

Pursuing Colloidal Diamond Supplementary Movies

Łukasz Baran, Dariusz Tarasewicz, Daniel M. Kamiński, Wojciech Rżysko

- Movie S1 - Time evolution of the external field-driven assembly from disordered state to the formation of stacking hybrids of cubic and hexagonal diamond for the system with $\xi = 0.4$ at $T^* = 0.30$.
- Movie S2 - Time evolution of the external field-driven assembly from disordered state to the selective formation of cubic diamond for the system with $\xi = 1.0$ at $T^* = 0.30$.
