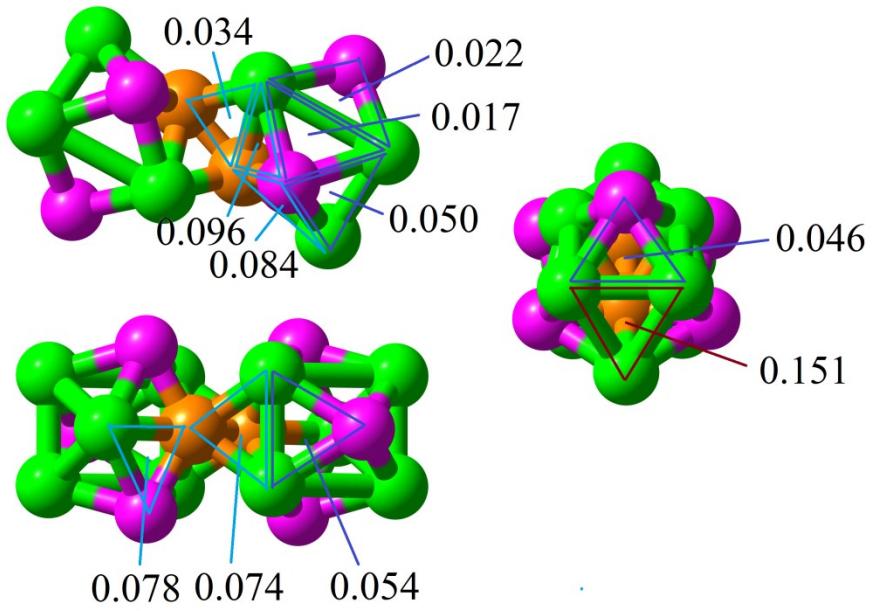

Figure S1. Calculated multicenter index for representative triangular faces of the studied $[CuSn_5Sb_3]_2^{4-}$, featuring two fused deltahedrons. Different views are showed for sake of clarity.

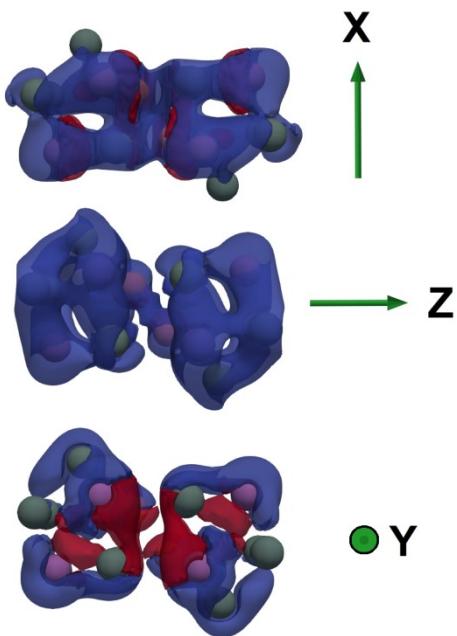

Figure S2. Calculated current density from GIMIC calculations with isosurface values of ± 0.02 nA/T, for different orientation of the applied field for $[\text{CuSn}_5\text{Sb}_3]_2^{4-}$. Blue: diatropic/ Red: Paratropic.
