total elemental analysis data of road dust 1-4

Table S2 PCR array results of expression level of 84 inflammatory bowel disease-related genes upon addition of road dust including 5 housekeeping genes used for validation

Table S3 Forward and reverse primer sequence used for qPCR

Figure S1 Colon organoid characterization

Figure S2 % colon organoid viability upon addition of road dust

Figure S3 road dust particle size and surface charge dependent colon organoid toxicity

Table S3. Forward and reverse primer sequence used for qPCR.

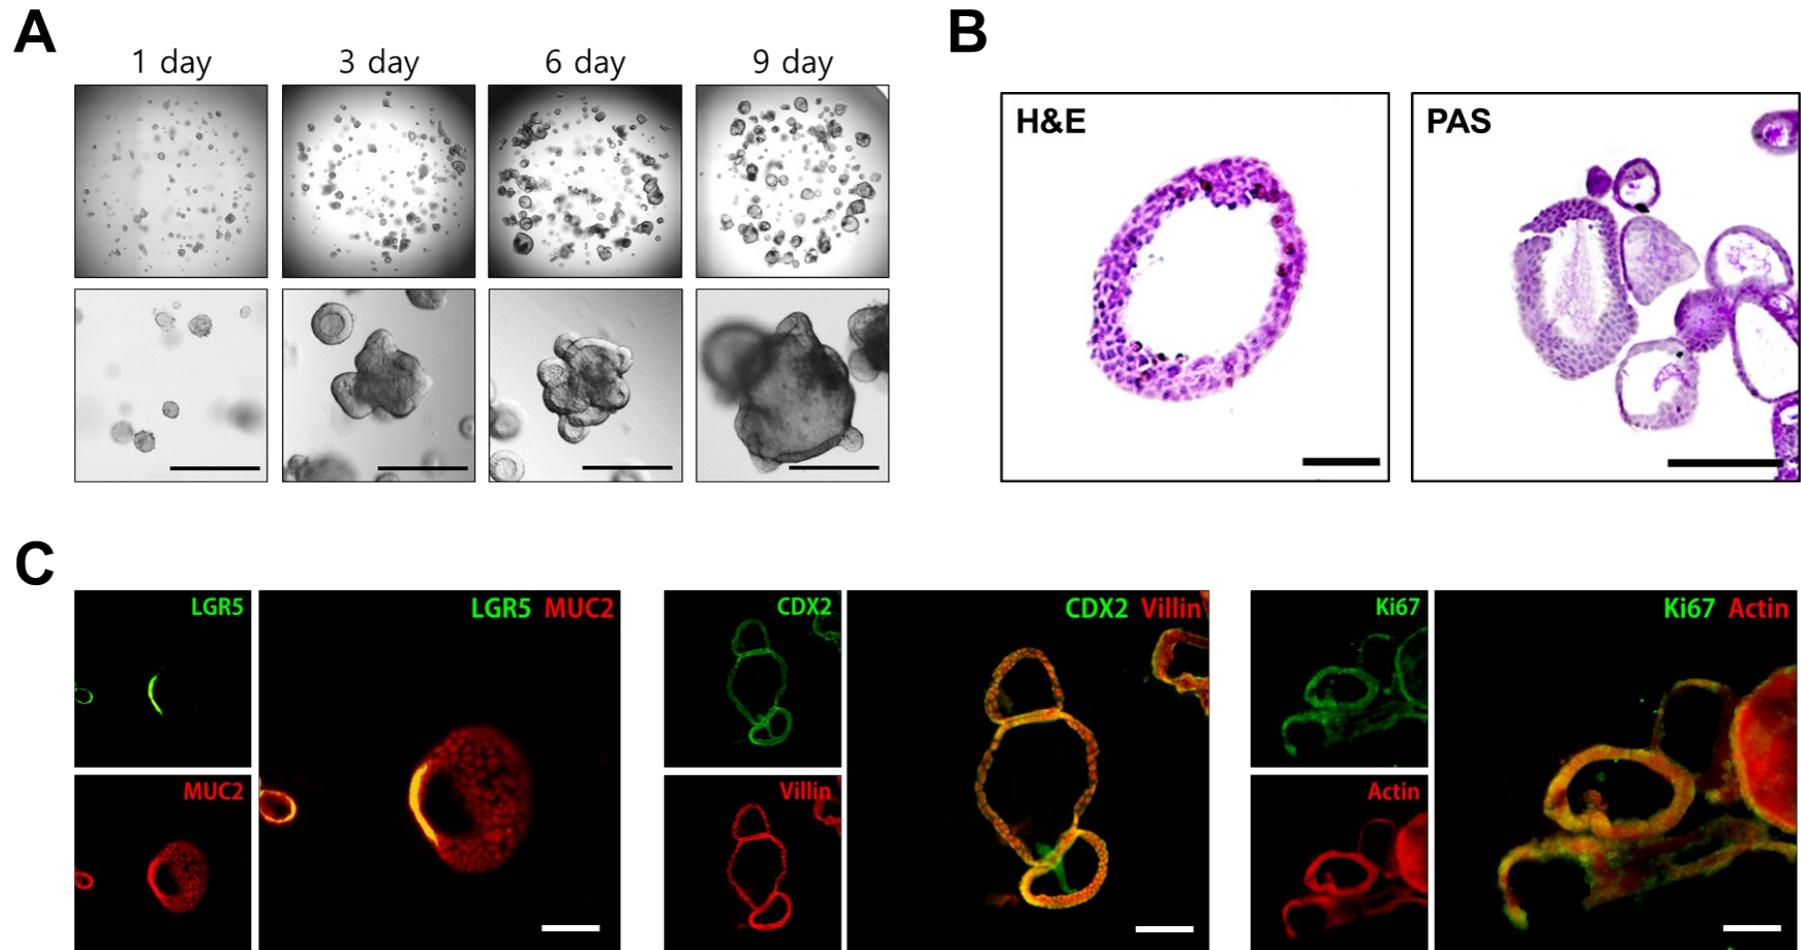

Figure S1. (A) BF images (B) H&E and PAS staining (C) Immunofluorescence staining of colon organoids.

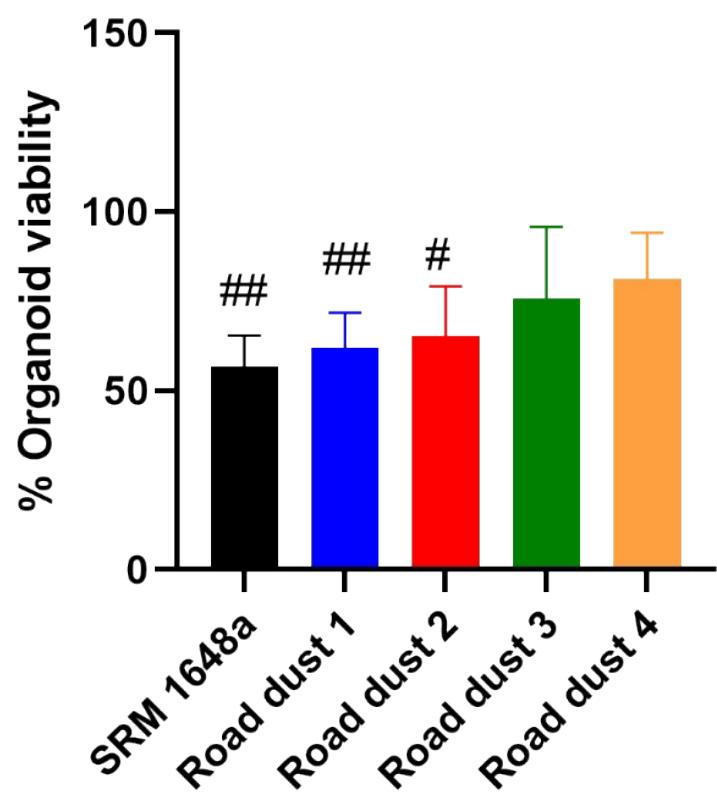

Figure S2. % colon organoid viability upon addition of 2 mg/mL road dust. Error bars represent the standard deviation from three independent experiments. Statistical significance is denoted as # for $P < 0.05$ and ## for $P < 0.01$

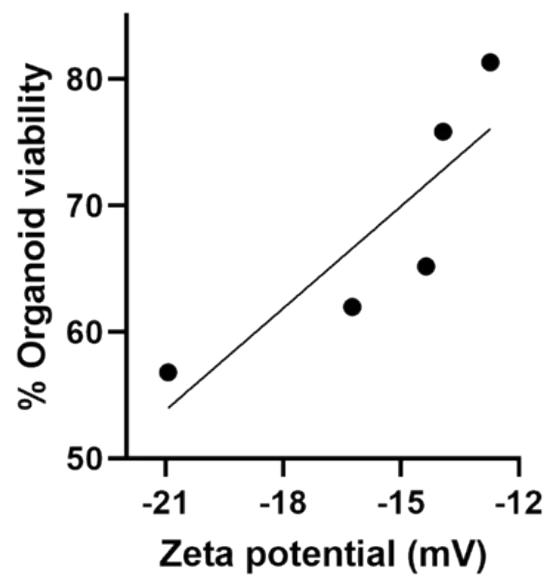

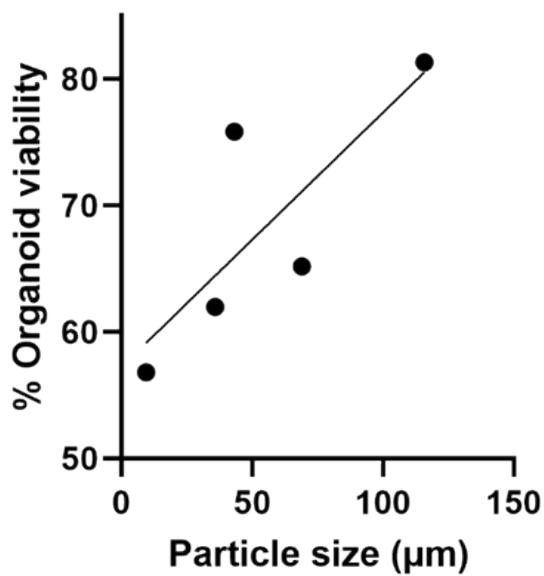

Figure S3. Road dust particle size (left) and surface charge (right) dependent human colon organoid toxicity.
