**Table of Contents**

1. Cyclic voltammetry: Fig. S1, S2	S3
2. Faradaic calculation	S3
3. General procedure A (Synthesis of 2-isocyanobiphenyls <b>1</b> ): Scheme S1	S4
4. General procedure B (Synthesis of phenanthridines <b>3</b> ): Scheme S2	S4
5. Radical trapping experiment: Scheme S3	S4
6. Picture of experimental set up: Fig. S3	S4
7. NMR spectra of 2-isocyanobiphenyls <b>1a-1s</b>	S5
8. NMR spectra of 6-(trifluoromethyl)phenanthridines <b>3a-3s</b>	S28
9. NMR spectra of (3,3,3-trifluoroprop-1-ene-1,1-diyl)dibenzene <b>4</b>	S68

## 1. Cyclic voltammetry

Cyclic voltammetry experiments were conducted in a 4-neck flask that contained the analytes dissolved in a 0.1 M solution of tetrabutylammonium hexafluorophosphate in acetonitrile. A glassy carbon disc ( $\varnothing$  3 mm), a Pt wire ( $\varnothing$  0.5 mm), and Ag/AgCl electrode were used as a working electrode, a counter electrode, and a pseudo-reference electrode, respectively. The voltage was measured by PalmSens4 potentiostat in the presence of ferrocene as an external standard, at a scan rate of 0.1V/s (Fig. S1 and S2).

Fig. S1 Cyclic voltammetry experiment set up.

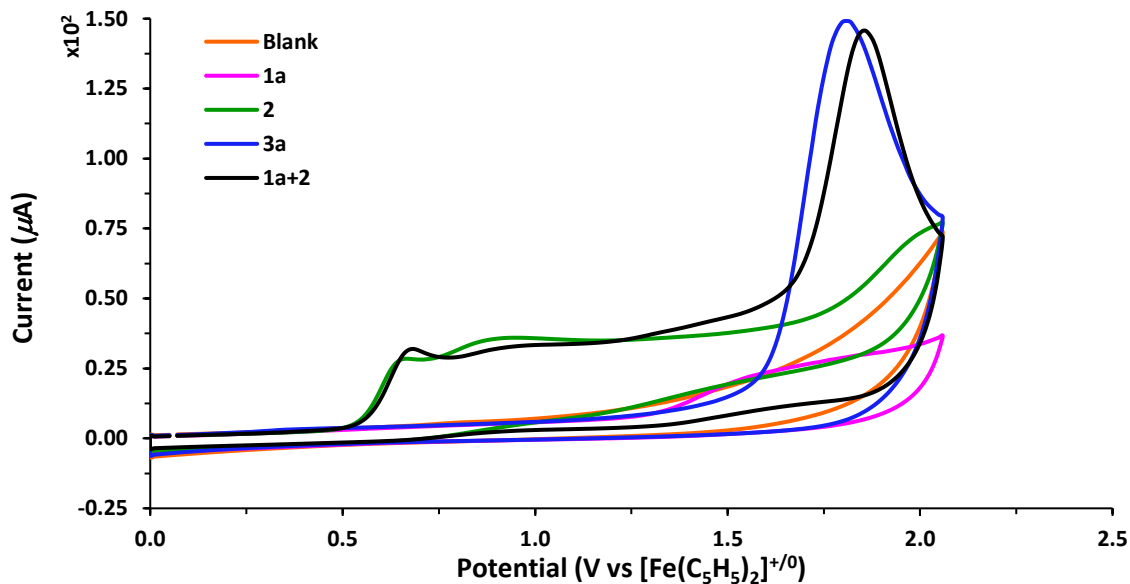

Fig. S2 Cyclic voltammograms of Blank, 1a, 2, and 3a.

## 2. Faradaic calculation

$$\text{Faradaic efficiency} = \frac{Q_{\text{experimental}}}{Q_{\text{theoretical}}} \times 100$$

$$\text{Faradaic efficiency} = \frac{z \times n \times F}{Q_{\text{theoretical}}} \times 100$$

With  $z$  = number of electron required for the reaction used = 2

$n$  = mol of product obtained = (maybe use the number in moles here and list the mass in parentheses) 0.0447 g (88%, MW. of product = 247.2202 g/mol)

F = Faradaic constant (96485 C/mol)

$Q_{\text{theoretical}} = I \text{ (current, Ampere)} \times t \text{ (reaction time, second)}$

$$\text{Faradaic efficiency} = \frac{2 \times \left( \frac{0.0447 \text{ g}}{247.2202 \text{ g/mol}} \right) \times 96485}{0.005 \text{ A} \times 7200 \text{ second}} \times 100$$

Faradaic efficiency = 94%

### 3. General procedure A (Synthesis of 2-isocyanobiphenyls 1)

Scheme S1 Synthesis of 2-isocyanobiphenyls 1

### 4. General procedure B (Synthesis of phenanthridines 3)

Scheme S2 Synthesis of phenanthridines 3.

### 5. Radical trapping experiment

Scheme S3 Radical trapping experiment.
