## Contents

**Figure S1** Chemical structures of ten reference compounds of *C. orbiculatus*.

**Figure S2** Effect of different elution gradients on the resolution of different chromatographic peaks of QC samples of *C. orbiculatus*.

**Figure S3** Effect of different detection wavelengths on the separation of different chromatographic peaks in QC samples of *C. orbiculatus*.

**Figure S4** Influence of different additives in mobile phase water phase on 7 chromatographic peak-peak areas. FA: formic acid; AA: acetic acid.

**Figure S5** HSS T3 column was used to compare the effects of different column temperatures on the peak area of 7 chromatographic peaks.

**Figure S6** Effects of different ion source parameters (Gas 1, Gas 2, Temp and CUR gas) on different chromatographic peaks of QC samples from UPLC-Q-TOF-MS/MS.

**Figure S7** Mass spectra comparison of sincocculine in the reference solution and sample. (A: TOF MS of sincocculine in the reference solution; B: TOF MS/MS of sincocculine in the reference solution; C: TOF MS of sincocculine in the sample; D: TOF MS/MS of sincocculine in the sample.)

**Figure S8** Mass spectra comparison of reticuline in the reference solution and sample. (A: TOF MS of reticuline in the reference solution, B: TOF MS/MS of reticuline in the reference solution, C: TOF MS of reticuline in the sample, D: TOF MS/MS of reticuline in the sample.)

**Figure S9** Mass spectra comparison of laurifoline in the reference solution and sample. (A: TOF MS of tetrandrine laurifoline in the reference solution, B: TOF MS/MS of laurifoline laurifoline in the reference solution, C: TOF MS of laurifoline in the sample, D: TOF MS/MS of laurifoline in the sample.)

**Figure S10** Mass spectra comparison of oblongine in the reference solution and sample. (A: TOF MS of tetrandrine oblongine in the reference solution, B: TOF MS/MS of oblongine in the reference solution, C: TOF MS of oblongine in the sample, D: TOF MS/MS of oblongine in the sample.)

**Figure S11** Mass spectra comparison of tetrandrine in the reference solution and sample. (A: TOF MS of tetrandrine tetrandrine in the reference solution, B: TOF MS/MS of tetrandrine in the reference solution, C: TOF MS of tetrandrine in the sample, D: TOF MS/MS of tetrandrine in the sample.)

**Figure S12** Mass spectra comparison of stepharine in the reference solution and sample. (A: TOF MS of stepharine in the reference solution, B: TOF MS/MS of stepharine in the reference solution, C: TOF MS of stepharine in the sample, D: TOF MS/MS of stepharine in the sample.)

**Figure S13** Mass spectra comparison of chlorogenic acid in the reference solution and sample. (A: TOF MS of chlorogenic acid in the reference solution, B: TOF MS/MS of chlorogenic acid in the reference solution, C: TOF MS of chlorogenic acid in the sample, D: TOF MS/MS of chlorogenic

acid in the sample.)

**Figure S14** Mass spectra comparison of apigenin in the reference solution and sample. (A: TOF MS of apigenin in the reference solution, B: TOF MS/MS of apigenin acid in the reference solution, C: TOF MS of apigenin in the sample, D: TOF MS/MS of apigeninT in the sample.)

**Figure S15** Mass spectra comparison of bilobetin in the reference solution and sample. (A: TOF MS of bilobetin in the reference solution, B: TOF MS/MS of bilobetin acid in the reference solution, C: TOF MS of bilobetin in the sample, D: TOF MS/MS of bilobetin in the sample.)

**Figure S16** Mass spectra comparison of magnoline in the reference solution and sample. (A: TOF MS of magnoflorine e in the reference solution, B: TOF MS/MS of magnoflorine in the reference solution, C: TOF MS of magnoflorine in the sample, D: TOF MS/MS of magnoflorine in the sample.)

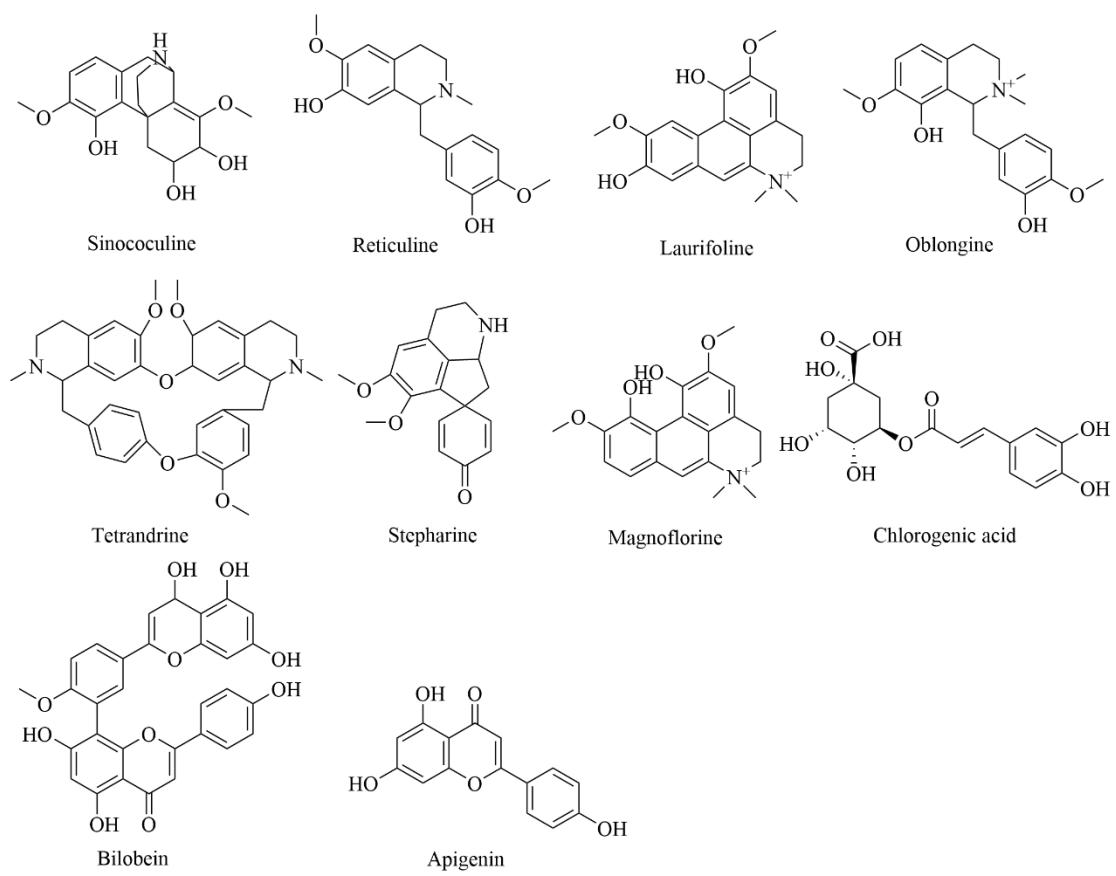

**Table S1** Sample collection information of *C. orbiculatus*.

**Table S2** Detailed information of ten reference compounds of *C. orbiculatus* used this work.

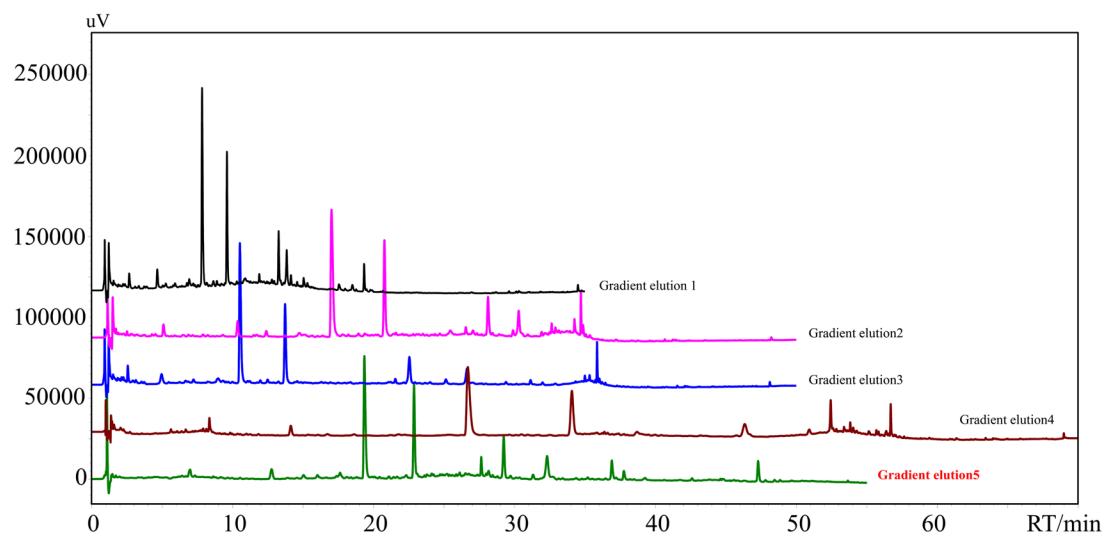

**Table S3** Related information of creating chemical composition database of the genu *Cocculus* plants.

**Table S4** Ten differential metabolites of *C. orbiculatus* in different parts.

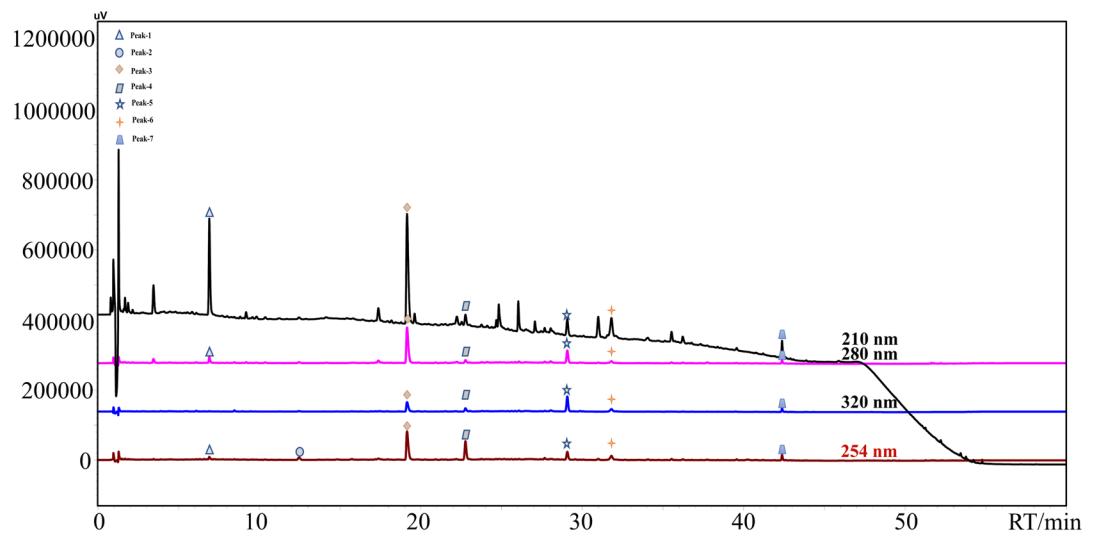

**Table S5** Five differential metabolites of *C. orbiculatus* in different harvest periods.
