

**Supplementary Figure 2: Average cytokine release at 48 hours, 96 hours and 192 hours (10 most highly expressed cytokines labelled and tracked using different coloured dashed lines) across duplicate control (DMSO) micro-dissected GBM biopsies: A) D23 B) D25, C) D26, D) D27, E) D28 and F) D30. Red diamonds indicate mean cytokine expression across all cytokines. Related to Figure 2E.**
