Figure S.7. FTIR spectra of [ETOHA][C5], before and after CO<sub>2</sub> absorption. (-) Black and (-) red denote before and after absorption, respectively. Inset figure shows the wavenumbers in the region approximately 2300 cm<sup>-1</sup> to highlight the presence of CO<sub>2</sub> in [ETOHA][C5]

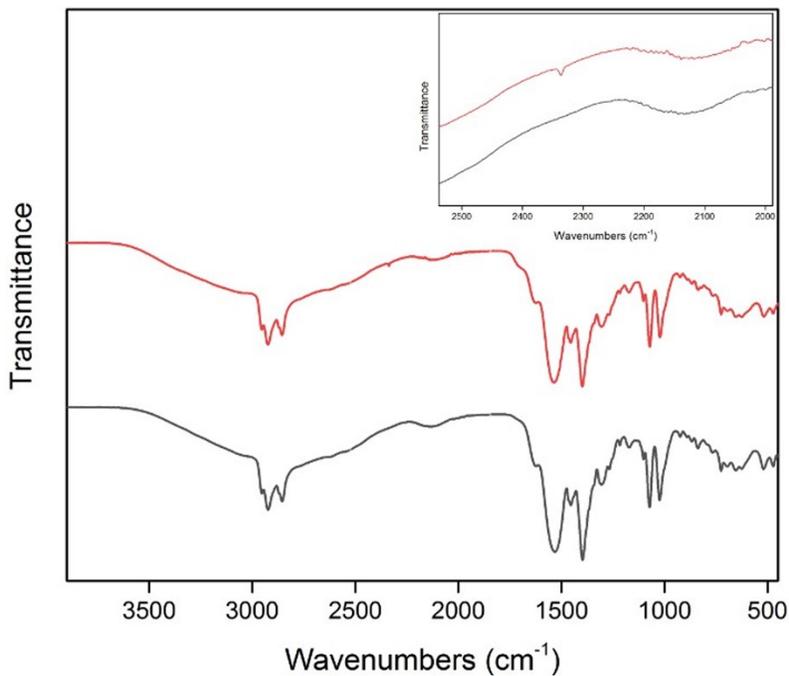

Figure S.8. FTIR spectra of [ETOHA][C7], before and after CO<sub>2</sub> absorption. (-) Black and (-) red denote before and after absorption, respectively. Inset figure shows the wavenumbers in the region approximately 2300 cm<sup>-1</sup> to highlight the presence of CO<sub>2</sub> in [ETOHA][C7]

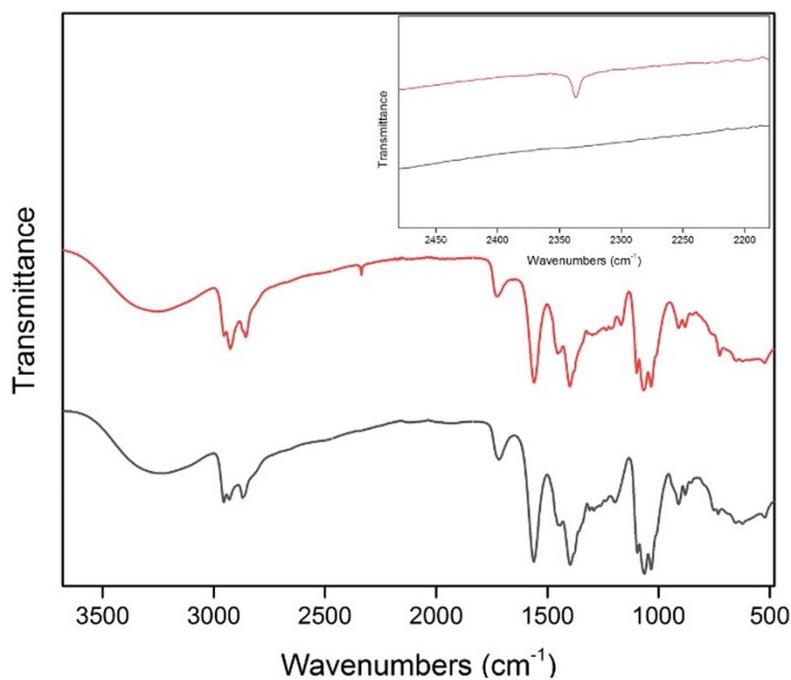

Figure S.9. FTIR spectra of [TRietoHA][C5], before and after CO<sub>2</sub> absorption. (-) Black and (-) red denote before and after absorption, respectively. Inset figure shows the wavenumbers in the region approximately 2300 cm<sup>-1</sup> to highlight the presence of CO<sub>2</sub> in [TRietoHA][C5]

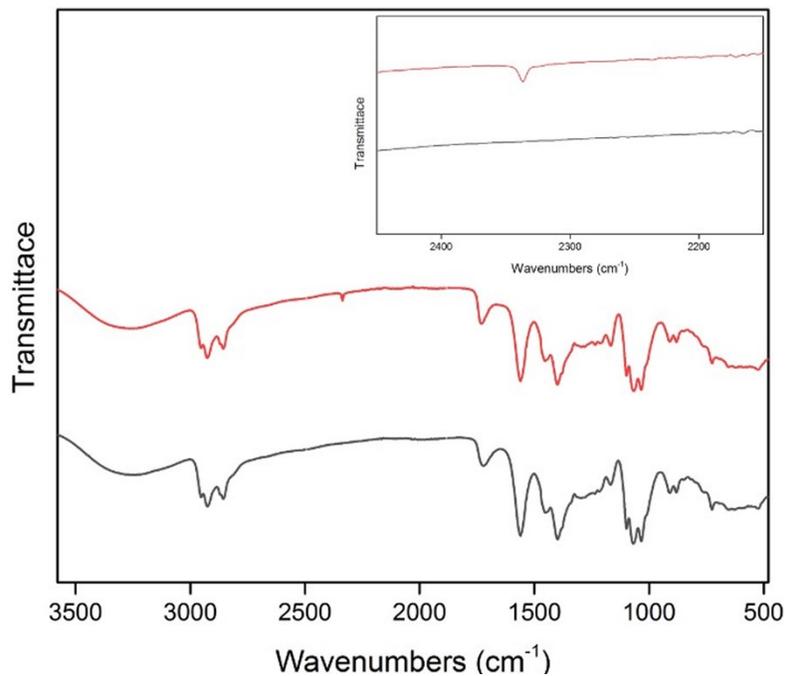

Figure S.10. FTIR spectra of [TRietoHA][C7], before and after CO<sub>2</sub> absorption. (-) Black and (-) red denote before and after absorption, respectively. Inset figure shows the wavenumbers in the region approximately 2300 cm<sup>-1</sup> to highlight the presence of CO<sub>2</sub> in [TRietoHA][C7]

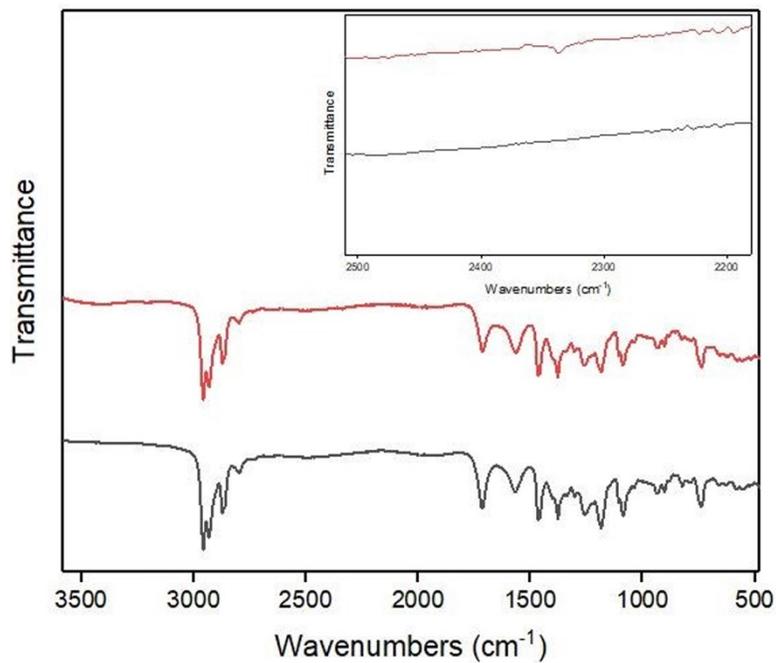

Figure S.11. FTIR spectra of [TBA][C5], before and after CO<sub>2</sub> absorption. (-) Black and (-) red denote before and after absorption, respectively. Inset figure shows the wavenumbers in the region approximately 2300 cm<sup>-1</sup> to highlight the presence of CO<sub>2</sub> in [TBA][C5]
