Fig. S1 Anionic structural changes in delithiated sulfide SEs. Laboratory X-ray diffraction patterns of all LPI3-Br series samples. All these samples exhibit an amorphous phase. LPI3, LPI3-Br5, -Br7.5, $\mathrm{Br} 10,-\mathrm{Br} 15,-\mathrm{Br} 20$, and -Br 30 indicate $\left[\left(\mathrm{Li}_{2} \mathrm{~S}\right)_{0.658}(\mathrm{LiI})_{0.342}\right]_{0.825}\left[\mathrm{P}_{2} \mathrm{~S}_{5}\right]_{0.175}$, $\left[\left(\mathrm{Li}_{2} \mathrm{~S}_{0.658}\left(\mathrm{LiI}_{0.95} \mathrm{LiBr}_{0.05}\right)_{0.342}\right]_{0.825}\left[\mathrm{P}_{2} \mathrm{~S}_{5}\right]_{0.175},\left[\left(\mathrm{Li}_{2} \mathrm{~S}\right)_{0.658}\left(\mathrm{LiI}_{0.925} \mathrm{LiBr}_{0.075}\right)_{0.342}\right]_{0.825}\left[\mathrm{P}_{2} \mathrm{~S}_{5}\right]_{0.175}\right.$, $\left[\left(\mathrm{Li}_{2} \mathrm{~S}\right)_{0.658}\left(\mathrm{LiI}_{0.90} \mathrm{LiBr}_{0.10}\right)_{0.342}\right]_{0.825}\left[\mathrm{P}_{2} \mathrm{~S}_{5}\right]_{0.175},\left[\left(\mathrm{Li}_{2} \mathrm{~S}\right)_{0.658}\left(\mathrm{LiI}_{0.85} \mathrm{LiBr}_{0.15}\right)_{0.342}\right]_{0.825}\left[\mathrm{P}_{2} \mathrm{~S}_{5}\right]_{0.175}$, $\left[\left(\mathrm{Li}_{2} \mathrm{~S}\right)_{0.658}\left(\mathrm{LiI}_{0.80} \mathrm{LiBr}_{0.20}\right)_{0.342}\right]_{0.825}\left[\mathrm{P}_{2} \mathrm{~S}_{5}\right]_{0.175}$, and $\left[\left(\mathrm{Li}_{2} \mathrm{~S}\right)_{0.658}\left(\mathrm{LiI}_{0.70} \mathrm{LiBr}_{0.30}\right)_{0.342}\right]_{0.825}\left[\mathrm{P}_{2} \mathrm{~S}_{5}\right]_{0.175}$ samples, respectively.

Fig. S2 Comparison of measured and normalized structural factor $S(q)$ in LPI3-Br series. The normalized $S(q)$ was obtained during RMC simulations to correct measurement errors.

Fig. S3 Atomic structure of LPI3-Br series samples reconstructed by reverse Monte-Carlo (RMC)
simulation. The white, blue, yellow, brown and red spheres indicate the $\mathrm{Li}, \mathrm{P}, \mathrm{S}, \mathrm{I}$, and Br atoms, respectively. The yellow, blue, green, and red polyhedrons indicate the Li-S, P-S, Li-I, and Li-Br bonds, respectively.

Fig. S4 Impedance spectral changes of LP75 and LPI3-Br series samples with temperature (T). (a) LPI3,
(b) LPI3-Br5, (c) LPI3-Br10, (d) LPI3-Br15, (e) LPI3-Br20, and (f) LP75.

Fig. S5 Wave patterns of a LPI3-Br10 sample measured by ultrasonic pulse-echo technique: longitudinal (top) and shear (bottom) modes. The dotted vertical lines indicate the time-of-flight difference.

Fig S6. Mean square displacement (MSD) of Li ions obtained by ab initio molecular dynamics (AIMD) simulations. (a) LPI3, (b) LPI3-Br5, (c) LPI3-Br10, (d) LPI3-Br15, and (e) LPI3-Br20. LPI3, LPI3$\mathrm{Br} 5,-\mathrm{Br} 10,-\mathrm{Br} 15$, and -Br 20 indicate $\left[\left(\mathrm{Li}_{2} \mathrm{~S}\right)_{0.658}(\mathrm{LiI})_{0.342}\right]_{0.825}\left[\mathrm{P}_{2} \mathrm{~S}_{5}\right]_{0.175}$,
$\left[\left(\mathrm{Li}_{2} \mathrm{~S}_{0.658}\left(\mathrm{LiI}_{0.95} \mathrm{LiBr}_{0.05}\right)_{0.342}\right]_{0.825}\left[\mathrm{P}_{2} \mathrm{~S}_{5}\right]_{0.175},\left[\left(\mathrm{Li}_{2} \mathrm{~S}\right)_{0.658}\left(\mathrm{LiI}_{0.90} \mathrm{LiBr}_{0.10}\right)_{0.342}\right]_{0.825}\left[\mathrm{P}_{2} \mathrm{~S}_{5}\right]_{0.175}\right.$, $\left[\left(\mathrm{Li}_{2} \mathrm{~S}_{0.658}\left(\mathrm{LiI}_{0.85} \mathrm{LiBr}_{0.15}\right)_{0.342}\right]_{0.825}\left[\mathrm{P}_{2} \mathrm{~S}_{5}\right]_{0.175}\right.$, and $\left[\left(\mathrm{Li}_{2} \mathrm{~S}_{0.658}\left(\mathrm{LiI}_{0.80} \mathrm{LiBr}_{0.20}\right)_{0.342}\right]_{0.825}\left[\mathrm{P}_{2} \mathrm{~S}_{5}\right]_{0.175}\right.$ samples, respectively.

Table S1 Summary of cut-off distances for LPI3-Br series in RMC simulations.

| Atom $i$ | Atom $j$ | Cut-off distance ( $\AA$ ) | Atom $i$ | Atom $j$ | Cut-off distance ( $\AA$ ) |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Li | Li | 2.80 | I | S | 3.30 |
| Li | I | 2.60 | Br | Br | 3.30 |
| Li | Br | 2.40 | Br | P | 3.40 |
| Li | P | 3.10 | Br | S | 3.30 |
| Li | S | 2.25 | P | P | 2.90 |
| I | I | 3.30 | P | S | 1.80 |
| I | Br | 3.30 | S | S | 2.90 |
| I | P | 3.10 | - | - | - |

Table S2 Detailed information on Arrhenius plots of AIMD results for LPI3-Br series. $D_{\mathrm{Li}}$ indicates the diffusivity of Li ions. The $D_{\text {ion }}$ at 300 K was obtained from the extrapolated values.

| $T(\mathrm{~K})$ | $D_{\mathrm{Li}}\left(10^{-6} \mathrm{~cm}^{2} \mathrm{~s}^{-1}\right)$ |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | LPI3 | LPI3-Br5 | LPI3-Br10 | LPI3-Br15 | LPI3-Br20 |
| 1200 | 1.75 | 1.55 | 1.55 | 1.76 | 1.62 |
| 1000 | 1.06 | 0.99 | 1.02 | 0.95 | 1.26 |
| 900 | 0.79 | 0.69 | 0.97 | 0.74 | 0.80 |
| 800 | 0.60 | 0.50 | 0.74 | 0.56 | 0.56 |
| 700 | 0.35 | 0.30 | 0.35 | 0.34 | 0.33 |
