(c) Ratio of the change

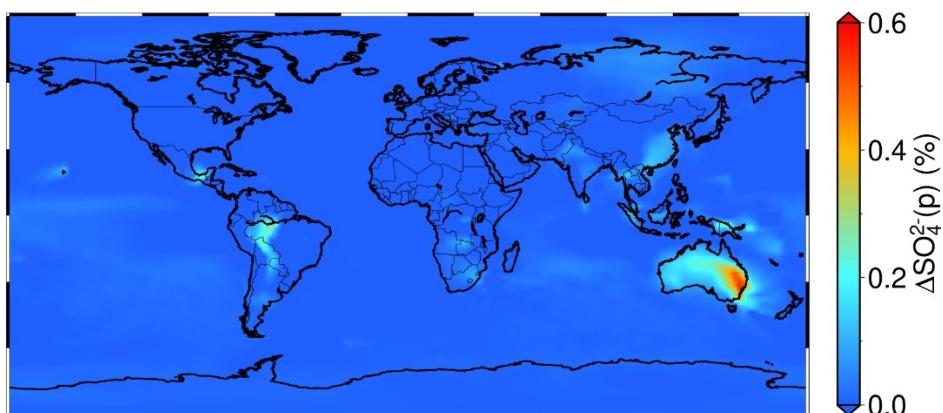

Figure S14: Mean column density from October to December for (a) sulphate ( $\text{g m}^{-2}$ ), (b) the change in column density of sulphate before and after the introduction of Criegee chemistry ( $\text{mg m}^{-2}$ ), and (c) the rate of change of sulphate before and after the introduction of Criegee chemistry (%). Note that the colour range for (c) is set to 0.0–0.6%, which differs from the colour range of Fig. 4(c) in the main manuscript (0.0–0.4%) for improved readability.
