

Original SDS-PAGE and western blot in Fig. S1.

Note: Fig. S1 are not used to comparative analysis of tropomyosin, just to identify that the proteins are target proteins (HTM, ATM, MTM). Primary antibody: (A) HTM polyclonal antibody, dilution at 1: 1×10^6 . (B) ATM polyclonal antibody, dilution at 1: 1×10^5 . (C) MTM polyclonal antibody, dilution at 1: 2×10^4 .

(A) HTM

(B) ATM

(C) MTM
