S2.E

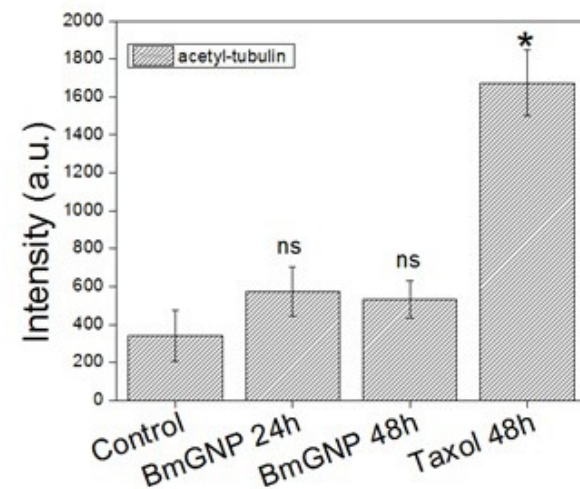

Figure S2. Quantitative estimation of expression of different proteins using Western blot. A bar graph indicating the band intensities of the protein p62 (A), LC3 A/B-II (B), LAMP-1 (C), cleaved caspase 3 (D) and acetyl-tubulin (E) under different conditions. (* $p < 0.05$; ** $p < 0.01$; *** $p < 0.001$; ns: non-significant)
