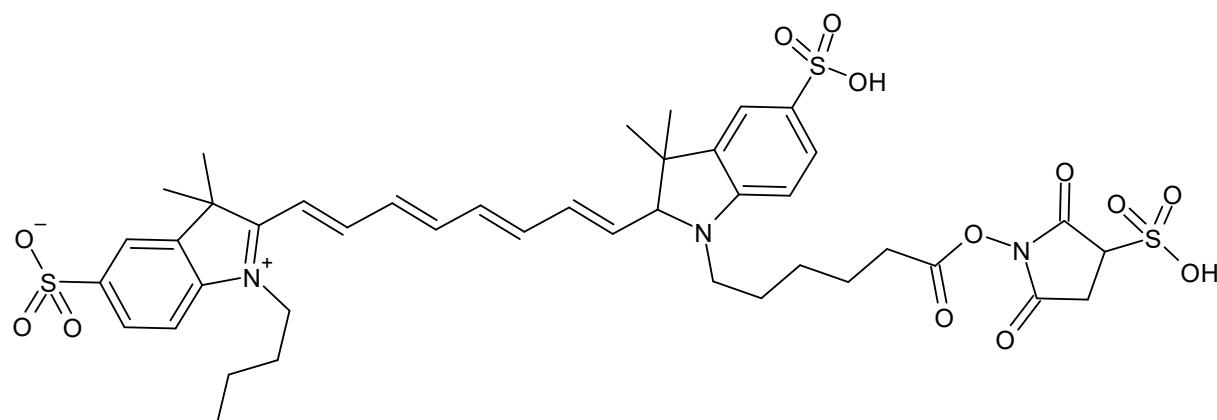

Figure S1. Formula of Flamma® 749 sulfo-NHS ester.

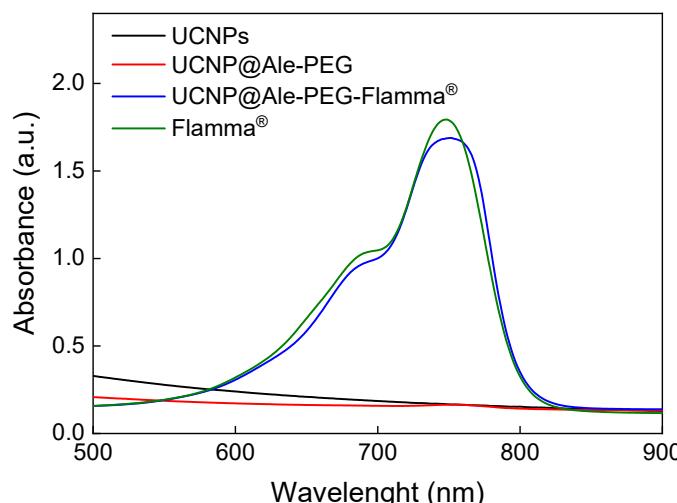

Figure S2. UV–Vis spectra of UCNPs, UCNP@Ale-PEG, UCNP@Ale-PEG-Flamma® and Flamma®.

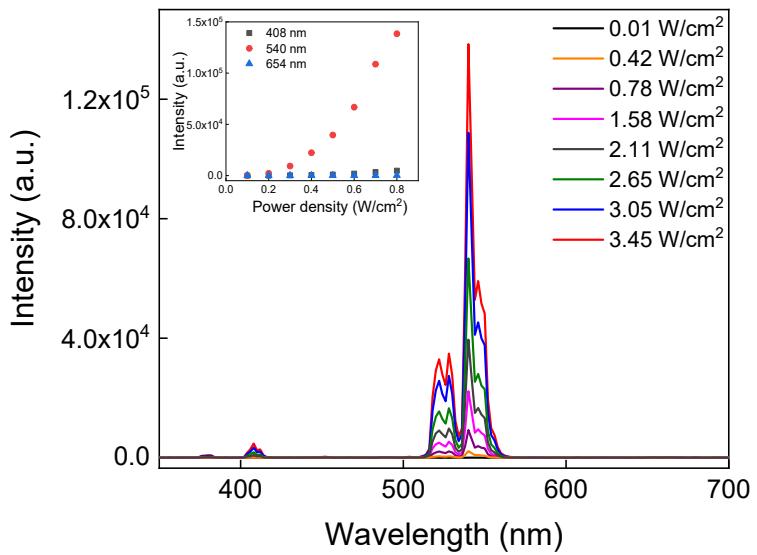

Figure S3. Upconversion photoluminescence emission spectra of aqueous UCNP@Ale-PEG-Flamma® dispersions (2 mg/ml) excited at 980 nm with different power densities. The inset shows the dependence of peak intensity on particle concentrations.

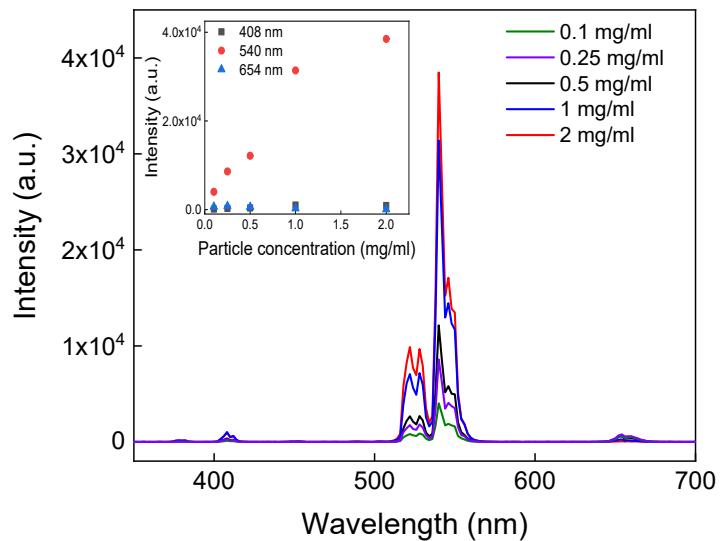

Figure S4. Upconversion photoluminescence emission spectra of aqueous UCNP@Ale-PEG-Flamma® dispersions at different concentrations; excitation at 980 nm, power density 2.11 W/cm². The inset shows the dependence of peak intensity on laser power density.
