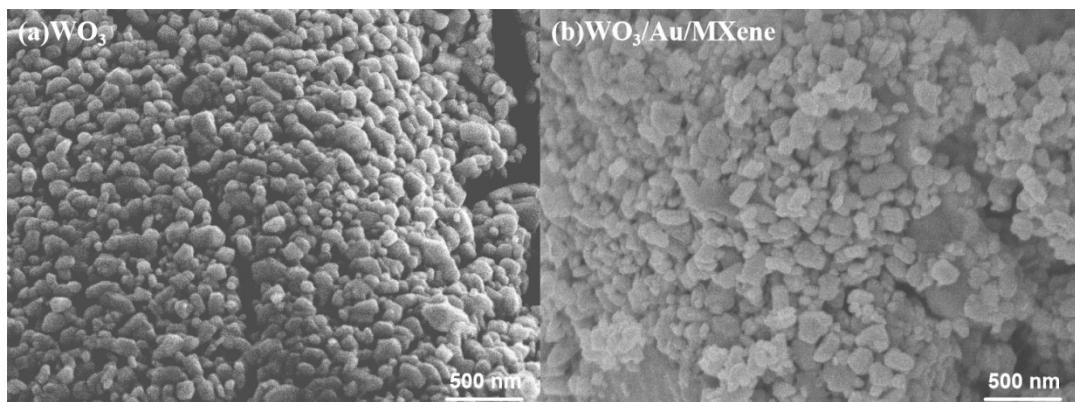

Figure S1. (a)-(b) SEM images of pure WO_3 and $\text{WO}_3/\text{Au}/\text{MXene}$.

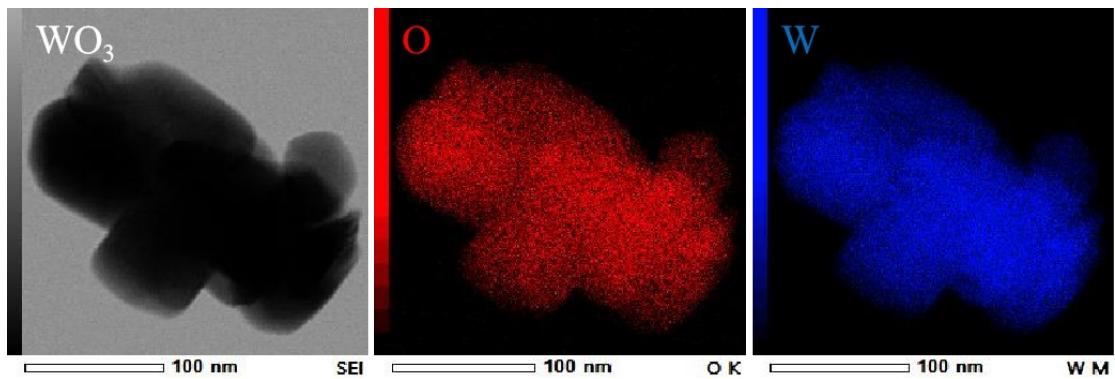

Figure S2. HR TEM and EDS mapping pictures of WO_3 .

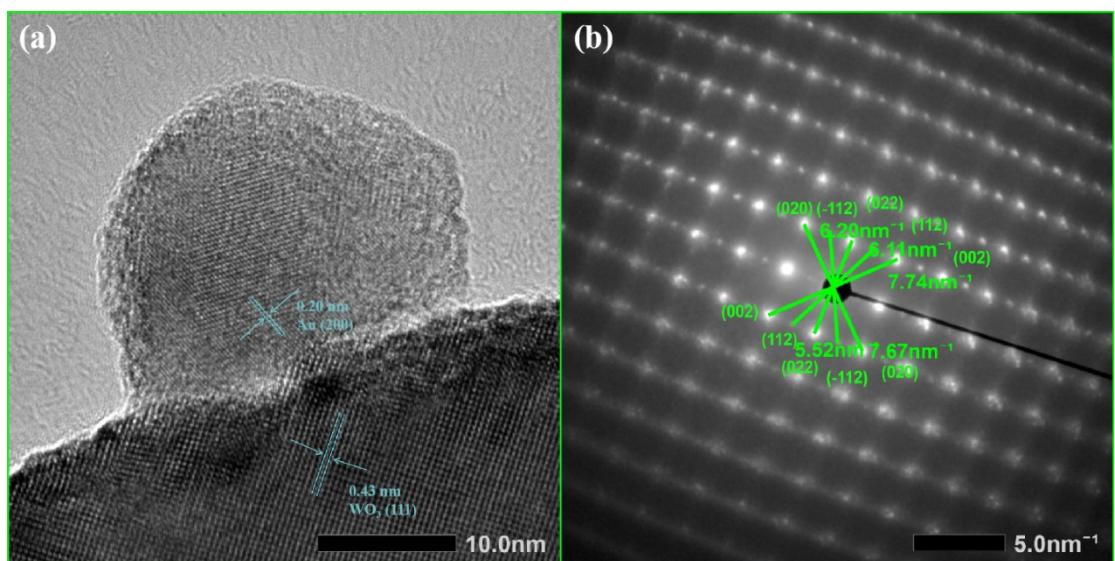

Figure S3. HR TEM lattice fringes and electron diffraction analysis pictures of WO_3/Au .

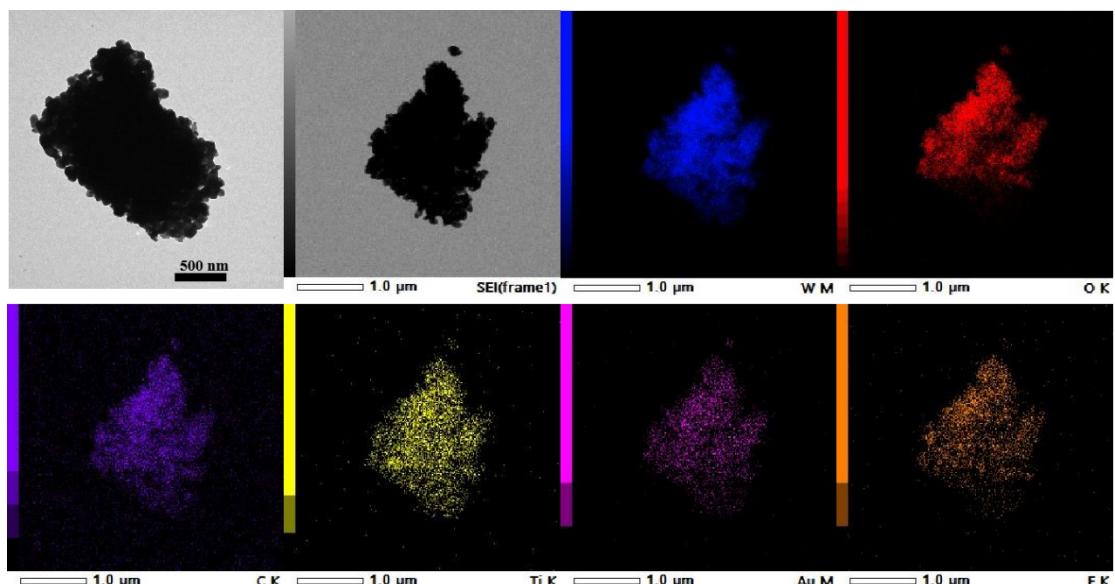

Figure S4. HR TEM and EDS mapping pictures of $\text{WO}_3/\text{MXene}/\text{Au}$.

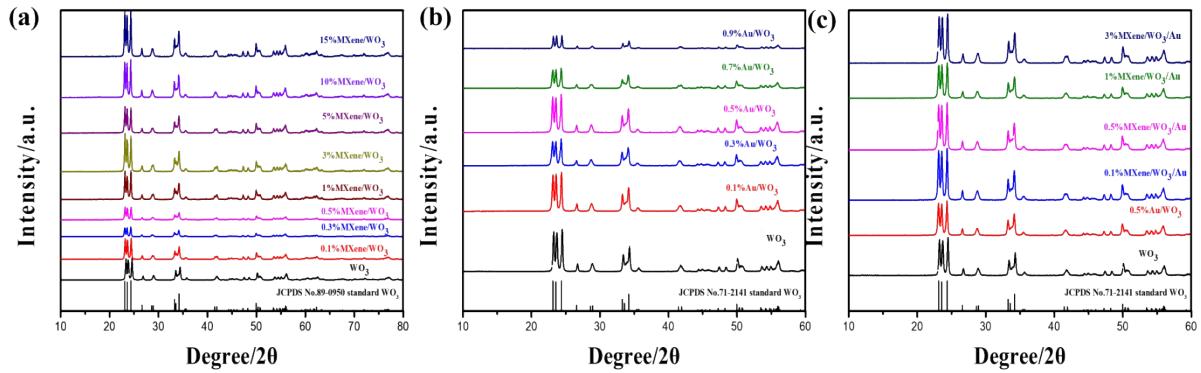

Figure S5. (a) XRD data of WO_3 and WO_3/MXene with different MXene contents, (b) XRD data of WO_3 and WO_3/Au with different Au contents and (c) XRD data of WO_3 and $\text{WO}_3/\text{Au}/\text{MXene}$ with different MXene contents.

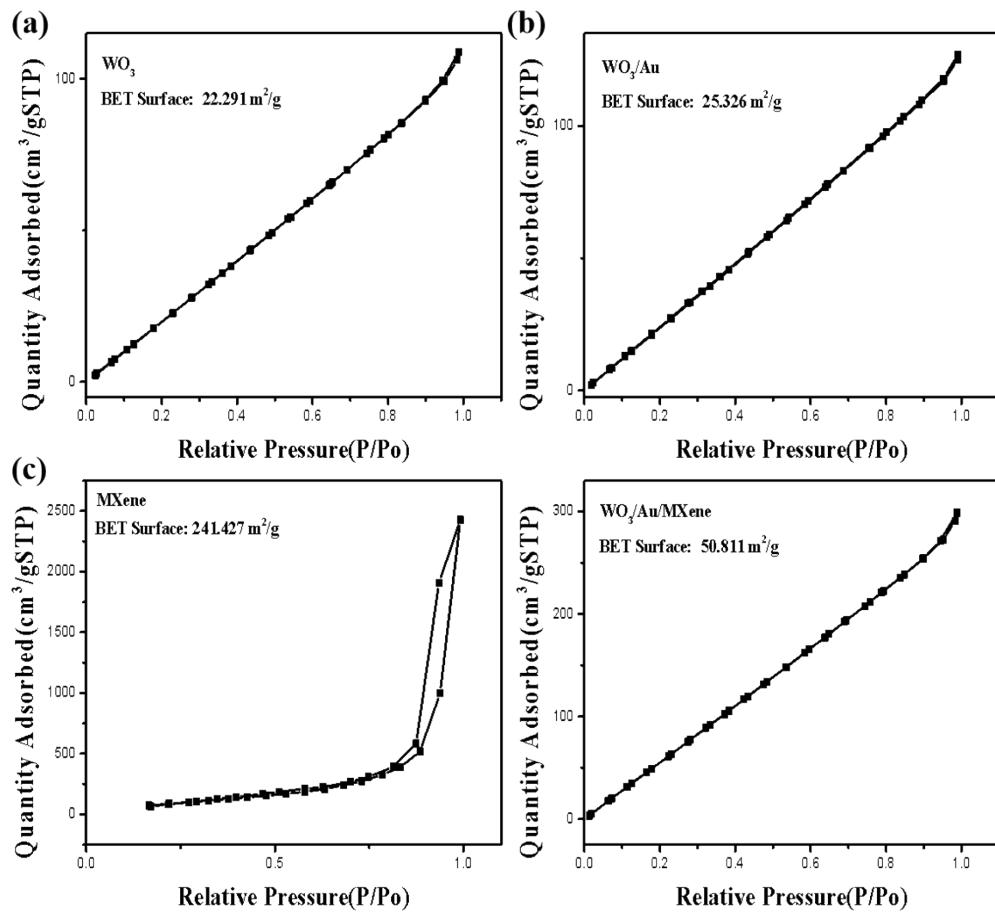

Figure S6. Nitrogen adsorption-desorption isotherms of WO_3 , WO_3/Au , MXene, and $\text{WO}_3/\text{Au}/\text{MXene}$.

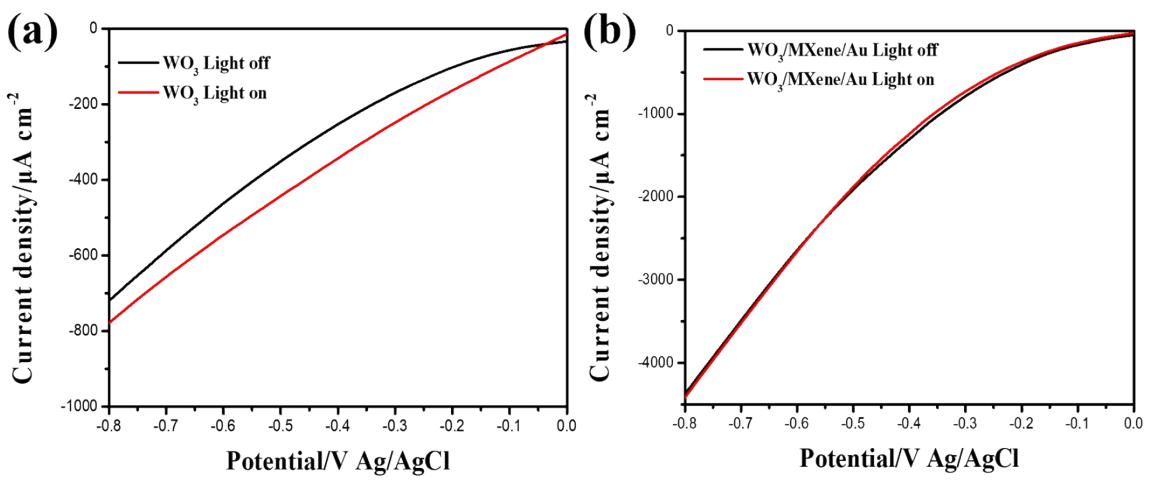

Figure S7. LSV data of (a) WO_3 and (b) $\text{WO}_3/\text{Au}/\text{MXene}$ at pH 6.09.

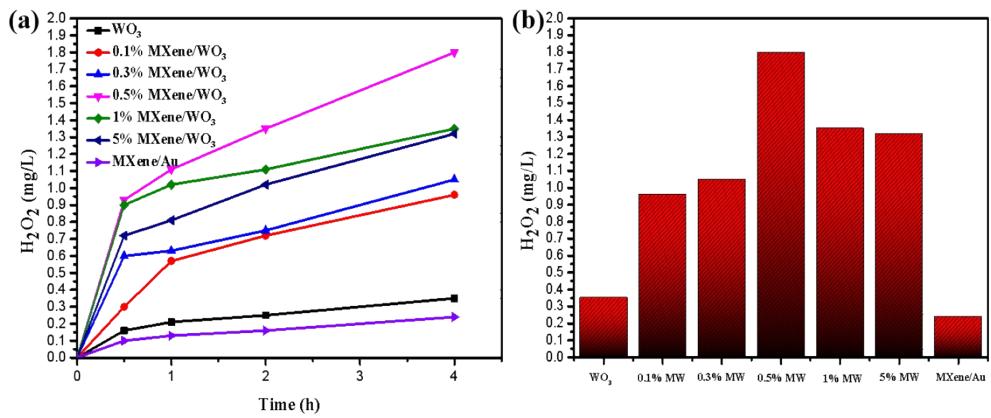

Figure S8. H_2O_2 generation from MXene/Au and WO_3/MXene with varying MXene concentrations over time under visible light at pH 7.

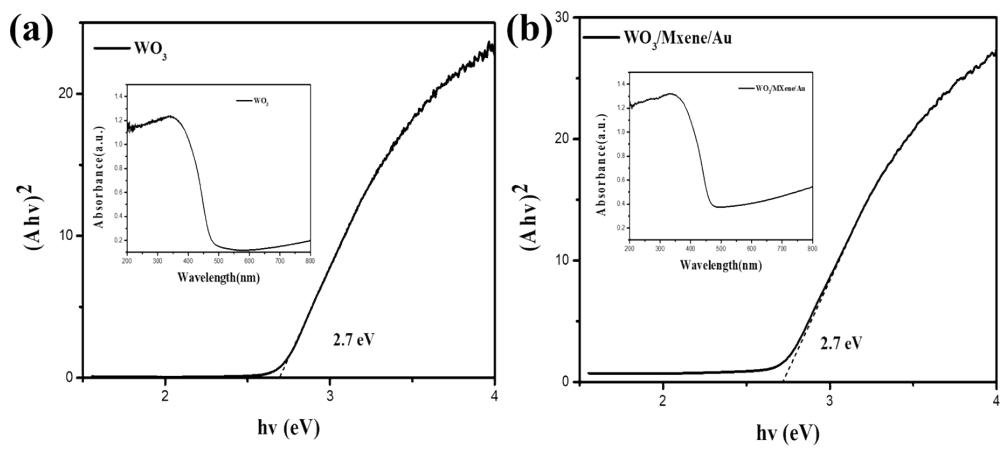

Figure S9. UV-vis data and tauc plots of (a) WO_3 and (b) $\text{WO}_3/\text{MXene/Au}$.
