List of Figures and Tables

Figure S1.....	S2
Figure S2.....	S2
Table S1.....	S3

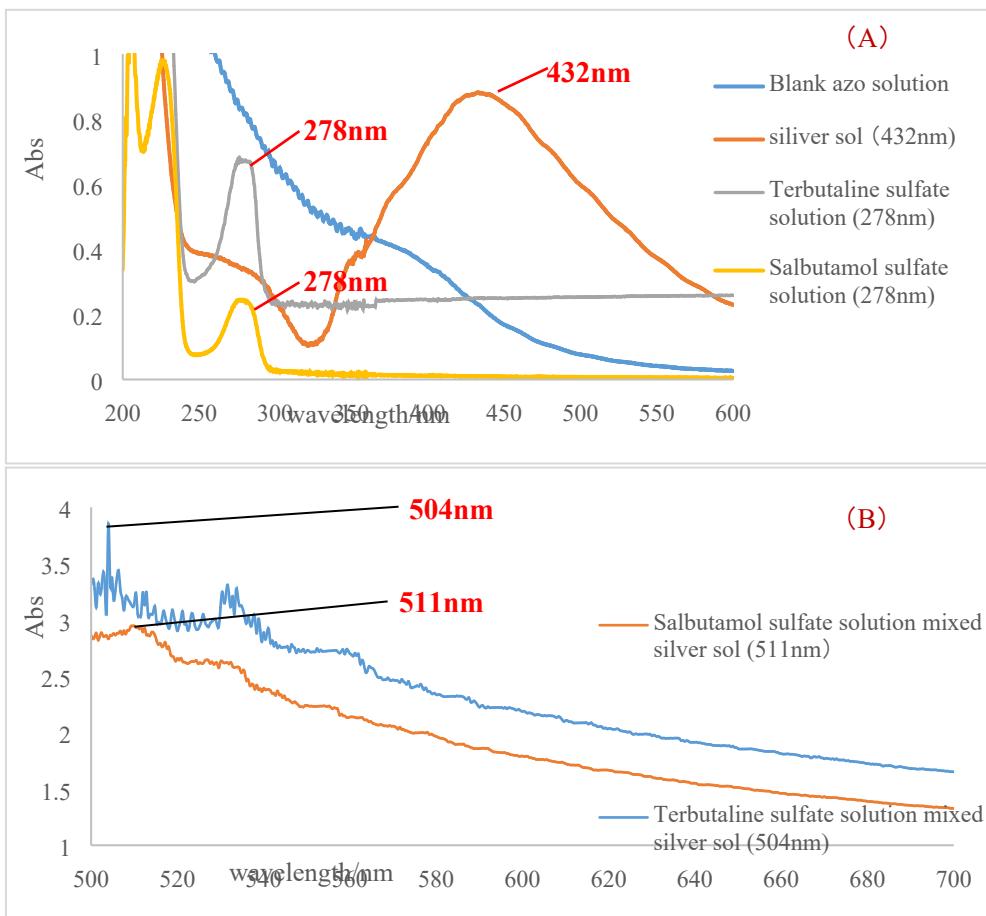

Figure S1. Spectrograms of different solutions

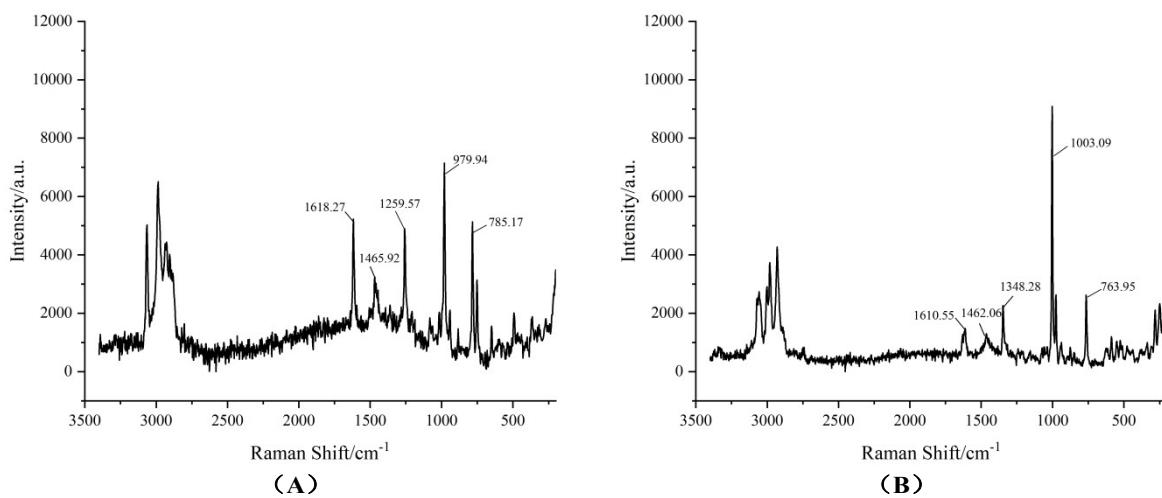

Figure S2. Raman spectra of salbutamol sulfate powder(A) and terbutaline sulfate powder(B)

Table S1. Comparison between the TLC-SERRS and the HPLC-MS/MS to determine of the two residues in pig liver

	TLC-SERRS		HPLC-MS/MS	
	LOD ₁ ($\mu\text{g/kg}$)	Time required (min)	LOD ₂ ($\mu\text{g/kg}$)	Time required (min)
salbutamol sulfate	0.04	about 30	0.5	about 240
terbutaline sulfate	0.14	about 30	0.5	about 240

Under the TLC-SERRS , LOD₁ is the actual LODs of salbutamol sulfate and terbutaline sulfate in the TLC-SERRS, respectively, and under the HPLC-MS/MS, LOD₂ is the LODs by the National Standard of the People's Republic of China (No.GB/T22286-2008).
