Appendix 1. Survey items for measuring six types of values
(1) I enjoy learning chemistry.
(2) I find many topics in chemistry to be interesting
(3) Chemistry fascinates me.
(4) I am interested in solving chemistry problems.
(1) Learning chemistry can help us make economic and social progress
(2) Learning chemistry can help humans keep healthy.

```
Intrinsic
```

Intrinsic
Value
(3) Learning chemistry can help us protect the environment and achieve sustainable development.
(4) Learning chemistry can help improve our quality of life.
(5) Learning chemistry can help provide us new materials and energy sources.

Social Value
(1) Learning chemistry help me think rigorously
(2) Learning chemistry can increase my safety awareness.
(3) Learning chemistry can develop my creativity.
(4) Learning chemistry can strengthen my scientific inquiry skills.
(5) Learning chemistry help me make inferences informed by evidence.
(6) Learning chemistry help me how to examine the scientific basis behind phenomena.

Epistemic

7 Learning chemistry help me treat thing critically
(8 Learning chemistry enable me to participate in the discussion and practice of related societal issues.
(9) Learning chemistry enable me to solve problems through identifying patterns and applying principles.

## Utility Value

2 I think learning chemistry will help me get good grades in exams.
(3) Learning chemistry will benefit my choice of university major in the future.
(4) Learning chemistry will give me more job opportunities.
(5) I think learning chemistry will help me solve problems in my daily life.
(1) Getting high grades in chemistry is important to me.

## Attainment

 Value2 Understanding the subject content of chemistry is important to me.
(3) Doing well in chemistry can fulfill parents' expectations.
(4) If I do well in chemistry, I can help my classmates with a sense of fulfilment.

6 It is worthwhile to spend effort in doing well in chemistry.
(1) When learning chemistry, I can feel the beauty of rationality.
(2) When learning chemistry, I can feel the beauty of conservation.
(3) When learning chemistry, I can feel the beauty of diverse phenomena.
(4) When learning chemistry, I can feel the beauty of symmetry.

Note: Colors representing different types of values were matched with colors in MDS maps.

## Appendix 2. Survey items for measuring cost

1. Doing well in chemistry requires more effort than I want to put into it.
2. I have to give up other activities that I like to do well in chemistry.
3. I have to sacrifice a lot of free time to be good at chemistry.
4. When learning chemistry, I loss more than I gain.
5. Chemistry exams scare me.
6. Studying chemistry makes me feel stress.
7. Teachers or parents would be disappointed in me if I performed poorly in chemistry.
8. Others would think I am incompetent if I get low grades in chemistry.

Appendix 3. Confirmatory factor analysis output for value items

| Factors | loading estimates |  | S.E. |
| :---: | :---: | :---: | :---: |
|  | IV1 | 0.939 | 0.010 |
| Intrinsic Value | IV2 | 0.911 | 0.012 |
| (IV) | IV3 | 0.926 | 0.016 |
|  | IV4 | 0.876 | 0.017 |
| Utility Value (UV) | UV1 | 0.694 | 0.056 |
|  | UV2 | 0.623 | 0.045 |
|  | UV3 | 0.863 | 0.045 |
|  | UV4 | 0.848 | 0.048 |
|  | UV5 | 0.621 | 0.063 |
| Attainment Value (AtV) | AtV1 | 0.734 | 0.041 |
|  | AtV2 | 0.815 | 0.028 |
|  | AtV3 | 0.615 | 0.041 |
|  | AtV4 | 0.688 | 0.034 |
|  | AtV5 | 0.687 | 0.043 |
| Aesthetic Value (AeV) | AeV1 | 0.855 | 0.032 |
|  | AeV2 | 0.821 | 0.034 |
|  | AeV3 | 0.944 | 0.013 |
|  | AeV4 | 0.870 | 0.027 |
| Epistemic Value (EV) | EV1 | 0.877 | 0.016 |
|  | EV2 | 0.792 | 0.031 |
|  | EV3 | 0.823 | 0.029 |
|  | EV4 | 0.878 | 0.020 |
|  | EV5 | 0.860 | 0.023 |
|  | EV6 | 0.870 | 0.019 |
|  | EV7 | 0.833 | 0.026 |
|  | EV8 | 0.751 | 0.028 |
|  | EV9 | 0.810 | 0.026 |
| Social Value (SV) | SV1 | 0.786 | 0.032 |
|  | SV2 | 0.839 | 0.032 |
|  | SV3 | 0.916 | 0.020 |
|  | SV4 | 0.904 | 0.034 |
|  | SV5 | 0.909 | 0.019 |

Appendix 4. Hierarchical multiple regression output for significant variables predicting chemistry achievement

| Variable | B | SE | $\beta$ | $p$ |
| :--- | :--- | :--- | :--- | :--- |
| Step 1 |  |  |  |  |
| Age | .328 | .086 | .177 | .000 |
| Female | -.760 | .126 | -.283 | .000 |
| Step 2 |  |  |  |  |
| Age | .212 | .078 | .115 | .007 |
| Female | -.477 | .115 | -.177 | .000 |
| Intrinsic Value | .342 | .046 | .347 | .000 |
| Cost | -.259 | .055 | -.196 | .000 |
| Social Value | .121 | .062 | .087 | .051 |
| Step 3 |  |  |  |  |
| Age | .247 | .078 | .134 | .002 |
| Female | -.467 | .114 | -.174 | .000 |
| Intrinsic Value | .338 | .045 | .344 | .000 |
| Cost | -.250 | .055 | -.189 | .000 |
| Social Value | .267 | .081 | .191 | .001 |
| Social Value $\times$ Female | -.305 | .109 | -.155 | .005 |

Note: $R^{2}=0.124$ for Step $1 ; \Delta R^{2}=0.197$ for Step $2 ; \Delta R^{2}=0.013$ for Step 3 .
