

Supplementary materials

Figure captions

Fig. S1 S2p spectra of SGP variants after 30-day soil incubation

Fig. S2 Soil pH and available Cd contents after simulated rain leaching

Fig. S3 Soil Cd availability impacted by SGP under different temperature pretreatments in pot experiments

Fig. S4 Pakchoi Cd uptake in SGP amended soils under thermal regimes

Table captions

Table S1 Free sulphydryl contents and Cd²⁺ sorption amounts of SGP under varying environmental stress conditions

Table S2 Surface elemental composition and chemical state analysis of SGP samples after soil incubation: XPS peak integration results

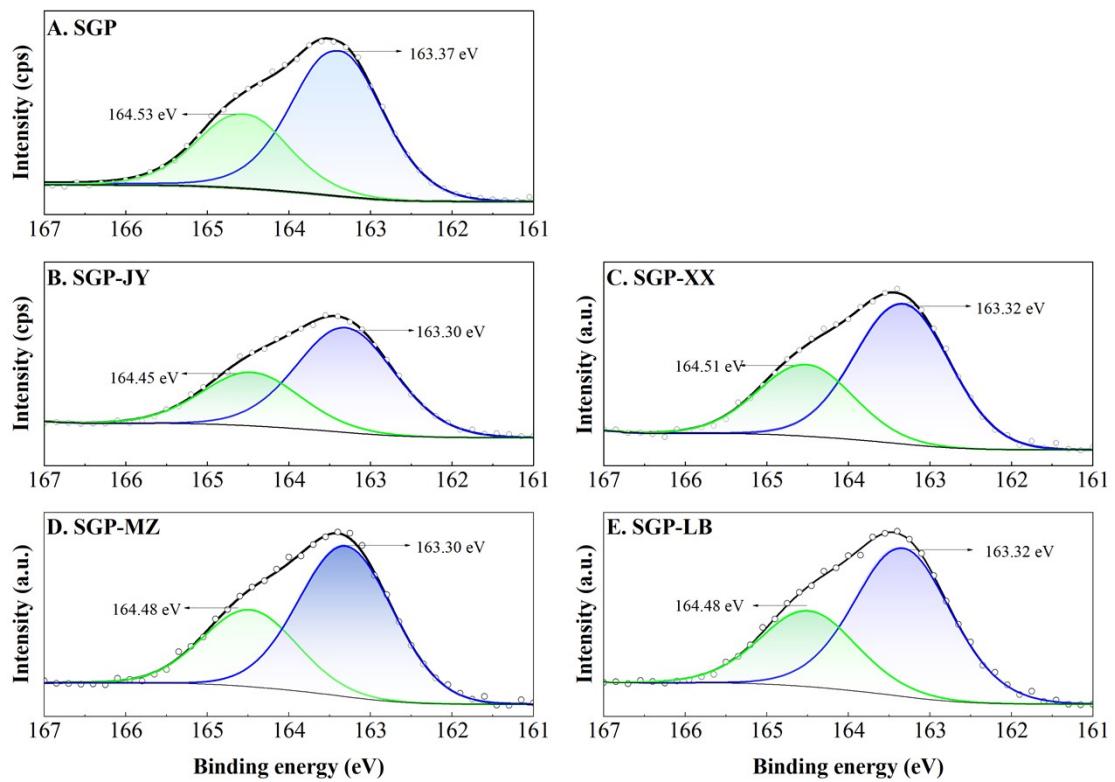

Fig. S1 S2p spectra of SGP variants after 30-day soil incubation

*(A-E: SGP; SGP-JY; SGP-XX; SGP-MZ; SGP-LB)

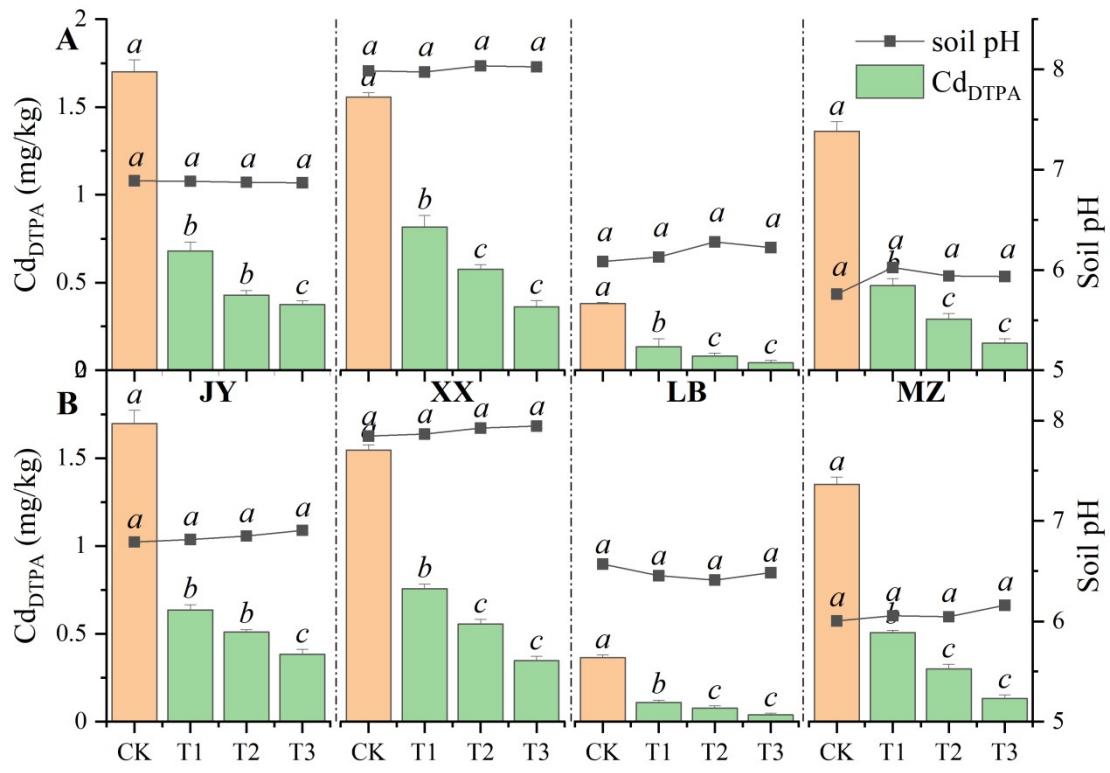

Fig. S2 Soil pH and available Cd contents after simulated rain leaching *(A/B: Acid rain vs natural rain leaching)

The different lowercase letters above the data column and point indicate statistical differences between different treatments.

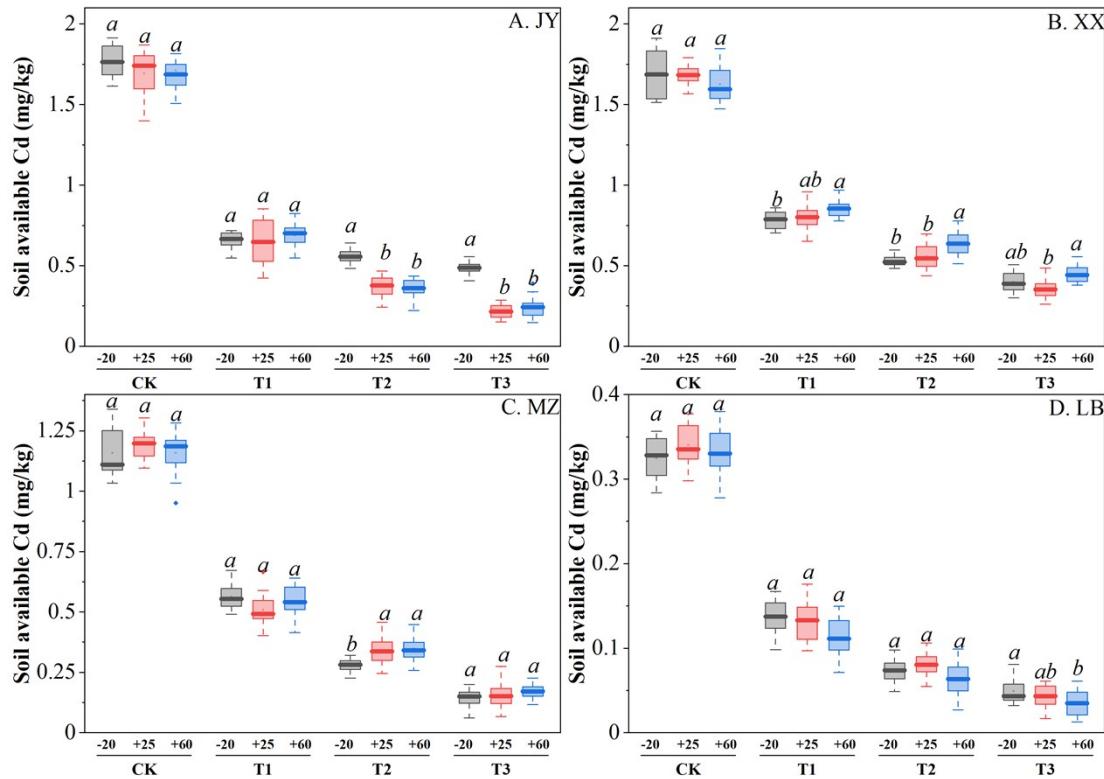

Fig. S3 Soil Cd availability impacted by SGP under different temperature pretreatments in pot experiments *(A-D: Jiyuan, Xinxiang, Mianzhu, Libo soils)

The different lowercase letters above the data column indicate statistical differences between different temperatures for the same treatment.

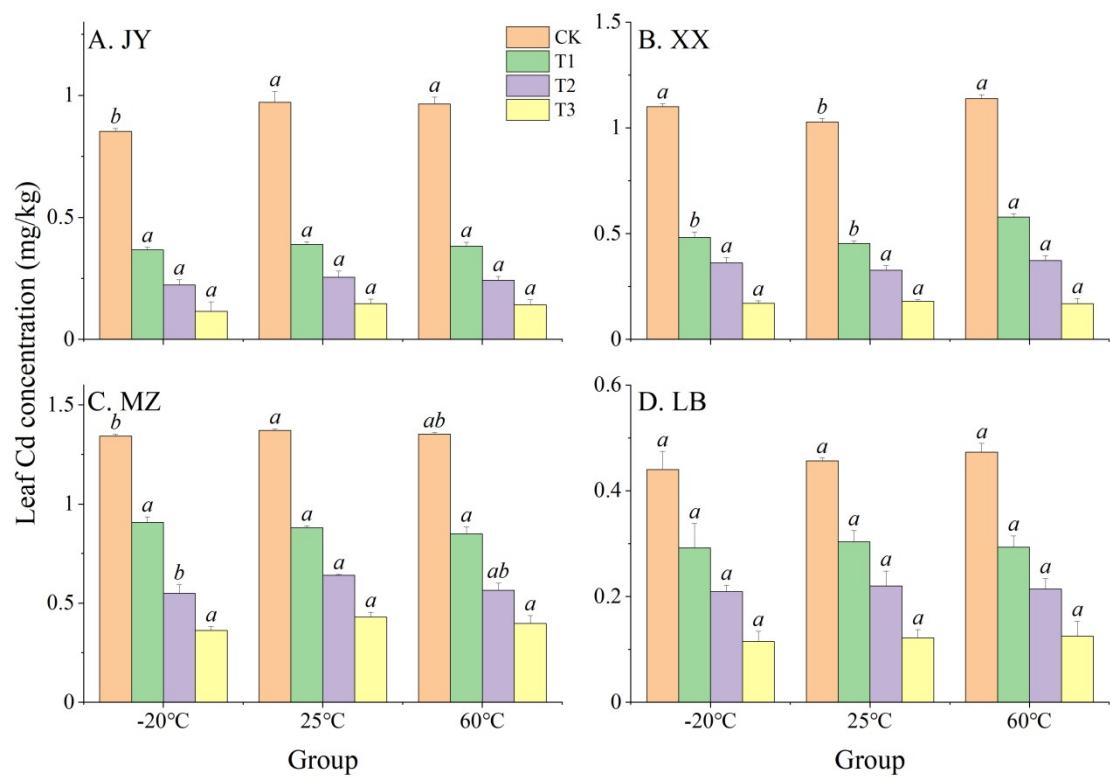

Fig. S4 Pakchoi Cd uptake in SGP amended soils under thermal regimes *(A-D: Jiyuan, Xinxiang, Mianzhu, Libo soils).

The different lowercase letters above the data column indicate statistical differences between different temperatures for the same immobilization treatment.

Table S1 Free sulfhydryl contents and Cd²⁺ sorption amounts of SGP under varying environmental stress conditions

No	Environ mental stress	Free sulfhydryl content			Sorption amount for Cd ²⁺ (mg/g)			<i>a</i>
		Mean	SD	RSD (%)	Mean	SD	RSD (%)	
1	Air	2.22	0.05	2.24	<i>c</i>	24.57	0.71	2.87
2	H ₂ O	2.34	0.07	2.95	<i>b</i>	23.25	0.62	2.65
3	CuSO ₄	2.33	0.07	3.15	<i>b</i>	23.19	0.78	3.36
4	H ₂ O ₂	2.41	0.07	2.94	<i>a</i>	24.20	0.86	3.57
5	JY soil	2.35	0.06	2.67	<i>b</i>	23.16	1.06	4.58
6	XX soil	2.33	0.06	2.67	<i>b</i>	22.60	1.28	5.69
7	MZ soil	2.35	0.08	3.29	<i>b</i>	23.94	0.96	4.02
8	LB soil	2.31	0.07	2.88	<i>b</i>	23.85	0.76	3.17
